Highlights

**Welcome page**
A welcome page is displayed each time the TV set is switched on. The welcome page can be branded and customized easily at the time of installation via a simple welcome image in .png format.

**USB Cloning**
Provides the ability to easily copy all programming and channel programming settings from one TV into other TV sets in less than a minute. The feature ensures uniformity between TV sets and significantly reduces installation time and costs.

**PrisonMode**
To control communication, this Hospitality TV is equipped with a specific PrisonMode setting. This Advanced Security Mode switches off certain settings not demanded by the detention market like Teletext, Electronic Programme Guide, Subtitles and USB ports.

**USB (photos, music, video)**
Share the fun. Connect your USB memory-stick, digital camera, mp3 player or other multimedia device to the USB port on your TV to enjoy photos, videos and music with the easy to use onscreen content browser.

**One combined channel list**
One integrated channel list for digital and analogue channels. This allows the guest to zapp seamlessly between Analogue and Digital channels.

**Advanced volume control**
With advanced volume control you can install the start-up volume of the TV and predefine the volume range with which the TV set is allowed to operate, preventing excessive volume adjustments and avoiding disturbance of next door guests.

**Joystick control locking**
By disabling or enabling the joystick control locking, the administrator can prevent unauthorized use of the TV via the joystick, saving the hotelier overheads.

**Installation menu locking**
Prevents unauthorized access to installation and configuration settings, to ensure maximum guest convenience and avoid unnecessary reinstalling costs.

**Low power consumption**
Philips TVs are designed to minimize power consumption. This will not only reduce environmental impact but also lower operating costs.
