- Reference: 129576000KX1
- EAN (Japan): 8727900393590
- Ordering code (Japan): 39359030

129576000KX1

# Highlights

## Automotive grade quality

The technologically advanced Philips lighting is renowned in the automotive industry, and has been for over 100 years. The Philips Automotive Grade Quality products are designed and developed following strict quality control processes (including applicable ISO norms), leading to consistently high production standards. Major car manufacturers choose Philips lamps, because when you buy Philips, you buy quality. You get powerful bright light, and precise beam performance. You get high-end style. And you get an advanced LED lighting system for a safer, smoother and more enjoyable drive.

## Long-lasting LED lighting

You want bright and stylish car lights. But you don't want to keep replacing failed lamps. That is a major weakness of conventional headlights; the more powerful the light, the shorter its lifespan. At the same light intensity, LEDs last much longer. And Philips X-tremeVision LED exterior lights are extremely durable. Due to the latest technological innovation, they prevent heat and vibrational damage and last up to 12 years. With most cars replaced or upgraded within that time, your stylish new exterior lights should last you the lifetime of your car.

## Ready, steady, installed!

Supplied with multi-socket options, to easily replace room lamp types T10 and festoon 30mm

## Stylish interior lighting

Interior lighting is not just about function and comfort; it's about looking good too. Upgrade your interior lighting with a brighter warm light or daylight effect. So when you open the trunk, or fire up the dashboard lights, you can do so with a little extra style. Your car is an expression of who you are, so make a style statement with Philips interior LED lights.

## See more inside your car

Whether it's your phone, your keys or your child's missing left shoe, at some point we've all had to search for a misplaced item in a poorly lit car. With Philips LED interior lighting, you get a warm, bright and uniformly diffused light. So the next time you're searching around in the trunk, the glove compartment or the floor of your car, you'll be able to see exactly what you're doing and find anything with ease.
