SCD843/05

Always close to your baby

Private and secure with A-FHSS technology

The Philips Avent SCD845 enables you to maintain a secure and private connection with your baby at all times. Hear your baby with perfect sound quality and also see your baby in crystal-clear vision (3.5" LCD), day or night.

Private and secure connection

- Private, secure connection with adaptive FHSS technology
- High-resolution 3.5" screen with crystal-clear night vision
- Hear your baby with clear sound
- Energy-saving eco mode with connection indication

Freedom, flexibility, comforting and soothing

- Range up to 300 metres*
- More flexibility with up to 12 hours of operating time*
- Comforting night light and lullabies to calm your little one
- Talk to your baby remotely
- Vibration mode for subtle notifications
- Choose the best sound level for your surroundings

Reliability and reassurance

- Know you are connected with LED alerts
- Monitor the temperature in your baby's room

Highlights

Private, secure and adaptive FHSS

Unique handset pairing for a private, secure connection to your baby. Combined with the new Adaptive FHSS (Frequency Hopping Spread Spectrum) technology for minimal interference.

3.5" colour screen with 2 x zoom

See your baby, day and night, with crystal-clear infrared night vision that automatically switches on in the dark. Enjoy your baby sleeping with the high-resolution, extra-large 3.5" colour screen. With 2 x digital zoom and pan for extra reassurance so you can see everything your baby is up to.

Perfect clear sound video

Hear every tiny giggle, gurgle and hic-up with perfect clarity. Not only see but also hear your baby any time with high-quality, crystal-clear sound.

ECO mode

Switch on the ECO mode to reduce power consumption during quiet times in the baby's room, safe in the knowledge that you are still connected to your baby via the unique link indication. The ECO mode switches off the audio/video transmissions and the units only connect when the baby makes a sound.

300m Range

Indoor range up to 50 metres*, Outdoor range up to 300 metres*.

Operating time up to 12 hours

The convenient rechargeable parent unit will give you the freedom of cordless monitoring for up to 12 hours before recharging is required.

Night light and lullabies

There's nothing like a gentle lullaby and the warm tranquil glow of a night light to calm a restless baby. From any room in the house, you can select one of 5 relaxing tunes and switch on the night light, helping your baby to drift effortlessly to sleep in no time.

Talk back

Sometimes all your baby needs is the soothing sound of your voice. With one click of this essential feature you can connect with your baby from anywhere around the home.

Vibration alert

Personalise your alert settings and be notified by a silent and subtle vibration of the parent unit.

Sensitivity control

It allows you to set the microphone sensitivity of the baby unit. The microphone sensitivity determines what level of noise is picked up by the baby unit, e.g. you might want to hear when your baby cries, but you may be less interested in his or her babbling.

Always connected

Always know when your monitor is in range and connected. The parent unit will alert you when your monitor is out of range or when the power is low, helping you make sure that you are always connected to your baby.
