Highlights

Easy content loading

Displaying 60,000 colours, including blue, for clear and confident messaging, and with 16GB internal memory. Plug into a power source to upload new static content for instant play, via USB, LAN or WiFi connections.

Low to no power consumption

Perfect for environments without close access to power. Philips Tableaux can be positioned and repositioned, displaying colourful static content in the same way as paper posters, requiring a power connection only when loading new content.

Technology for the future

Developing technology for your sustainable future – power free, waste free colourful paper poster replacements.

Powered by Android

Android-powered Philips professional displays are flexible and secure, ensuring display specs stay up to the moment for longer.
