Index 52
Your new TV

1.1 Pause TV and recordings

If you connect a USB Hard Drive, you can pause and record a broadcast from a digital TV channel.

Pause your TV and answer that urgent phone call or simply take a break during a sports match, while the TV stores the broadcast on the USB Hard Drive. You can start watching again later.

1.2 EasyLink

With EasyLink you can operate a connected device, like a Bluray Disc player, with the remote control of the TV.

EasyLink uses HDMI CEC to communicate with the connected devices.
2

Setting up

2.1

Read safety

Read the safety instructions first before you use the TV.

In Help, go to Safety and care > Safety.

2.2

TV stand and wall mounting

TV stand

You can find the instructions for mounting the TV stand in the Quick Start Guide that came with the TV. In case you lost this guide, you can download it from www.philips.com.

Use the product type number of the TV to look for the Quick Start Guide to download.

Wall mounting

Your TV is also prepared for a VESA-compliant wall mount bracket (sold separately). Use the following VESA code when purchasing the wall mount. . .

To fix the bracket securely, use screws with a length indicated in the drawing.

- 22Pxx4000 - VESA MIS-F 75x75, M4 (Minimum 10 mm, Maximum 10.5 mm)
- 24Pxx4000 - VESA MIS-F 75x75, M4 (Minimum 10 mm, Maximum 10.5 mm)
- 24PHx5210 - VESA MIS-F 75x75, M4 (Minimum 10 mm, Maximum 10.5 mm)
- 32PFx4100 - VESA MIS-F 100x100, M4 (Minimum 10 mm, Maximum 14 mm)
- 32PHx4100/60 - VESA MIS-F 100x100, M4 (Minimum 12 mm, Maximum 16 mm)
- 40Pxx4100 - VESA MIS-F 200x200, M4 (Minimum 12 mm, Maximum 16 mm)
- 48Pxx4100 - VESA MIS-F 200x200, M6 (Minimum 12 mm, Maximum 16 mm)
- 32Pxx4200 - VESA MIS-F 100x100, M4 (Minimum 10 mm, Maximum 14 mm)
- 40Pxx4200 - VESA MIS-F 200x200, M4 (Minimum 12 mm, Maximum 16 mm)
- 40Pxx6300 - VESA MIS-F 200x200, M6 (Minimum 14 mm, Maximum 24 mm)
- 48Pxx6300 - VESA MIS-F 400x400, M6 (Minimum 14 mm, Maximum 24 mm)
- 55Pxx6300 - VESA MIS-F 400x400, M6 (Minimum 14 mm, Maximum 24 mm)

Caution

Wall mounting the TV requires special skills and should only be performed by qualified personnel. The TV wall mounting should meet safety standards according to the TV’s weight. Also read the safety precautions before positioning the TV.

TP Vision Europe B.V. bears no responsibility for improper mounting or any mounting that results in accident or injury.

2.3

Tips on placement

- Position the TV where light does not shine directly on the screen.
- Position the TV up to 15 cm away from the wall.
- The ideal distance to watch TV is 3 times its diagonal screen size. When seated, your eyes should be level with the centre of the screen.

2.4

Power cable

- Insert the power cable into the POWER connector on the back of the TV.
- Make sure the power cable is securely inserted in the connector.
- Make sure that the power plug, in the wall socket, is accessible at all times.
- When you unplug the power cable, always pull the plug, never pull the cable.
Although this TV has a very low standby power consumption, unplug the power cable to save energy if you do not use the TV for a long period of time.

2.5 Antenna cable

Insert the antenna plug firmly into the ANTENNA socket at the back of the TV.

You can connect your own antenna or an antenna signal from an antenna distribution system. Use an IEC Coax 75 Ohm RF antenna connector.

Use this antenna connection for DVB-T and DVB-C input signals.
Connections

3.1 Tips on connections

Connectivity guide

Always connect a device to the TV with the highest quality connection available. Also, use good quality cables to ensure a good transfer of picture and sound.

If you need help to connect several devices to the TV, you can visit the Philips TV connectivity guide. The guide offers information on how to connect and which cables to use.

Go to www.connectivityguide.philips.com

Antenna

If you have a Set-top box (a digital receiver) or Recorder, connect the antenna cables to run the antenna signal through the Set-top box and/or Recorder first before it enters the TV. In this way, the antenna and the Set-top box can send possible additional channels to the Recorder to record.

HDMI

EasyLink HDMI CEC

If your devices are connected with HDMI and have EasyLink, you can operate them with the TV remote control. EasyLink HDMI CEC must be switched On on the TV and the connected device.

DVI to HDMI

An HDMI connection has the best picture and sound quality. One HDMI cable combines video and audio signals. Use an HDMI cable for High Definition (HD) or Full HD (FHD) TV signals. For best signal quality transfer, use a High speed HDMI cable and do not use an HDMI cable longer than 5 m.

HDMI CEC

If your devices are connected with HDMI and have EasyLink, you can operate them with the TV remote control. EasyLink HDMI CEC must be switched On on the TV and the connected device.

DVI to HDMI

Use a DVI to HDMI adapter if your device only has a DVI connection. Use one of the HDMI connections and add an Audio L/R cable (mini-jack 3.5mm) to Audio In for sound, on the back of the TV.

Copy protection

DVI and HDMI cables support HDCP (High-bandwidth Digital Content Protection). HDCP is a copy protection signal that prevents copying content from a DVD disc or Blu-ray Disc. Also referred to as DRM (Digital Rights Management).

HDMI ARC

HDMI 1 connection on the TV have HDMI ARC (Audio Return Channel). If the device, typically a Home Theatre System (HTS), also has the HDMI ARC connection, connect it to HDMI 1 on this TV. With the HDMI ARC connection, you do not need to connect the extra audio cable that sends the sound of the TV picture to the HTS. The HDMI ARC connection combines both signals.

In case you prefer to switch off ARC on the HDMI connections, press and select Setup and press OK. Select TV settings > Sound > Advanced > HDMI 1 - ARC

Scart

SCART is a good quality connection. The SCART connection can be used for CVBS and RGB video signals but cannot be used for High Definition (HD) TV signals. The SCART connection combines video and audio signals.

Use the SCART adapter cable to connect your device.
Audio Out - Optical

Audio Out - Optical is a high quality sound connection. This optical connection can carry 5.1 audio channels. If your device, typically a Home Theatre System (HTS), has no HDMI ARC connection, you can use this connection with the Audio In - Optical connection on the HTS. The Audio Out - Optical connection sends the sound from the TV to the HTS.

You can set the type of the audio out signal to fit the audio capabilities of your Home Theatre System.

If the sound does not match the video on screen, you can adjust the audio to video synchronization.

3.2 EasyLink HDMI CEC

EasyLink

With EasyLink you can operate a connected device with the TV remote control. EasyLink uses HDMI CEC (Consumer Electronics Control) to communicate with the connected devices. Devices must support HDMI CEC and must be connected with an HDMI connection.

EasyLink setup

The TV comes with EasyLink switched on. Make sure that all HDMI CEC settings are properly set up on the connected EasyLink devices. EasyLink might not work with devices from other brands.

HDMI CEC on other brands

The HDMI CEC functionality has different names on different brands. Some examples are: Anynet, Aquos Link, Bravia Theatre Sync, Kuro Link, Simplink and Viera Link. Not all brands are fully compatible with EasyLink.

Example HDMI CEC branding names are property of their respective owners.

Operate devices (For 4000, 4100, 4200, 5210 TV models)

To operate a device connected to HDMI and set up with EasyLink, select the device - or its activity - in the list of TV connections.

Press SOURCES, select a device connected to an HDMI connection and press OK.

Once the device is selected, the TV remote control can control the device. However and OPTIONS keys and some other TV keys are not forwarded to the device. If the key you need is not on the TV remote control, you can select the key in the Options menu.

Press OPTIONS and select Controls in the menu bar. On the screen, select the device key you need and press OK.

Some very specific device keys might not be available in the Controls menu.

Note: Only devices that support EasyLink Remote Control function will respond to the TV remote control.
EasyLink settings

The TV comes with all EasyLink settings switched on. You can switch off any EasyLink setting independently.

EasyLink

To switch off EasyLink completely . . .

1. Press \(\text{\&}\) and select Setup and press OK.
2. Select TV settings > General settings > EasyLink.
3. Select EasyLink.
4. Select Off and press OK.
5. Press \(\rightarrow\), repeatedly if necessary, to close the menu.

EasyLink Remote Control

If you want devices to communicate but you don’t want to operate them with the TV remote control, you can switch off EasyLink remote control separately. You can control multiple HDMI-CEC compliant devices with your TV remote control.

In the EasyLink settings menu, select EasyLink Remote Control and select Off.

One-touch play

When you play an HDMI-CEC compliant device, the TV switches on from standby and switches to the correct source.

One-touch standby

When you press \(\text{\&}\) on the TV remote control, the TV and all HDMI-CEC compliant devices switch to standby mode.

System audio control

If you connect an HDMI-CEC compliant device that includes speakers through the HDMI ARC connector, you can choose to hear the TV audio from those speakers instead of the TV speakers.

Common interface - CAM

CI+

This TV is ready for the CI+ Conditional Access.

With CI+ you can watch premium HD programmes, like movies and sports, offered by digital TV broadcasters in your region. These programmes are scrambled by the TV broadcaster and descrambled with a prepaid CI+ module.

Digital TV broadcasters provide this CI+ module (Conditional Access Module - CAM) when you subscribe to their premium programmes. These programmes have a high level of copy protection.

Contact a digital TV broadcaster for more information on terms and conditions.

CAM

Insert a CAM module

Switch off the TV before inserting a CAM. Look on the CAM for the correct method of insertion. Incorrect insertion can damage the CAM and TV.

Use the Common Interface slot on the TV to insert the CAM card. With the front of the card facing to you, gently insert the CAM as far as it will go. Leave the card in the slot permanently.

It may take a few minutes before the CAM is activated. Removing the CAM will deactivate the broadcast service on TV. If a CAM is inserted and subscription fees are paid, (connection methods can differ), you can watch the TV broadcast. The inserted CAM is exclusively for your TV.

Set-top box - STB

Use 2 antenna cables to connect the antenna to the Set-top box (a digital receiver) and the TV.

Next to the antenna connections, add an HDMI cable to connect the Set-top box to the TV. Alternatively, you can use a SCART cable if the Set-top box has no HDMI connection.

Auto switch off
Switch off the Automatic timer, if you only use the remote control of the Set-top box. Do this to prevent the TV from switching off automatically after a 4 hour period without a key press on the remote control of the TV.

To switch off the Switch off timer, press and select Setup and press OK.
Select TV settings > General settings > Auto switch off and set the slider bar to Off.

3.5 Satellite receiver

Connect the dish antenna cable to the Satellite receiver.

Next to the antenna connection, add an HDMI cable to connect the device to the TV. Alternatively, you can use a SCART cable if the device has no HDMI connection.

Auto switch off

Switch off this automatic timer, if you only use the remote control of the Set-top box. Do this to prevent the TV from switching off automatically after a 4 hour period without a key press on the remote control of the TV.

To switch off the Switch off timer, press and select Setup and press OK.
Select TV settings > General settings > Auto switch off and set the slider bar to Off.

3.6 Home Theatre System - HTS

Connect HTS

Use an HDMI cable to connect a Home Theatre System (HTS) to the TV. You can connect a Philips Soundbar or an HTS with a built-in disc player. Alternatively, you can use a SCART cable if the device has no HDMI connection.

HDMI ARC

HDMI 1 connection on the TV have HDMI ARC (Audio Return Channel). If the device, typically a Home Theatre System (HTS), also has the HDMI ARC connection, connect it to HDMI 1 on this TV. With the HDMI ARC connection, you do not need to connect the extra audio cable that sends the sound of the TV picture to the HTS. The HDMI ARC connection combines both signals.

If the Home Theatre System has no HDMI ARC connection, add an optical audio cable (Toslink) to send the sound of the TV picture to the Home Theatre System.

Audio to video synchronisation (sync)

If the sound does not match the video on screen, you can set a delay on most Home Theatre Systems with a disc player to match the sound with the video.
Audio Out settings

Audio Out delay

With a Home Theatre System (HTS) connected to the TV, the picture on TV and the sound from the HTS should be synchronised.

Automatic audio to video sync

With recent Philips Home Theatre Systems, the audio to video sync is automatically synchronised and always correct.

Audio sync delay

For some Home Theatre Systems you might need to adjust the audio sync delay to synchronise the audio to video. On the HTS, increase the delay value until there is a match between picture and sound. A delay value of 180ms may be required. Read the user manual of the HTS. With a delay value set up on the HTS, you need to switch off Audio Out delay on the TV.

To switch off the Audio Out delay . . .
1. Press ‒ and select Setup and press OK.
2. Select TV settings > Sound > Advanced > Audio out delay.
3. Select Off and press OK.
4. Press , repeatedly if necessary, to close the menu.

Audio Out offset

If you cannot set a delay on the Home Theatre System, you can set the TV to sync the sound. You can set an offset that compensates the time necessary for the Home Theatre System to process the sound of the TV picture. You can set the value in steps of 1ms. Maximum setting is 12ms. The Audio out delay setting should be switched on.

To synchronise the sound on the TV . . .
1. Press ‒ and select Setup and press OK.
2. Select TV settings > Sound > Advanced > Audio out delay.
3. Use the slider bar to set the sound offset and press OK.
4. Press , repeatedly if necessary, to close the menu.

Audio Out format

If you have a Home Theatre System (HTS) with multichannel sound processing capabilities like Dolby Digital, DTS® or similar, set the Audio out format to Multichannel. With Multichannel, the TV can send the compressed multichannel sound signal from a TV channel or connected player to the Home Theatre System. If you have a Home Theatre System without multichannel sound processing, select Stereo.

To set the Audio Out format . . .
1. Press ‒ and select Setup and press OK.
2. Select TV settings > Sound > Advanced > Audio out format.
3. Select Multichannel or Stereo.
4. Press , repeatedly if necessary, to close the menu.

Audio Out levelling

Use the Audio Out leveling setting to level the volume (loudness) of the TV and the Home Theatre System when you switch over from one to another. Volume differences can be caused by differences in sound processing.

To level the difference in volume . . .
1. Press ‒ and select Setup and press OK.
2. Select TV settings > Sound > Advanced > Audio out format.
3. Select More. If the volume difference is small, select Less.
4. Press , repeatedly if necessary, to close the menu.

Audio Out levelling affects both the Audio Out - Optical and HDMI ARC sound signals.

Problems with HTS sound

Sound with loud noise

If you watch a video from a plugged in USB flash drive or connected computer, the sound from your Home Theatre System might be distorted.

To set the volume level . . .
1. Press ‒ and select Setup and press OK.
2. Select TV settings > Sound > Advanced > Audio out format.
4. Press , repeatedly if necessary, to close the menu.

Audio Out offset

If you cannot set the volume level, you can set a delay on the Home Theatre System.

To switch off the Audio Out delay . . .
1. Press ‒ and select Setup and press OK.
2. Select TV settings > Sound > Advanced > Audio out delay.
3. Select Off and press OK.
4. Press , repeatedly if necessary, to close the menu.

Audio Out format

If you have a Home Theatre System (HTS) with multichannel sound processing capabilities like Dolby Digital, DTS® or similar, set the Audio out format to Multichannel. With Multichannel, the TV can send the compressed multichannel sound signal from a TV channel or connected player to the Home Theatre System. If you have a Home Theatre System without multichannel sound processing, select Stereo.

To set the Audio Out format . . .
1. Press ‒ and select Setup and press OK.
2. Select TV settings > Sound > Advanced > Audio out format.
3. Select Multichannel or Stereo.
4. Press , repeatedly if necessary, to close the menu.

Audio Out levelling

Use the Audio Out leveling setting to level the volume (loudness) of the TV and the Home Theatre System when you switch over from one to another. Volume differences can be caused by differences in sound processing.

To level the difference in volume . . .
1. Press ‒ and select Setup and press OK.
2. Select TV settings > Sound > Advanced > Audio out format.
3. Select More. If the volume difference is small, select Less.
4. Press , repeatedly if necessary, to close the menu.

Audio Out levelling affects both the Audio Out - Optical and HDMI ARC sound signals.

Problems with HTS sound

Sound with loud noise

If you watch a video from a plugged in USB flash drive or connected computer, the sound from your Home Theatre System might be distorted.

To set the volume level . . .
1. Press ‒ and select Setup and press OK.
2. Select TV settings > Sound > Advanced > Audio out format.
4. Press , repeatedly if necessary, to close the menu.

Audio Out offset

If you cannot set the volume level, you can set a delay on the Home Theatre System.

To switch off the Audio Out delay . . .
1. Press ‒ and select Setup and press OK.
2. Select TV settings > Sound > Advanced > Audio out delay.
3. Select Off and press OK.
4. Press , repeatedly if necessary, to close the menu.

Audio Out format

If you have a Home Theatre System (HTS) with multichannel sound processing capabilities like Dolby Digital, DTS® or similar, set the Audio out format to Multichannel. With Multichannel, the TV can send the compressed multichannel sound signal from a TV channel or connected player to the Home Theatre System. If you have a Home Theatre System without multichannel sound processing, select Stereo.

To set the Audio Out format . . .
1. Press ‒ and select Setup and press OK.
2. Select TV settings > Sound > Advanced > Audio out format.
3. Select Multichannel or Stereo.
4. Press , repeatedly if necessary, to close the menu.

Audio Out levelling

Use the Audio Out leveling setting to level the volume (loudness) of the TV and the Home Theatre System when you switch over from one to another. Volume differences can be caused by differences in sound processing.

To level the difference in volume . . .
1. Press ‒ and select Setup and press OK.
2. Select TV settings > Sound > Advanced > Audio out format.
3. Select More. If the volume difference is small, select Less.
4. Press , repeatedly if necessary, to close the menu.

Audio Out levelling affects both the Audio Out - Optical and HDMI ARC sound signals.
3.7 Blu-ray Disc player

Use a High speed HDMI cable to connect the Blu-ray Disc player to the TV.

If the Blu-ray Disc player has EasyLink HDMI CEC, you can operate the player with the TV remote control.

3.8 DVD player

Use an HDMI cable to connect the DVD player to the TV. Alternatively, you can use a SCART cable, if the device has no HDMI connection.

If the DVD player is connected with HDMI and has EasyLink CEC, you can operate the player with the TV remote control.

3.9 Game console

For best quality, connect the game console with an High speed HDMI cable to the TV

If you connect a USB Hard Drive, you can pause or record a TV broadcast. The TV broadcast must be a digital broadcast (DVB broadcast or similar).

To pause

To pause a broadcast, you need a USB 2.0 compatible Hard Drive with a minimum of 32GB disc space.

To record

To pause and record a broadcast, you need a minimum of 250GB disc space.

TV guide

Before you decide to buy a USB Hard Drive to record, you can check if you can record digital TV channels in your country.

Press TV GUIDE on the remote control. If there is a Record button on the TV guide page, you can record.
Installation

Before you can pause or record a broadcast, you must connect and format a USB Hard Drive.

1. Connect the USB Hard Drive to one of the USB connections on the TV. Do not connect another USB device to the other USB ports when formatting.

2. Switch on the USB Hard Drive and the TV.

3. When the TV is tuned to a digital TV channel, press (Pause). Trying to pause will start the formatting. Follow the instructions on screen.

When the USB Hard Drive is formatted, leave it connected permanently.

Warning

The USB Hard Drive is formatted exclusively for this TV, you cannot use the stored recordings on another TV or PC. Do not copy or change recording files on the USB Hard Drive with any PC application. This will corrupt your recordings. When you format another USB Hard Drive, the content on the former will be lost. A USB Hard Drive installed on your TV will need reformatting for use with a computer.

3.11 USB flash drive

You can view photos or play your music and videos from a connected USB flash drive.

Insert a USB flash drive in one of the USB connections on the TV while the TV is switched on.

The TV detects the flash drive and opens a list showing its content.

If the contents list does not appear automatically, press SOURCE, select USB and press OK.

3.12 Camcorder

HDMI

For best quality, use an HDMI cable to connect the camcorder to the TV.

3.13 Computer

Connect

You can connect your computer to the TV and use the TV as a PC monitor.

With HDMI

Use an HDMI cable to connect the computer to the TV.

With DVI to HDMI

Alternatively, you can use a DVI to HDMI adapter to connect the PC to HDMI and an audio L/R cable (mini-jack 3.5mm) to AUDIO IN L/R on the back of the TV.

Settings

Ideal monitor setting

If your computer is added as a Computer type of device in the Source menu (the list of connections), the TV is set to the ideal Computer setting automatically.

If you use your computer to watch movies or use it to play games, you might want to set the TV back to the
ideal TV watching or gaming setting.

To set the TV to the ideal setting manually . . .

1. Press ⬆ and select Setup and press OK.
2. Select TV settings > Picture > Advanced > Game or computer and press OK.
3. Select Game (for gaming) or select Computer (for watching a movie) and press OK.
4. Press ↩, repeatedly if necessary, to close the menu.

Remember to set the Game or computer setting back to Computer when you stop playing the game.

3.14

Headphones (For 4000, 4100, 4200, 6300 TV models)

You can connect a set of headphones to connection on the TV. The connection is a mini-jack 3.5mm. You can adjust the volume of the headphones separately.

To adjust the volume . . .

1. Press ⬆ and select Setup and press OK.
2. Select TV settings > Sound > Headphone volume and press OK.
3. Press ▲ (up) or ▼ (down) to adjust the volume.
4. Press ↩, repeatedly if necessary, to close the menu.
Switch on

4.1
On or Standby (For 4000, 5210 TV models)

Make sure you plugged in the mains power on the back of the TV before you switch on the TV.

If the red indicator light is off, press the power button on the side of the TV to put the TV in standby - the red indicator will light up.

With the TV in standby, press  on the remote control to switch the TV On.

Switch to standby

To switch the TV to standby, press  on the remote control.

Switch Off

To switch the TV Off, press the power button on the side of the TV. The red indicator light is off. The TV is still connected to the mains power but consumes a minimum of energy.

To switch off the TV completely, disconnect the power plug.

When disconnecting the power plug, always pull the power plug, never the cord. Ensure that you have full access to the power plug, power cord and outlet socket at all times.
Remote control

5.1 Key overview (For 4000, 4100, 4200, 5210 TV models)

Top

1. Standby / On
   To switch the TV On or back to Standby.

2. Playback keys
   - Play ►, to playback
   - Pause paused, to pause playback
   - Stop ■, to stop playback

Middle

1. SOURCES
   To open or close the Sources menu - the list of connected devices.

2. Colour keys
   The buttons function follow the on-screen instructions.

3. INFO

Bottom

1. Volume
   To adjust the volume level.

2. Number keys and text keypad
   To select a TV channel directly or to enter text.

3. SUBTITLE
   To switch subtitles on, off or Automatic.

4. Mute
   To mute the sound or to restore it.

5. Channel
   To switch to the next or previous channel in the channel list, to open the next or previous page in Text or start the next or previous chapter on a disc.

6. TEXT
   To open or close Text / Teletext.
5.2

IR sensor

The TV can receive commands from a remote control that uses IR (infrared) to send commands. If you use such a remote control, always make sure you point the remote control at the infrared sensor on the front of the TV.

5.3

Batteries

1. Slide the battery door in the direction shown by the arrow.
2. Replace the old batteries with 2 type AAA-LR03-1.5V batteries. Make sure the + and the - ends of the batteries line up correctly.
3. Reposition the battery door.
4. Slide it back until it clicks.

Remove the batteries if you are not using the remote control for a long time. Safely dispose of your old batteries according to the end of use directions.

5.4

Cleaning

Your remote control is treated with a scratch-resistant coating.

To clean the remote control, use a soft damp cloth. Never use substances such as alcohol, chemicals or household cleaners on the remote control.
TV channels

6.1 Watching TV channels

Switch channels (For 4000, 4100, 4200, 5210 TV models)

To watch TV channels, press \[\text{ }\]. The TV tunes to the TV channel you last watched.

Alternatively, press \[\text{ }\] to open the Home menu and select TV and press \[\text{ }\].

To switch channels, press \[\text{ }\] or \[\text{ }\]. If you know the channel number, type in the number with the number keys.

Press \[\text{ }\] after you entered the number to switch channel.

To switch back to the previously tuned channel, press \[\text{ }\].

To switch to a channel from a channel list

While watching a TV channel, press \[\text{ }\] to open the channel lists.

The channel list can have several pages with channels. To view the next or previous page, press \[\text{ }\] or \[\text{ }\]. To close the channel lists without switching channel, press \[\text{ }\] again.

Radio channels

If digital broadcasting is available, digital radio station are installed during installation. Switch to a radio channel just like you switch to a TV channel.

Channel list

View all channel list

1. While watching a TV channel, press \[\text{ }\] to open the channel list.
2. Press \[\text{ }\] to open Option menu.
3. Select List, then you can select All, Favourites, Radio, and New channels.

Rename channels

You can rename channels in the channel list.

1. Select the channel you want to rename in one of the channel lists.
2. Press \[\text{ }\] .
3. Select Rename and press \[\text{ }\].

Lock a channel

To prevent children from watching a channel or a programme, you can lock channels or lock age rated programmes.

Lock a channel

You can lock a channel to prevent children from watching it. To watch a locked channel you need to enter the Child lock code. You cannot lock programmes from connected devices.

To lock a channel . . .

1. While watching a TV channel, press \[\text{ }\] to open the Channel list.
2. In any list, select the channel you want to lock.
3. Press \[\text{ }\] and select Lock channel. In a channel list, a locked channel is marked with a lock \[\text{ }\].

To unlock a channel, select the locked channel in the channel list, press \[\text{ }\], then select Unlock channel. You will need to enter the Child lock code.

Parental rating

To prevent children from watching a programme not suitable for their age, you can use an age rating.

Some digital broadcasters have age rated their programmes. When the age rating of a programme is equal to or higher than the age you have set as age rating for your child, the programme will be locked. To watch a locked programme you must enter the child lock code. The parental age rating is set for all channels.

To set an age rating . . .
1. Press and select Setup and press OK.
2. Select Channel settings > Child lock > Parental rating and press OK.
3. Enter a 4-digit Child lock code. Enter a 4-digit Child lock code and confirm. Now you can set an age rating.
4. Set the age and press OK.
5. To switch off the parental age rating, select None as age setting.
The TV will ask for the code to unlock the programme. For some broadcasters/operators, the TV only locks programmes with a higher rating.

Set or change the lock code
To set the lock code or to change the current code . . .

1. Press and select Setup and press OK.
2. Select Channel settings > Child lock > Change code and press OK.
3. If a code is set already, enter the current Child lock code and then enter the new code twice.
The new code is set.

Forgotten your code?
To override and enter a new child lock code in case you forget it, enter 8888.

Picture format
If black bars appear on top and bottom or on both sides of the picture, you can adjust the picture format to a format that fills the screen.

To change the picture format . . .
1. While watching a TV channel, press to open the Picture format menu.
2. Select a format from the list and press OK.
The following format can be available according the picture on screen . . .
- Auto
  Adjust the picture format according to the input source.
- Super zoom
  Removes the black bars on the side of 4:3 broadcasts. The picture is adjusted to fit the screen.
- Movie expand 16:9
  Scale 4:3 format to 16:9. Not recommended for HD or PC.
- Wide screen
  Stretches the picture to a 16:9 format.
- Unscaled
  Expert mode for HD or PC input. Pixel for pixel display. Black bars may appear with pictures from a computer.
- 4:3
  Display the classic 4:3 format.

Text / Teletext
Text pages (For 4000, 4100, 4200, 5210 TV models)

To open Text (Teletext) while you are watching TV channels, press TEXT.

To close Text, press TEXT again.

Select a Text page
To select a page . . .
1. Enter the page number with the number keys.
2. Use the arrow keys to navigate.
3. Press a colour key to select a colour-coded subject at the bottom of the screen.

Text sub-pages
A Text page number can hold several subpages. The subpage numbers are shown on a bar next to the main page number.
To select a subpage, press or .

T.O.P. Text pages
Some broadcasters offer T.O.P. Text.

Favourite pages
The TV makes a list of the last 10 Text pages you opened. You can easily reopen them again in the Favourite Text pages column.
1. In Text, select the star in the top left corner of the screen to show the column of favourite pages.
2. Press (down) or (up) to select a page number and press OK to open the page.
You can clear the list with the option Clear favourite pages.

Search Text
You can select a word and scan Text for all
occurrences of this word.
1. Open a Text page and press OK.
2. Select a word or number with the arrow keys.
3. Press OK again to jump immediately to the next occurrence of this word or number.
4. Press OK again to jump to the subsequent occurrence.
5. To stop searching, press ▲ (up) until nothing is selected.

Text from a connected device
Some devices that receive TV channels can also offer Text.
To open Text from a connected device . . .
1. Press ▽, select the device and press OK.
2. While watching a channel on the device, press OPTIONS, select Show device keys and select the ▼ key and press OK.
3. Press ▼ to hide the device keys.
4. To close Text, press ▼ again.

Digital Text (UK only)
Some digital broadcasters offer dedicated Digital Text or interactive TV on their digital TV channels. This includes normal Text using the number, colour and arrow keys to select and navigate.
To close Digital Text, press ▼.

Text setup

Text language
Some digital TV broadcasters have several Text languages available.
To set your primary and secondary Text language . . .
1. Press ▽ and select Setup and press OK.
2. Select Channel settings > Languages.
3. Select Primary Teletext or Secondary Teletext.
4. Select your preferred Text languages.
5. Press ▼, repeatedly if necessary, to close the menu.

Text 2.5
If available, Text 2.5 offers more colours and better graphics. Text 2.5 is activated as a standard factory setting.
To switch off Text 2.5 . . .
1. Press TEXT.
2. While watching the teletext, press OPTIONS.
3. Select Text 2.5 > Off.
4. Press ▼, repeatedly if necessary, to close the menu.

Subtitles and languages

Subtitles (For 4000, 4100, 4200, 5210 TV models)

Switch subtitles on
To open the Subtitle menu, press SUBTITLE.
You can set subtitles to Subtitles off, Subtitles on, or Automatic.
To show subtitles when the broadcasted programme is not in your language — the language you set for the TV, select Automatic. Also, this setting will show subtitles when you mute the sound with ▼.
For analogue channels, subtitles must be made available in Text.

Subtitles for digital channels
There is no need to set subtitles in Text for digital channels.
Digital channels can offer several subtitle languages for a programme. You can set a preferred primary and secondary subtitle language. If subtitles in one of these languages are available, the TV will show them.
If none of the preferred subtitle languages are available, you can select another subtitle language which is available.

To set the primary and secondary subtitle language . . .
1. Press \ and select Setup and press OK.
2. Select Channel settings and select Languages.
3. Select Primary subtitle language or Secondary subtitle language and press OK.
4. Select a language and press OK.
5. Press \, repeatedly if necessary, to close the menu.

To select a subtitle language when none of your preferred languages are available . . .
1. Press \ OPTIONS \.
2. Select Subtitle language and select a language you want temporarily and press OK.

Subtitles for analogue channels
For analogue channels, you need to make the subtitles available for each channel manually.
1. Switch to a channel and press TEXT to open Text.
2. Enter the page number for subtitles, usually 888.
3. Press TEXT again, to close Text.

If you select On in the Subtitle menu when watching this analogue channel, subtitles will be shown if available.

To know if a channel is analogue or digital, switch to the channel and open Status in the Options menu.

Audio languages
Digital TV channels can broadcast audio with several spoken languages for a programme. You can set a preferred primary and secondary audio language. If audio in one of these languages is available, the TV will switch to this audio.

If none of the preferred audio languages is available, you can select another audio language which is available.

To set the primary and secondary audio language . . .
1. Press \ and select Setup and press OK.
2. Select Channel settings and select Languages.
3. Select Primary audio language or Secondary audio language and press OK.
4. Select a language and press OK.
5. Press \, repeatedly if necessary, to close the menu.

To select an audio language when none of your preferred audio language is available . . .
1. Press \ OPTIONS \.
2. Select Audio language and select an audio language you want temporarily and press OK.

Audio languages for the hearing and visually impaired
Some digital TV channels broadcast special audio and subtitles adapted for people who are hearing or visually impaired.

Menu language
To change the language or the TV menus and messages . . .
1. Press \ and select Setup and press OK.
2. Select TV settings > General settings > Menu language and press OK.
3. Select the language you want and press OK.
4. Press \, repeatedly if necessary, to close the menu.

6.2 Channel installation
Update channels
Automatic update
If you receive digital channels, you can set the TV to automatically update the list with new channels. Alternatively, you can start a channel update yourself.

Automatic channel update
Once a day, at 6 AM, the TV updates the channels and stores new channels. New channels are stored in the All channels list but also in the New channels list. Empty channels are removed.
If new channels are found or if channels are updated or removed, a message is shown at TV start up. The TV must be in standby to automatically update channels.

To switch off the message at start up . . .
1. Press \ and select Setup and press OK.
2. Select Channel settings and press OK.

To switch off the Automatic channel update . . .
1. Press \ and select Setup and press OK.
2. Select Channel settings and press OK.

Start an update
To start an update yourself . . .
1. Press \ and select Setup and press OK.
2. Select Search for channels and press OK.
3. Select Update channels and follow the instructions on screen. The update may take a few minutes.
In certain countries, the Automatic channel update is done while watching TV or any moment when the TV is in standby.

**New channels**

New channels added with the automatic channel update are easy to find in the channel list **New**. The same new channels are also stored in the **All** or **Radio** channel list.

New channels are kept in the channel list **New** as long as you don’t mark them as a favourite or tune to them.

**Reinstall channels**

You can search for and reinstall channels and leave all other TV settings untouched. Alternatively, you can do a full new TV installation.

If a child lock code is set, you will need to enter this code before you can reinstall channels.

**Reinstall channels**

To reinstall the channels only . . .

1. Press TV button and select **Setup** and press **OK**.
2. Select **Search for channels** > **Re-install Channels** and press **OK**.
3. Select the country where you install the TV.
4. Select **Antenna (DVB-T)** or **Cable (DVB-C)**. The channel search may take a few minutes. Follow the instructions on screen.

**Full installation**

To redo a full TV installation . . .

1. Switch on the TV which has its channels installed. Plug in a USB memory device.
2. Press TV button and select **Setup** and press **OK**.
3. Select **TV settings** > **General settings** > **Copy channel list** > **Copy to USB** and press **OK**. To copy the channel list from this TV, you might be asked to enter the Child lock code you entered during the installation.
4. When copying is done, unplug the USB memory device.

Now you can upload the copied channel list onto another Philips TV.

**Factory settings**

Factory settings sets the TV back to the original TV settings for picture and sound. To switch back to the original Factory settings . . .

1. Press TV button and select **Setup** and press **OK**.
2. Select **TV settings** > **General settings** > **Factory settings** and press **OK**.
3. Press **OK** to confirm.
4. Press repeatedly if necessary, to close the menu.

---

**Channel list copy**

**Introduction**

Channel list copy is intended for dealers and expert users. In some countries, Channel list copy is only available for copying satellite channels.

With Channel list copy, you can copy the channels installed on one TV onto another Philips TV of the same range. With Channel list copy, you avoid the time-consuming channel search by uploading a predefined channel list on a TV. Use a USB flash drive of minimum 1 GB.

**Conditions**

- Both TVs are from the same year range.
- Both TVs have the same hardware type. Check the hardware type on the TV type plate on the back of the TV. Typically noted as Q . . . LA
- Both TVs have compatible software versions.

**Current version**

You can check the current version of the TV software with Current software info in

- **Setup** > **Software settings**.

**Copy channel list**

To copy a channel list . . .

1. Switch on the TV which has its channels installed. Plug in a USB memory device.
2. Press TV button and select **Setup** and press **OK**.
3. Select **TV settings** > **General settings** > **Copy channel list** > **Copy to USB** and press **OK**. To copy the channel list from this TV, you might be asked to enter the Child lock code you entered during the installation.
4. When copying is done, unplug the USB memory device.

Now you can upload the copied channel list onto another Philips TV.

**Upload channel list**

**Upload a copied channel list**

Depending on whether your TV is already installed or not, you must use a different way to upload a channel list.

**To a TV that is not yet installed**

1. Plug in the power plug to start the installation and select language and country. You can skip Search for channels. Finish the installation.
2. Plug in the USB memory device that holds the channel list of the other TV.
3. To start the channel list upload, press 🔄 and select SETUP and press OK.
4. Select TV settings > General settings > Copy channel list > Copy to TV and press OK. You might be asked to enter the Child lock code of this TV.
5. The TV notifies you if the channel list is copied to the TV successfully. Unplug the USB memory device.

To an already installed TV
1. Verify the country setting of the TV. (To verify this setting, press 🔄 and select SETUP and press OK. Select Search for channels > Reinstall channels and press OK. Press ➤ and later Cancel to leave the Search for channels.)
If the country is correct continue with step 2.
If the country is not correct, you need to start a reinstallation. To start the reinstallation, press 🔄 and select SETUP and press OK. Select TV settings > General settings > Re-install TV > OK. Select the correct country and skip the Search for channels. Finish the installation. When done, continue with step 2.
2. Plug in the USB memory device that holds the channel list of the other TV.
3. To start the channel list upload, press 🔄 and select SETUP and press OK.
4. Select TV settings > General settings > Copy channel list > Copy to TV and press OK. You might be asked to enter the Child lock code of this TV.
5. The TV notifies you if the channel list is copied to the TV successfully. Unplug the USB memory device.

DVB-T or DVB-C
DVB-T or DVB-C reception
If both DVB-T and DVB-C reception is available in your country and if this TV is ready to receive DVB-T and DVB-C for your country, you have selected one or the other during the channel installation.

If you want to change the DVB setting to start a new channel installation . . .
1. Press 🔄 and select SETUP and press OK.
2. Select Channel settings and press OK.
3. Select Channel installation > Antenna connection > Antenna (DVB-T) or Cable (DVB-C) and press OK.
4. Select the DVB setting you want.
5. Press ➤, repeatedly if necessary, to close the menu.

DVB-C channel installation
For ease of use, all DVB-C settings are set to automatic.
If your DVB-C provider gave you specific DVB-C values, the network ID or network frequency, enter these values when the TV asks for them during installation.

It might be necessary to adjust the scanning (full or quick scan) or enter a specific symbol rate in the Settings menu while installing. To set a Symbol rate, first set the Symbol rate to Manual.

Channel number conflicts
In some countries, different TV channels (broadcasters) might have the same channel number. While installing, the TV shows the list with channel number conflicts. You need to select which TV channel you want to install on a channel number with multiple TV channels.

DVB-T + DVB-C
If you can use a DVB-T antenna input but also a DVB-C input, you can set up your TV for both DVB-T and DVB-C. Install one system followed by the other with the necessary settings.
Once each system is installed, you need to switch the antenna input signal on the Antenna connection on the back of the TV and set the TV in the appropriate system to view the installed channels on TV.
To select the DVB-T or DVB-C setting, see above.

DVB settings
Access DVB settings
1. Press 🔄 and select SETUP and press OK.
2. Select Search for channels and press OK.
3. Select Re-install Channels.
4. Select the country where you install this TV.
5. Select Cable (DVB-C).
6. Select Start to search channels, or select Settings for DVB-C settings.
7. Press ➤, repeatedly if necessary, to close the menu.

Symbol rate mode
If your cable provider did not give you a specific symbol rate value to install the TV channels, leave the Symbol rate mode setting on Automatic.
If you received a specific symbol rate value, select Manual. However, the value you received could be in the predefined list of symbol rates already. Select Predefined symbol rates to check if your value is available automatically.

Symbol rate
With the Symbol rate mode set to Manual, you can enter the symbol rate value you received from your cable provider. To enter the value, use the number keys.
Network frequency

With Frequency scan set to Quick or Advanced, you can enter here the network frequency value received from your cable provider. To enter the value, use the number keys.

Frequency scan

Select the method of searching for channels. You can select the faster Quick scan method and use the predefined settings used by most cable providers in your country.

If this results in having no channels installed or if some channels are missing, you can select the extended Full scan method. This method will take more time to search for and install channels.

Network ID

With Frequency scan set to Quick, you can enter here the network ID value received from your cable provider. To enter the value, use the number keys.

Digital channels

If you know your cable provider is not offering digital channels, you can skip searching for digital channels. Select Off.

Analogue channels

If you know your cable provider is not offering analogue channels, you can skip searching for analogue channels. Select Off.

Free / Scrambled

If you have a subscription and a CAM - Conditional Access Module for pay TV services, select Free + scrambled. If you did not subscribe to pay TV channels or services, you can select Free channels only.

Manual installation

Analogue TV channels can be manually installed, channel by channel.

To install analogue channels manually . . .
1. Press Å and select Setup and press OK.
2. Select Channel settings > Channel installation > Analogue : manual installation and press OK.
   - System
TV guide

7.1 Using the TV guide

What you need

With the TV guide you can view a list of the current and scheduled TV programmes of your channels. Depending on where the TV guide information (data) is coming from, analogue and digital channels or only digital channels are shown. Not all channels offer TV guide information.

The TV can collect TV guide information for the channels that are installed on the TV (e.g. the channels you watch with Watch TV). The TV cannot collect the TV guide information for channels viewed from a digital receiver.

Open the TV guide

To open the TV guide, press TV GUIDE . Press TV GUIDE again to close.

The first time you open the TV guide, the TV scans all TV channels for programme information. This may take several minutes. TV guide data is stored in the TV.

Switch to a programme

From the TV guide, you can switch to a current programme.
To select a programme, use the arrow keys to highlight the programme name. Navigate to the right to view programmes scheduled later that day.
To switch to the programme (channel), select the programme and press OK.

View programme details

To call up the details of the selected programme, press INFO .

Change day

The TV guide can show scheduled programmes for the upcoming days (maximum up to 8 days).
If the TV guide information comes from the broadcaster, you can press + to view the schedule of one of the next days. Press – to go back to the previous day. Alternatively, you can press OPTIONS and select Change day. Select Previous day, Today or Next day and press OK, to select the day of the schedule.

Search by genre

If the information is available, you can look up scheduled programmes by genre like movies, sports, etc.
To search for programmes by genre, press OPTIONS and select Search by genre. Select a genre and press OK. A list with the found programmes appears.

7.2 Recordings

From the TV guide, you can instantly record or schedule a recording of a TV programme. To store the recordings, connect a USB Hard Drive to the TV.

7.3 Receiving TV guide data

In some regions and for some channels, TV guide information might not be available. The TV can collect TV guide information for the channels that are installed on the TV (e.g. the channels you watch with Watch TV). The TV cannot collect the TV guide information from channels viewed from a digital receiver or decoder.

The TV comes with the information set to From the broadcaster.

Set the TV guide information

To set the TV guide information . . .
1. Press and select TV guide.
2. Press key.
3. Select From the broadcaster.
4. Press repeatedly if necessary, to close the menu.
8

Sources

8.1

Sources list

In the list of connections - the Source menu - you can find the devices connected to the TV. From this Source menu, you can switch to a device.

Sources menu

To open the Sources menu, press SOURCES. To switch to a connected device, select the device with the arrows (left) or (right) and press OK. To close the Source menu without switching to a device, press SOURCES again.

8.2

From standby

With the TV in standby, you can switch on a connected device with your TV remote control.

Play

To switch on both disc player and TV from standby and start playing the disc or programme immediately, press (play) on the TV remote control. The device should be connected with an HDMI cable and both TV and device must have HDMI CEC switched on.

Home Theatre System

You can switch on your Home Theatre System to listen to an audio disc or a radio channel and leave the TV in standby. To only switch on the HTS, with the TV in standby, press SOURCES on the TV remote control.

8.3

EasyLink

With EasyLink you can operate a connected device with the TV remote control. EasyLink uses HDMI CEC to communicate with the connected devices. Devices must support HDMI CEC and must be connected with an HDMI connection.
9

Timers and clock

9.1

Sleep timer

With the sleep timer, you can set the TV to switch to standby automatically after a preset time.

To set the sleep timer . . .

1. Press 🏢 and select Setup and press OK.
2. Select TV settings > General settings > Sleep timer. With the slider bar you can set the time to up to 180 minutes in increments of 5 minutes. If set to 0 minutes, the sleep timer is switched off. You can always switch off your TV earlier or reset the time during the countdown.
3. Press ↩, repeatedly if necessary, to close the menu.

9.2

Clock

To know what time it is, press TV GUIDE to find the time in the TV guide.

In some countries, digital broadcasts do not send UTC - Coordinated Universal Time information. The daylight saving change might be ignored and the TV might show an incorrect time.

To correct the TV clock . . .

1. Press 🏢 and select Setup and press OK.
2. Select TV settings > General settings > Clock > Auto clock mode and select Country dependent.
3. Select Daylight saving and select the appropriate setting.

9.3

Auto switch off

If you do not press a key on the remote control during a 4 hour period, or if the TV receives no input signal nor remote control commands for 10 minutes, the TV switches off automatically to save energy.

If you use the TV as a monitor or use a digital receiver to watch TV (a Set-top box - STB) and you do not use the remote control of the TV, you should deactivate the automatic switch off.

To deactivate the Auto switch off . . .

1. Press 🏢 and select Setup and press OK.
2. Select TV settings > General settings > Auto switch off and set the slider bar to 0 (Off).
3. Press ↩, repeatedly if necessary, to close the menu.
Your photos, videos and music

From a USB connection

What you need

You can view your photos or play your music and videos from a connected USB flash drive or USB Hard Drive.

From a USB device

With the TV switched on, plug in a USB flash drive or USB Hard Drive to one of the USB connections. The TV detects the device and lists your files. If the list does not appear automatically, press SOURCES, select Browse USB and press OK.

Menu bar

With a USB device connected, the TV sorts the files by type. Navigate to the menu bar and select the type of file you are looking for. If you browse files from a computer, you can only browse the files and folders as they are organized on the computer.

The menu bar

Navigate to the menu bar and select the type of file you want to watch or play. Select Picture, Music or Movie. Alternatively, you can open the Folders view and browse your folders to look for a file.

View photos

In the USB browser, select Picture and press OK.

Options

Press OPTIONS.
- Start slideshow, Stop slideshow
  Start or stop slideshow.
- Slideshow transitions
  Set the transition from one picture to the next.
- Slideshow frequency
  Select the display time for each photo.
- Repeat, Play once
  View the pictures repeatedly or once only.
- Shuffle off, Shuffle on
  View the pictures in sequential order, or at random.
- Rotate image
  Rotate photo.
- Show info
  Display the picture name, date, size and next picture in the slide show.

To close Browse USB, press and select another activity.

Play music

In the USB browser, select Music and press OK.

Options

Press OPTIONS.
- Stop playback
  Stop music play.
- Repeat, Play once
  Play songs repeatedly or once.
- Shuffle on, Shuffle off
  Play songs in sequence or at random.
- Show info
  Display the file name.

To close Browse USB, press and select another activity.

Play videos

In the USB browser, select Movie and press OK.

Options

Press OPTIONS.
- Subtitles
  Display the subtitles if available.
- Audio language
  Play the audio language if available.
- Repeat, Play once
  Play videos repeatedly or once.
- Shuffle on, Shuffle off
  Play videos in sequence or at random.
- Show info
  Display the file name.
To close **Browse USB**, press ⬆️ and select another activity.
Pause TV

11.1

Pause TV

You can pause a TV broadcast and resume watching it later. Only digital TV channels can be paused. You must connect a USB Hard Drive to buffer the broadcast. You can pause a broadcast for a maximum time span of 90 minutes.

Pause or resume a broadcast

To pause a broadcast, press (Pause). A progress bar appears briefly on screen. To call up the progress bar, press (Pause) again. To resume watching, press (Play). The icon on screen indicates you are watching a paused broadcast.

Back to the actual TV broadcast

To switch back to the actual TV broadcast, press (Stop).

The moment you switch to a digital channel, the USB Hard Drive starts buffering the broadcast. When you switch to another digital channel, the broadcast of the new channel is buffered and the broadcast of the former channel is cleared. When you switch to a connected device (a Blu-ray Disc player or digital receiver) the USB Hard Drive stops buffering and the broadcast is cleared. Also when you switch the TV to standby the broadcast is cleared.

Whilst recording a programme on the USB Hard Drive, you cannot pause a broadcast.

Instant replay

Whilst watching a broadcast from a digital TV channel, you can easily instant replay the broadcast. To replay the last 10 seconds of a broadcast, press (Pause) and press (Left). You can press (Left) repeatedly until you reach the start of the broadcast buffer or the maximum time span.

Progress bar

With the progress bar on screen, press (Rewind) or press (Forward) to select from where you want to start viewing the paused broadcast. Press these keys repeatedly to change speed.
12 Recording

12.1 What you need

To record a TV programme you need . . .
- a connected USB Hard Drive formatted on this TV
- digital TV channels installed on this TV (the channels you watch with Watch TV)
- to receive channel information for the built-in TV guide

12.2 Record a programme

Record now

To record the programme you are watching, press (Record) on the remote control.

If you receive TV guide information from the broadcaster, the recording starts immediately. You can adjust the end time of the recording in the list of recordings.

To stop recording, press (Stop).

Schedule a recording

You can schedule a recording of an upcoming programme for today or a few days from today (maximum of 8 days away).
1. To schedule a recording, press TV Guide. On the TV guide page, select the channel and programme you wish to record.
You can enter the channel number to jump to the channel in the list.
Press (Right) or (Left) to scroll through the programmes of a channel.
To change the date of the list, press OPTIONS and select Change day. In the list, select the day you want and press OK.

2. With the programme highlighted, press Record. The TV adds some time buffer at the end of the programme. You can add some extra buffer if needed.

If you plan to record a programme in your absence, remember to leave the TV switched to standby and the USB Hard Drive switched on.

12.3 Watch a recording

To watch a recording . . .
1. Press , select Recordings and press OK.
2. In the list, select the recording and press (Play) to start the playback. You can use the (Forward), (Rewind), (Pause) or (Stop) keys on the remote control.

Failed recording

When a scheduled recording was prevented by the broadcaster or when the broadcast was interrupted, a recording is marked as Failed.

List of recordings

To view the list of recordings and scheduled recordings, press , select Recordings and press OK.

In this list, you can select a recording to watch, remove recorded programmes, adjust the end time of an ongoing recording or check the free disc space.

Remove a scheduled recording from TV Guide or the list of recordings
- Press List to open the list, then press .
- In TV Guide, select a scheduled recording programme, then press Cancel recording.

Specifics

- While recording a programme, you can watch a previously recorded programme.
- While recording, you cannot switch TV channels.
- While recording, you cannot pause the TV broadcast.
- To Record, broadcasters need a reliable clock setting. If you reset the TV clock manually, recordings may fail.
13.1 Picture

Picture style

For easy picture adjustment, you can select a preset setting with Picture style.

1. While watching a TV channel, press OPTIONS to open the Options menu.
2. Select Picture and sound in the menu bar and select Picture style.
3. Select a style and press OK.

The available Picture styles are . . .
- Personal - Your preferences made in Quick picture settings
- Vivid - Ideal for daylight viewing
- Natural - Natural picture settings
- Movie - Ideal for watching movies
- Energy saving - Energy-efficient settings
- Standard - Factory standard settings
- Photo - Ideal for viewing photos

Adjust a Picture style

You can adjust a Picture style . . .
1. Select the style and press OK.
2. Press (right) and select Setup and press OK.
3. Select TV settings, navigate to the individual setting and adjust it.
4. Press , repeatedly if necessary, to close the menu.

To return to the original Picture style values . . .
1. Press (right) and select Setup and press OK.
2. Select TV settings > Picture > Picture style and select the style you want to reset.
3. Select Restore style and press OK. The style is reset.

Vivid

If the Picture style is switched back to Vivid every time you switch on the TV, the TV location is set to Shop. A setting meant for in-store promotion.

To set the TV for Home use . . .
1. Press (right) and select Setup and press OK.
2. Select TV settings > General settings > Location and press OK.
3. Select Home and press OK.
4. Press , repeatedly if necessary, to close the menu.

Picture settings

Backlight contrast

With Backlight contrast, you can adjust the brightness of the display backlight.

To adjust the level . . .
1. Press (right) and select Setup and press OK.
2. Select TV settings > Picture > Backlight contrast.
3. Press (right) and adjust the value with (up) or (down).
4. Press , repeatedly if necessary, to close the menu.

Colour

With Colour, you can adjust the colour saturation of the picture.

To adjust the colour . . .
1. Press (right) and select Setup and press OK.
2. Select TV settings > Picture > Colour.
3. Press (right) and adjust the value with (up) or (down).
4. Press , repeatedly if necessary, to close the menu.

Sharpness

With Sharpness, you can adjust the level of sharpness in fine detail of the picture.

To adjust the sharpness . . .
1. Press (right) and select Setup and press OK.
2. Select TV settings > Picture > Sharpness.
3. Press (right) and adjust the value with (up) or (down).
4. Press , repeatedly if necessary, to close the menu.

Noise reduction

With Noise reduction, you can select the amount of noise reduction for the picture.

To set the noise reduction . . .
1. Press (right) and select Setup and press OK.
2. Select TV settings > Picture > Noise reduction.
3. Press (right) and select Off, Minimum, Medium or Maximum.
4. Press , repeatedly if necessary, to close the menu.
MPEG artefact reduction

With **MPEG artefact reduction**, you can smoothen the digital transitions in the picture. MPEG artefacts are mostly visible as small blocks or jagged edges in images.

To reduce the MPEG artefact . . .
1. Press \( \text{\textarrow{1}} \) and select **Setup** and press **OK**.
2. Select **TV settings > Picture > MPEG artefact reduction**.
3. Press \( \text{\textarrow{2}} \) (right) and select **On** or **Off**.
4. Press \( \text{\textarrow{3}} \), repeatedly if necessary, to close the menu.

Digital Crystal Clear

With **Digital Crystal Clear**, you can fine-tune each pixel to match the surrounding pixels and produce a brilliant, high-definition image.

1. Press \( \text{\textarrow{1}} \) and select **Setup** and press **OK**.
2. Select **TV settings > Picture > Digital Crystal Clear**.

The different settings are . . .
- **Advanced sharpness** - Enable superior sharpness, especially on lines and contours in the picture.
- **Dynamic contrast** - Dynamically enhance the details in the dark, medium and light areas of the picture.
- **Dynamic backlight** - Select a backlight level to optimise dynamic power consumption and picture contrast.
- **Colour enhancement** - Dynamically enhance the vividness and details of colours.

Advanced picture settings

**Gamma**

With **Gamma**, you can adjust the non-linear setting for picture luminance and contrast.

To adjust the level . . .
1. Press \( \text{\textarrow{1}} \) and select **Setup** and press **OK**.
2. Select **TV settings > Picture > Advanced > Gamma**.
3. Press \( \text{\textarrow{1}} \) (right) and adjust the value with \( \text{\textarrow{1}} \) (up) or \( \text{\textarrow{1}} \) (down).
4. Press \( \text{\textarrow{3}} \), repeatedly if necessary, to close the menu.

Tint

With **Tint**, you can change the colour balance.

To select a preset . . .
1. Press \( \text{\textarrow{1}} \) and select **Setup** and press **OK**.
2. Select **TV settings > Picture > Advanced > Tint**.
3. Press \( \text{\textarrow{1}} \) (right) and select **Normal**, **Warm** or **Cool**. Select **Custom** if you want to set a colour temperature yourself.
4. Press \( \text{\textarrow{4}} \), repeatedly if necessary, to close the menu.

**Custom tint**

With **Custom tint**, you can set a colour temperature yourself. To set a Custom tint, first select **Custom** in the **Tint** setting to make the Custom tint menu available. Custom tint is a setting intended for expert users.

To set a custom colour temperature . . .
1. Press \( \text{\textarrow{1}} \) and select **Setup** and press **OK**.
2. Select **TV settings > Picture > Advanced > Custom tint**.
3. Press \( \text{\textarrow{1}} \) (right).
4. Select a setting with the arrow keys. (WP is white point and BL is black level.)
5. Press **OK** to confirm a setting. You can also select one of the presets in this menu.
6. Press \( \text{\textarrow{6}} \), repeatedly if necessary, to close the menu.

Video contrast

With **Video contrast**, you can decrease the range of the video contrast.

To adjust the level . . .
1. Press \( \text{\textarrow{1}} \) and select **Setup** and press **OK**.
2. Select **TV settings > Picture > Advanced > Video contrast**.
3. Press \( \text{\textarrow{1}} \) (right) and adjust the value with \( \text{\textarrow{1}} \) (up) or \( \text{\textarrow{1}} \) (down).
4. Press \( \text{\textarrow{4}} \), repeatedly if necessary, to close the menu.

Brightness

With **Brightness**, you can set the level of brightness of the picture signal. Brightness is a setting intended for expert users. We recommend non-expert users to adjust the brightness with the **Backlight contrast** setting.

To adjust the level . . .
1. Press \( \text{\textarrow{1}} \) and select **Setup** and press **OK**.
2. Select **TV**
settings > Picture > Advanced > Brightness.
3. Press (right) and adjust the value with (up) or (down).
4. Press , repeatedly if necessary, to close the menu.

13.2 Game or computer
You can switch the TV to the ideal picture setting for gaming or for using the TV as a computer monitor. There is a different setting for Game or Computer. If a device has a correct type set in the Source menu - Game console or Computer - the TV switches automatically to the ideal setting when you switch to the device. If you switch the setting manually, do not forget to switch it off when you switch to watching TV or another connected device.

To switch the setting manually . . .
1. Press and select Setup and press OK.
2. Select TV settings > Picture > Advanced > Activity style.
3. Select Game, Computer or TV. The setting TV returns to the picture settings for watching TV.
4. Press , repeatedly if necessary, to close the menu.

13.3 Format and edges

Picture format
If black bars appear on top and bottom or on both sides of the picture, you can adjust the picture format to a format that fills the screen.

To change the picture format . . .
1. While watching a TV channel, press to open the Picture format menu.
2. Select a format from the list and press OK.

Screen edges
With Screen edges, you can slightly enlarge the picture to hide distorted edges.

To adjust the edges . . .
1. Press and select Setup and press OK.
2. Select TV settings > Picture > Format and edges > Screen edges.
3. Press (right) and adjust the value with (up) or (down).
4. Press , repeatedly if necessary, to close the menu.

13.4 Sound

Sound style
For easy sound adjustment, you can select a preset setting with Sound style.

1. While watching a TV channel, press OPTIONS to open the Options menu.
2. Select Picture and sound in the menu bar and select Sound style.
3. Select a Sound style and press OK.

The different Sound styles are . . .
- Personal - Your personal choices made in Personalise picture and sound
- Original - Factory standard
- Movie - Ideal for watching movies
- News - Ideal for speech
- Music - Ideal for listening to music
- Game - Ideal for gaming

Adjust a Sound style
You can adjust a Sound style . . .
1. Select the style and press OK.
2. Press and select Setup and press OK.
3. Select TV settings, navigate to the individual setting and adjust it.
4. Press to close the menu to store your setting.

To return to the original Sound style values . . .
1. Press and select Setup and press OK.
2. Select TV settings > Sound > Restore style.

Sound settings

Bass
With Bass, you can adjust the level of low tones in the sound.

To adjust the level . . .
1. Press and select Setup and press OK.
2. Select TV settings > Sound > Bass.
3. Press (right) and adjust the value with (up) or (down).
4. Press , repeatedly if necessary, to close the menu.

Treble
With Treble, you can adjust the level of high tones in the sound.

To adjust the level . . .
1. Press  and select Setup and press OK.
2. Select TV settings > Sound > Treble.
3. Press ▶ (right) and adjust the value with ▲ (up) or ▼ (down).
4. Press  repeatedly if necessary, to close the menu.

Surround mode

With Surround mode, you can set the sound effect of the TV speakers.

To set the surround mode . . .
1. Press  and select Setup and press OK.
2. Select TV settings > Sound > Surround mode.
3. Press ▶ (right) and select Stereo, Incredible surround.
4. Press  repeatedly if necessary, to close the menu.

Headphones volume

With Headphones volume, you can set the volume of a connected headphones separately.

To adjust the volume . . .
1. Press  OPTIONS and select Picture and sound in the menu bar.
2. Press ▶ (right) and select Headphones volume and press OK.
3. Press ▲ (up) or ▼ (down) to adjust the volume.
4. Press  repeatedly if necessary, to close the menu.

Advanced sound settings

Auto volume levelling

With Auto volume levelling, you can set the TV to automatically level out sudden volume differences. Typically at the beginning of adverts or when you are switching channels.

To switch on or off . . .
1. Press  and select Setup and press OK.
2. Select TV settings > Sound > Advanced > Auto volume levelling.
3. Press ▶ (right) and select On or Off.
4. Press  repeatedly if necessary, to close the menu.

TV speakers

You can send the TV sound to a connected audio device – a Home Theatre System or audio system. With TV speakers, you select where you want to hear the TV sound and how you want to control it.
- If you select Off, you permanently switch off the TV speakers.
- If you select On, the TV speakers are always on.

With an audio device connected with HDMI CEC, you can use one of the EasyLink settings.
- If you select EasyLink, the TV sends the TV sound to the audio device. The TV will switch off the TV speakers when the device is playing the sound.
- If you select EasyLink autostart, the TV will switch on the audio device, send the TV sound to the device and switch off the TV speakers.
With EasyLink or EasyLink autostart selected, you can still switch to TV speakers or device speakers in the Picture and sound menu.

To set the TV speakers . . .
1. Press  and select Setup and press OK.
2. Select TV settings > Sound > Advanced > TV speakers.
3. Press ▶ (right) and select Off, On, EasyLink or EasyLink autostart.
4. Press  repeatedly if necessary, to close the menu.

To switch speakers directly . . .
1. While watching TV, press OPTIONS and select Picture and sound.
2. Select Speakers and select TV or Amplifier (audio device).
3. Press  repeatedly if necessary, to close the menu.

Clear sound

With Clear sound, you improve the sound for speech. Ideal for news programmes. You can switch the speech improvement on or off.

To switch on or off . . .
1. Press  and select Setup and press OK.
2. Select TV settings > Sound > Advanced > Clear sound.
3. Press ▶ (right) and select On or Off.
4. Press  repeatedly if necessary, to close the menu.

HDMI1-ARC

If you do not need an Audio Return Channel (ARC) on any of the HDMI connections, you can switch the ARC signal off.

Audio Out format

With Audio Out format you can set the audio out signal of the TV to fit the sound processing capabilities of your Home Theatre System.
Audio Out levelling

With Audio Out leveling you can level the sound volume of the Home Theatre System with the volume of the TV when you switch over from one to another.

Audio Out delay

If you set an Audio sync delay on your Home Theatre System, to synchronise the sound with the picture, you must switch off Audio Out delay on the TV.

Audio Out offset

If you cannot set a delay on the Home Theatre System, you can set a delay on the TV with Audio Out offset.

Speakers

Home Theatre System

You can send the TV sound to a connected audio device - a Home Theatre System or audio system.

You can select where you want to hear the TV sound and how you want to control it.

- If you select Off, you permanently switch off the TV speakers.
- If you select TV speakers, the TV speakers are always on.

With an audio device connected with HDMI CEC, you can use one of the EasyLink settings.

- If you select EasyLink, the TV sends the TV sound to the audio device. The TV will switch off the TV speakers when the device is playing the sound.
- If you select EasyLink autostart, the TV will switch on the audio device, send the TV sound to the device and switch off the TV speakers.

With EasyLink or EasyLink autostart selected, you can still switch to TV speakers if necessary.

To set the TV speakers . . .

1. Press and select Setup and press OK.
2. Select TV settings > Sound > Sound output.
3. Press (right) and select Off, TV speakers, EasyLink or EasyLink autostart.
4. Press , repeatedly if necessary, to close the menu.

To switch to speakers directly . . .

1. While watching TV, press .
2. Select Speakers and select TV or Amplifier (audio system).
3. Press , repeatedly if necessary, to close the menu.

13.5

Ambilight (For 6300 TV models)

Ambilight style

Ambilight can have a dynamic mode or a static mode. With Dynamic mode, the TV follows the colours of the image on screen.

With Static, Ambilight has a constant static colour. You can create an Ambilight static colour yourself.

To select an Ambilight mode . . .

1. Press and select Setup and press OK.
2. Select TV settings > Ambilight > Ambilight mode.
3. Select Dynamic or Static.
4. Press , repeatedly if necessary, to close the menu.

To select a static colour . . .

1. Press and select Setup and press OK.
2. Select TV settings > Ambilight > Ambilight mode.
3. Select Static and press OK.
4. Select the colour from the colour palette. Press OK to confirm.
5. Press , repeatedly if necessary, to close the menu.

Ambilight brightness

With Ambilight Brightness, you can set the level of brightness of the Ambilight.

To adjust the level . . .

1. Press and select Setup and press OK.
2. Select TV settings > Ambilight > Brightness.
3. Press OK and adjust the value with (up) or (down).
4. Press , repeatedly if necessary, to close the menu.
**Ambilight saturation**

With Ambilight **Saturation**, you can set the level of saturation of the Ambilight.

To adjust the level . . .

1. Press ▲ and select Setup and press OK.
2. Select TV settings > Ambilight > Saturation.
3. Press OK and adjust the value with ▲ (up) or ▼ (down).
4. Press  ▼, repeatedly if necessary, to close the menu.

**Dynamic speed**

With Dynamic, you can set the speed at which Ambilight responds to the images on screen. Adjust the speed between Relaxed or Dynamic. The Ambilight mode must be set to Dynamic before you can adjust Dynamic speed.

To adjust the speed . . .

1. Press ▲ and select Setup and press OK.
2. Select TV settings > Ambilight > Dynamic.
3. Press ▶ (right) and adjust the value with ▲ (up) or ▼ (down).
4. Press  ▼, repeatedly if necessary, to close the menu.

**Advanced Ambilight settings**

**Wall colour**

With **Wall colour**, you can neutralise the influence of a coloured wall on the Ambilight colours. Select the colour of the wall behind the TV and the TV will modify the Ambilight colours to appear as they are intended.

To select the colour of the wall . . .

1 - Press ▲ and select Setup and press OK.
2 - Select TV settings > Ambilight > Advanced > Wall colour.
3 - Select the colour sample that matches the colour of the wall behind the TV and press OK.
4 - Press  ▼, repeatedly if necessary, to close the menu.

**TV switch off**

With **TV switch off**, you can set Ambilight to switch off immediately or slowly fade out when you switch off the TV. The slow fade out gives you some time to switch on the lights in your living room.

To select the TV switch off . . .

1 - Press ▲ and select Setup and press OK.
Specifications

14.1 Environmental

Saving energy
The Eco settings bundle the settings that help the environment. While you are watching TV channels, press \( \text{Eco settings} \) to open Eco settings. Active settings are marked with a \( \text{Mark} \). You can mark or unmark each setting with the OK key. Press \( \text{Eco settings} \) again to close Eco settings.

Energy saving
This Picture style sets the picture, in the most ideal energy conscious setting.

Screen off
If you only listen to music, you can switch off the TV screen to save energy. Select Screen off and press OK. To switch the screen back on, press any key on the remote control.

Auto switch off
If you do not press a key on the remote control during a 4 hour period, or if the TV receives no signal for 10 minutes, the TV switches off automatically to save energy.
If you use the TV as a monitor or use a digital receiver to watch TV (a Set-top box - STB) and you do not use the remote control of the TV, deactivate the automatic switch off.
In addition to the Eco settings, your TV also has environmentally friendly technology with regard to power consumption.

Inactive devices off
Switch off connected EasyLink HDMI-CEC (Consumer Electronic Control) compliant devices that are inactive.

Power management
The advanced power management of this TV ensures the most efficient use of energy. You can check how your personal TV settings, the level of brightness in current onscreen pictures, and the surrounding light conditions determine the relative power consumption.
To check the relative power consumption . . .
1. Press \( \text{Mark} \) and select Setup and press OK.
2. Select Watch demos > Active control Demo and press OK.
3. Select a setting to check the corresponding values.

European energy label
The European Energy Label informs you on the energy efficiency class of this product. The greener the energy efficiency class of this product is, the lower the energy it consumes.
On the label, you can find the energy efficiency class, the average power consumption of this product in use and the average energy consumption for 1 year. You can also find the power consumption values for this product on the Philips website for your country at www.philips.com/TV

End of use
Disposal of your old product and batteries
Your product is designed and manufactured with high quality materials and components, which can be recycled and reused.

When this crossed-out wheeled bin symbol is attached to a product it means that the product is covered by the European Directive 2002/96/EC.

Please inform yourself about the local separate collection system for electrical and electronic products.
Please act according to your local rules and do not dispose of your old products with your normal household waste. Correct disposal of your old product helps to prevent potential negative consequences for the environment and human health.

Your product contains batteries covered by the European Directive 2006/66/EC, which cannot be disposed with normal household waste.

Please find out for yourself about the local rules on separate collection of batteries because correct disposal will help to prevent negative consequences for the environment and human health.

For PxK4000

TV Rear
- HDMI 1 ARC: HDMI Audio Return Channel
- HDMI 2
- SERV. U: Service port
- VGA: PC input
- SCART (RGB/CVBS): SCART adaptor
- AUDIO IN (DVI/VGA): Stereo 3.5mm mini-jack
- DIGITAL AUDIO OUT: SPDIF
- TV ANTENNA: 75 ohm coaxial (IEC)
- Satellite

TV Side
- CI: Common Interface
- USB
- Headphones: Stereo 3.5mm mini-jack

For PxH4000/PxT4000
TV Rear
- HDMI 1 ARC: HDMI Audio Return Channel
- HDMI 2
- SERV. U: Service port
- VGA: PC input
- SCART (RGB/CVBS): SCART adaptor
- AUDIO IN (DVI/VGA): Stereo 3.5mm mini-jack
- DIGITAL AUDIO OUT: SPDIF
- TV ANTENNA: 75 ohm coaxial (IEC)

TV Side
- CI: Common Interface
- USB
- Headphones: Stereo 3.5mm mini-jack

14.7
Sound
- Mono / Stereo
- Sound enhancement: Incredible Surround, Clear Sound
- Output power:
  Pxx4000: 6W (RMS @ 10% THD)
  Pxx5210: 10W (RMS @ 10% THD)
  Pxx4100/60: 10W (RMS @ 10% THD)
  Pxx4100/12: 16W (RMS @ 10% THD)
  Pxx4100/88: 16W (RMS @ 10% THD)
  Pxx4200: 16W (RMS @ 10% THD)
  Pxx6300: 20W (RMS @ 15% THD)

14.8
Multimedia
Note: Multimedia file names must not exceed 128 characters.
Supported multimedia connections
- USB 2.0 (FAT / FAT 32 / NTFS): only connect USB devices that consume 500 mA of power or less.
Supported image files
- JPEG: *.jpg, *.jpeg
- PNG: *.png, *.jpg
Supported audio files
- MPEG1: *.mp3
Supported video files
Supported subtitle format
- SRT: multiple language support
Software

15.1 Software update

Update from USB

It might be necessary to update the TV software. You need a computer and a USB memory device to upload the software on the TV. Use a USB memory device with 256MB free space. Make sure that write protection is switched off.

1. Start the update on TV
To start the software update...
Press \(\text{\textbullet}\), select Setup and press \(\text{OK}\).
Select Update software > USB and press \(\text{OK}\).

2. Identify the TV
Insert the USB memory into one of the USB connections of the TV.
Select Start and press \(\text{OK}\). An identification file is written on the USB memory device.

3. Download the TV software
Insert the USB memory into your computer.
On the USB memory device, locate the file update.htm and double click it.
Click on Send ID.
If new software is available, download the .zip file.
After the download, unzip the file and copy the file autorun.upg onto the USB memory device. Do not place this file in a folder.

4. Update the TV software
Insert the USB memory into the TV again. The update starts automatically.
The TV switches itself off for 10 seconds and then back on again. Please wait.
Do not...
- use the remote control
- remove the USB memory device from the TV
If a power cut occurs during the update, never remove the USB memory device from the TV. When the power returns, the update will continue.

15.2 Software version

To view the current TV software version...
1. Press \(\text{\textbullet}\) and select Setup and press \(\text{OK}\).
2. Select Software settings and press \(\text{OK}\).
4. Press \(\text{\textbullet}\), repeatedly if necessary, to close the menu.

15.3 Open source software

This television contains open source software. TP Vision Europe B.V. hereby offers to deliver, upon request, a copy of the complete corresponding source code for the copyrighted open source software packages used in this product for which such offer is requested by the respective licences.

This offer is valid up to three years after product purchase to anyone in receipt of this information.
To obtain the source code, please write in English to...

Intellectual Property Dept.
TP Vision Europe B.V.
Prins Bernhardplein 200
1097 JB Amsterdam
The Netherlands

15.4 Open source license

Open source license

Open source license statement

Acknowledgements and License Texts for any open source software used in this product.
This is a document describing the distribution of the source code used in this product, which fall either under the GNU General Public License (the GPL), or the GNU Lesser General Public License (the LGPL), or any other open source license.
Instructions to obtain source code for this software can be found in the documentation supplied with this product.

statutory rights regarding any product(s) you purchased. It only applies to this source code made available to you.

---

**libsqlite3 (3.7.14)**

SQLite is a C library that implements an SQL database engine. Programs that link with the SQLite library can have SQL database access without running a separate RDBMS process.

Source: http://linuxappfinder.com/package/libsqlite3-0

---

**libpng**

libpng is the official PNG reference library. It supports almost all PNG features.

Source: www.libpng.org

---

**OpenSSL (1.0.0.d)**

The OpenSSL Project is a collaborative effort to develop a robust, commercial-grade, full-featured, and Open Source toolkit implementing the Secure Sockets Layer (SSL v2/v3) and Transport Layer Security (TLS v1) protocols as well as a full-strength general purpose cryptography library. The project is managed by a worldwide community of volunteers that use the Internet to communicate, plan, and develop the OpenSSL toolkit and its related documentation.

Source: www.openssl.org

---

**libboost (1.51)**

Boost provides free peer-reviewed portable C++ source libraries, and emphasize libraries that work well with the C++ Standard Library.

Boost libraries are intended to be widely useful, and usable across a broad spectrum of applications.

The Boost license encourages both commercial and non-commercial use.

Source: www.boost.org

---

**libjpeg (6b)**

Libjpeg is a widely used C library for reading and writing JPEG image files.

Source: http://libjpeg.sourceforge.net/

---

**zlib (1.2.7)**

A massively spiffy yet delicately unobtrusive compression library

Source: www.zlib.net

---

**libdirectfb (1.4.11)**

DirectFB is a thin library that provides hardware graphics acceleration, input device handling and abstraction, integrated windowing system with support for translucent windows and multiple display layers, not only on top of the Linux Framebuffer Device.

It is a complete hardware abstraction layer with software fallbacks for every graphics operation that is not supported by the underlying hardware. DirectFB adds graphical power to embedded systems and sets a new standard for graphics under Linux.

Source: http://directfb.org/

---

**libTomMath (0.42.0)**

LibTom Projects are open source libraries written in portable C under WTFPL. The libraries supports a variety of cryptographic and algebraic primitives designed to enable developers and students to pursue the field of cryptography much more efficiently.

Source: http://libtom.org/

---

**MTD utility (1.5.0)**

MTD subsystem (stands for Memory Technology Devices) provides an abstraction layer for raw flash devices. It makes it possible to use the same API when working with different flash types and technologies, e.g. NAND, OneNAND, NOR, AG-AND, ECC’d NOR, etc.

MTD subsystem does not deal with block devices like MMC, eMMC, SD, CompactFlash, etc. These devices are not raw flashes but they have a Flash Translation layer inside, which makes them look like block devices. These devices are the subject of the Linux block subsystem, not MTD.

Source: http://www.linux-mtd.infradead.org/source.html
libscew

The aim of SCEW is to provide an easy interface around the XML Expat parser, as well as a simple interface for creating new XML documents. It provides functions to load and access XML elements without the need to create Expat event handling routines every time you want to load a new XML document.

SCEW is freely available for download under the terms of the GNU Lesser General Public License v2.1 (LGPL).

Source: http://www.nongnu.org/scew/

libexpat

Expat is an XML parser library written in C.

It is a stream-oriented parser in which an application registers handlers for things the parser might find in the XML document (like start tags).

Source: http://expat.sourceforge.net/

libdrm

libdrm provides core library routines for the X Window System to directly interface with video hardware using the Linux kernel's Direct Rendering Manager (DRM).

Source: http://dri.freedesktop.org/libdrm/

FFMpeg (0.6)

A complete, cross-platform solution to record, convert and stream audio and video.

Source: www.ffmpeg.org
Troubleshooting and support

16.1 Troubleshooting

Channels

No digital channels found during the installation
See the technical specifications to make sure that your TV supports DVB-T or DVB-C in your country. Make sure that all cables are properly connected and that the correct network is selected.

Previously installed channels are not in the channel list
Make sure that the correct channel list is selected.

General

The TV does not switch on
- Disconnect the power cable from the power outlet. Wait for one minute then reconnect it.
- Make sure that the power cable is securely connected.

Creaking sound at startup or switch off
When you are turning the TV on, off or to standby, you hear a creaking sound from the TV chassis. The creaking sound is due to the normal expansion and contraction of the TV as it cools and warms up. This does not affect performance.

TV does not respond to the remote control
The TV requires some time to start up. During this time, the TV does not respond to the remote control or TV controls. This is normal behaviour.
If the TV continues to be unresponsive to the remote control, you can check if the remote control is working by means of a mobile phone camera. Put the phone in camera mode and point the remote control to the camera lens. If you press any key on the remote control and you notice the infra red LED flicker through the camera, the remote control is working. The TV needs to be checked.
If you do not notice the flickering, the remote control might be broken or its batteries are low.
This method of checking the remote control is not possible with remote controls which are wirelessly paired with the TV.

The TV goes back to standby after showing the Philips startup screen
When the TV is in standby, a Philips startup screen is displayed, then the TV returns to standby mode. This is normal behaviour. When the TV is disconnected and reconnected to the power supply, the startup screen is displayed at the next startup. To switch on the TV from standby, press on the remote control or the TV.

The standby light keeps on blinking
Disconnect the power cable from the power outlet. Wait 5 minutes before you reconnect the power cable. If the blinking reoccurs, contact Philips TV Consumer Care.

Wrong menu language
Change the language back to your language.
1. Press \ and select Setup and press OK.
2. Select TV settings > General settings > Menu language and press OK.
3. Select the language you want and press OK.
4. Press \, repeatedly if necessary, to close the menu.

Picture

No picture / distorted picture
- Make sure that the antenna is properly connected to the TV.
- Make sure that the correct device is selected as the display source.
- Make sure that the external device or source is properly connected.

Sound but no picture
- Make sure that the picture settings are set correctly.

Poor antenna reception
- Make sure that the antenna is properly connected to the TV.
- Loud speakers, unearthed audio devices, neon lights, high buildings and other large objects can influence reception quality. If possible, try to improve the reception quality by changing the antenna direction or moving devices away from the TV.
- If reception on only one channel is poor, fine-tune this channel.

Poor picture from a device
- Make sure that the device is connected properly.
- Make sure that the picture settings are set correctly.

Picture settings change after a while
Make sure that Location is set to Home. You can change and save settings in this mode.

A commercial banner appears
Make sure that **Location** is set to **Home**.

**Picture does not fit the screen**
Change to a different picture format. Press 📦.

**Picture format keeps changing with different channels**
Select a non 'Auto' picture format.

**Picture position is incorrect**
Picture signals from some devices may not fit the screen correctly. Check the signal output of the connected device.

**Computer picture is not stable**
Make sure that your PC uses the supported resolution and refresh rate.

---

**Sound**

**No sound or poor sound quality**
If no audio signal is detected, the TV automatically switches the audio output off — this does not indicate malfunction.
- Make sure that the sound settings are correctly set.
- Make sure that all cables are properly connected.
- Make sure that the volume is not muted or set to zero.
- Make sure that the TV audio output is connected to the audio input on the Home Theatre System.
- Sound should be heard from the HTS speakers.
- Some devices may require you to manually enable HDMI audio output. If HDMI audio is already enabled, but you still do not hear audio, try changing the digital audio format of the device to PCM (Pulse Code Modulation). Refer to the documentation accompanying your device for instructions.

**Connections**

**HDMI**
- Note that HDCP (High-bandwidth Digital Content Protection) support can delay the time taken for a TV to display content from an HDMI device.
- If the TV does not recognise the HDMI device and no picture is displayed, switch the source from one device to another and back again.
- If there are intermittent sound disruptions, make sure that output settings from the HDMI device are correct.
- If you use an HDMI-to-DVI adapter or HDMI-to-DVI cable, make sure that an additional audio cable is connected to AUDIO IN (minijack only), if available.

**EasyLink does not work**
- Make sure that your HDMI devices are HDMI-CEC compatible. EasyLink features only work with devices that are HDMI-CEC compatible.

**No volume icon shown**
- When a HDMI-CEC audio device is connected this behaviour is normal.

**Photos, videos and music from a USB device do not show**
- Make sure that the USB storage device is set to Mass Storage Class compliant, as described in the storage device's documentation.
- Make sure that the USB storage device is compatible with the TV.
- Make sure that the audio and picture file formats are supported by the TV.

**Choppy playback of USB files**
- The transfer performance of the USB storage device may limit the data transfer rate to the TV which causes poor playback.

---

16.2 **Register**

Register your TV and enjoy a range of benefits including full support (including downloads), privileged access to information about new products, exclusive offers and discounts, the chance to win prizes and even participate in special surveys about new releases.

Go to [www.philips.com/welcome](http://www.philips.com/welcome)

16.3 **Help**

This TV offers help on screen.

**Open Help**
1. Press 📦 to open the Home menu.
2. Select **Help** and press **OK**.

16.4 **Online help**

To solve any Philips TV related problem, you can consult our online support. You can select your language and enter your product model number.

Go to [www.philips.com/support](http://www.philips.com/support).
On the support site you can find your country’s telephone number to contact us as well as answers to frequently asked questions (FAQs). In some countries, you can chat with one of our collaborators and ask your question directly or send a question by email. You can download new TV software or the manual to read on your computer.

### 16.5 Consumer Care / Repair

For support and repair, call the Consumer Care hotline in your country. Find the telephone number in the printed documentation that came with the TV. Or consult our website [www.philips.com/support](http://www.philips.com/support).

**TV model number and serial number**

You might be asked to provide the TV product model number and serial number. Find these numbers on the packaging label or on the type label on the back or bottom of the TV.

⚠️ **Warning**

Do not attempt to repair the TV yourself. This may cause severe injury, irreparable damage to your TV or void your warranty.
Safety and care

17.1 Safety

Important

Read and understand all safety instructions before you use the TV. If damage is caused by failure to follow instructions, the warranty does not apply.

Secure the TV from falling over

Always use the supplied wall bracket to secure the TV from falling over. Mount the bracket and secure the TV onto the bracket, even if you put the TV on the floor.

You can find the mounting instructions in the Quick Start Guide that came with the TV. In case you lost this guide, you can download the guide from www.philips.com

Use the product type number of the TV to look for the Quick Start Guide to download.

Risk of electric shock or fire

- Never expose the TV to rain or water. Never place liquid containers, such as vases, near the TV. If liquids are spilt on or into the TV, disconnect the TV from the power outlet immediately. Contact Philips TV Consumer Care to have the TV checked before use.

- Never expose the TV, remote control or batteries to excessive heat. Never place them near burning candles, naked flames or other heat sources, including direct sunlight.

- Never insert objects into the ventilation slots or other openings on the TV.

- Never place heavy objects on the power cord.

- Avoid force coming onto power plugs. Loose power plugs can cause arcing or fire. Ensure that no strain is exerted on the power cord when you swivel the TV screen.

- To disconnect the TV from the mains power, the power plug of the TV must be disconnected. When disconnecting the power, always pull the power plug, never the cord. Ensure that you have full access to the power plug, power cord and outlet socket at all times.

Risk of injury or damage to the TV

- Two people are required to lift and carry a TV that weighs more than 25 kg or 55 lbs.

- If you mount the TV on a stand, only use the supplied stand. Secure the stand to the TV tightly. Place the TV on a flat, level surface that can support the weight of the TV and the stand.

- When wall mounted, ensure that the wall mount can safely bear the weight of the TV set. TP Vision bears no responsibility for improper wall mounting that results in accident, injury or damage.

- Parts of this product are made of glass. Handle with care to avoid injury or damage.

Risk of damage to the TV

Before you connect the TV to the power outlet, ensure that the power voltage matches the value printed on the back of the TV. Never connect the TV to the power outlet if the voltage is different.

Risk of injury

Follow these precautions to prevent the TV from toppling over and causing injury:

- Never place the TV on a surface covered by a cloth or other material that can be pulled away.

- Ensure that no part of the TV hangs over the edge of the mounting surface.

- Never place the TV on tall furniture, such as a bookcase, without anchoring both the furniture and TV to the wall or a suitable support.

- Teach children about the dangers of climbing on furniture to reach the TV.

Risk of swallowing batteries

The remote control may contain coin-type batteries which can easily be swallowed by small children. Keep these batteries out of reach of children at all times.

Risk of overheating

Never install the TV in a confined space. Always leave a space of at least 10 cm or 4 inches around the TV for ventilation. Ensure curtains or other objects never cover the ventilation slots on the TV.
Lightning storms
Disconnect the TV from the power outlet and antenna before lightning storms. During lightning storms, never touch any part of the TV, power cord or antenna cable.

Risk of hearing damage
Avoid using earphones or headphones at high volumes or for prolonged periods of time.

Low temperatures
If the TV is transported in temperatures below 5 degrees Celsius or 41 degrees Fahrenheit, unpack the TV and wait until the TV temperature reaches room temperature before connecting the TV to the power outlet.

Humidity
In rare occasions, depending on temperature and humidity, minor condensation can occur on the inside of the TV glass front (on some models). To prevent this, do not expose the TV to direct sunlight, heat or extreme humidity. If condensation occurs, it will disappear spontaneously while the TV is playing for a few hours. The condensation moisture will not harm the TV or cause malfunction.

Screen care
- Never touch, push, rub or strike the screen with any object.
- Unplug the TV before cleaning.
- Clean the TV and frame with a soft damp cloth and wipe gently. Never use substances such as alcohol, chemicals or household cleaners on the TV.
- To avoid deformations and colour fading, wipe off water drops as quickly as possible.

Avoid stationary images as much as possible. Stationary images are images that remain onscreen for extended periods of time. Stationary images include onscreen menus, black bars, time displays, etc. If you must use stationary images, reduce screen contrast and brightness to avoid screen damage.
Terms of use, copyrights and licenses

18.1 Terms of use

2015 © TP Vision Europe B.V. All rights reserved.

This product was brought to the market by TP Vision Europe B.V. or one of its affiliates, hereinafter referred to as TP Vision, which is the manufacturer of the product. TP Vision is the warrantor in relation to the TV with which this booklet was packaged. Philips and the Philips Shield Emblem are registered trademarks of Koninklijke Philips N.V.

Specifications are subject to change without notice. Trademarks are the property of Koninklijke Philips N.V or their respective owners. TP Vision reserves the right to change products at any time without being obliged to adjust earlier supplies accordingly.

The written material packaged with the TV and the manual stored in the memory of the TV or downloaded from the Philips website are believed to be adequate for the intended use of the system.

The material in this manual is believed adequate for the intended use of the system. If the product, or its individual modules or procedures, are used for purposes other than those specified herein, confirmation of their validity and suitability must be obtained. TP Vision Europe B.V. warrants that the material itself does not infringe any United States patents. No further warranty is expressed or implied. TP Vision Europe B.V. cannot be held responsible neither for any errors in the content of this document nor for any problems as a result of the content in this document. Errors reported to Philips will be adapted and published on the Philips support website as soon as possible. Terms of warranty Risk of injury, damage to TV or void of warranty! Never attempt to repair the TV yourself. Use the TV and accessories only as intended by the manufacturer. The caution sign printed on the back of the TV indicates risk of electric shock. Never remove the TV cover. Always contact Philips TV Customer Care for service or repairs. Any operation expressly prohibited in this manual, or any adjustments and assembly procedures not recommended or authorised in this manual, shall void the warranty. Pixel characteristics This LCD/LED product has a high number of colour pixels. Although it has effective pixels of 99.999% or more, black dots or bright points of light (red, green or blue) may appear constantly on the screen. This is a structural property of the display (within common industry standards) and is not a malfunction. CE compliance This product is in compliance with the essential requirements and other relevant provisions of Directives 2006/95/EC (Low Voltage), 2004/108/EC (EMC) and 2011/65/EU (ROHS). Compliance with EMF TP Vision Europe B.V. manufactures and sells many products targeted at consumers which, like any electronic apparatus, in general have the ability to emit and receive electromagnetic signals. One of Philips’ leading Business Principles is to take all necessary health and safety measures for our products, to comply with all applicable legal requirements and to stay well within the Electro Magnetic Field (EMF) standards applicable at the time of producing the products. Philips is committed to develop, produce and market products that cause no adverse health effects. TP Vision confirms that, as long as its products are handled properly for their intended use, they are safe to use according to scientific evidence available today. Philips plays an active role in the development of international EMF and safety standards, enabling Philips to anticipate further developments in standardisation for early integration in its products.
