- Bright, long beam for superior visibility

Durable equipment for challenging conditions
- Sturdy one-piece body for tough environments
- IP69K waterproof to master the elements
- Corrosion-free, stainless-steel mounting brackets

Off-road auxiliary lights
- Trouble-free operation

Highlights

Superior visibility
The Philips Ultinon Drive 5000 series provides outstanding beam performance with brilliant illumination that extends up to 423 yards. With high lumen output coming from the powerful LEDs, the Ultinon Drive series provides ample visibility for faster reactions. Cool light color of 6500 Kelvin keep you focused without straining your eyes.

Sturdy one-piece body
Philips Ultinon Drive 5000 series lightbars are built with single-piece assemblies to withstand the toughest conditions. This also allows for excellent heat management and consistently high light output throughout your journey. Ultinon Drive 5000 series has an impact protection rating of IK07, to ensure it can withstand the hazards of aggressive offroading. Rugged polycarbonate lenses resist damage and scratches and the convenient DT connector guarantees a perfect connection.

Waterproof for durable light
With its ingenious screwless design, the Ultinon Drive 5000 series is rated IP68 and IP69K against dust, high temperature, and high pressure water. These lights will perform, wherever your road leads and whatever the weather. And they will be more than a match for any powerwasher you use to clean your ride after your adventures.

Corrosion-free brackets
Ultinon Drive 5000 series mounting brackets are made of highly corrosion resistent stainless steel. Built to withstand years of exposure in snow, ice, and salt air environments, these brackets and the entire lightbar will provide years of reliable service.

Trouble-free
Philips Ultinon Drive 5000 series lightbars are designed and tested to ensure they will function smoothly with your vehicle's electrical systems. They will not create electrical interference that might interfere with other vehicle functions.

Specifications

Electrical characteristics
Voltage: 9-30 Volt DC

Product description
Accessories (optional): additional wiring kit
Impact protection rating (IK): IK07
Ingress protection rating (IP): IP68 & IP69K
One-piece body design
Range: Ultinon Drive 5000
Scratch resistant lens
Technology: LED
corrosion-free brackets: yes, included
Heat sink: 13-piece .06 in
Material: Aluminum die-cast
Operating Temperature: -40° F to 176° F

Light characteristics
Color temperature: 6500 K K
Effective lumen output: 6500 lumens
