#### LCD WXGA display, 1366x768p

This WXGA display with state-of-the-art LCD screen technology gives you widescreen HD resolution of 1366 x 768p pixels. It produces brilliant flicker-free progressive scan pictures with optimum brightness and superb colors. This vibrant and sharp image will provide you with an enhanced viewing experience.

#### Dynamic Contrast

This special picture processing technology seamlessly delivers vibrant images in bright scenes and reproduces deep blacks and accurate rendering of darker shades in dark scenes. You get clear images with enriched color and contrast for the ultimate LCD picture performance.

#### Dolby Digital

Dolby Digital, the world's leading digital multi-channel audio standard, makes use of the way the human ear naturally processes sound. With Dolby Digital you experience superb quality surround sound audio with realistic spatial cues.

#### HDMI input

HDMI makes an uncompressed digital RGB connection from the source to the screen. By eliminating conversion to an analog signal, it delivers an unblemished image. The non-degraded signal reduces flicker and leads to a clearer picture. HDMI intelligently communicates the highest output resolution with the source device. The HDMI input is fully backward compatible with DVI sources but includes digital audio. HDMI uses HDCP copy protection.

#### VGA Input

VGA input provides a connector to accommodate input of an analog signal for use with a PC.

#### fun-Link

fun-Link allows one remote control to operate your TV and TV-connected devices, including Blu-ray players and home theater systems.
