Experience Hospitality TV
The V (Indulgence) Series

The Philips Indulgence range offers great features at the most attractive price. The televisions can handle Free-To-Guest (FTG) or Pay-Per-View (PPV) scenarios, meeting the LodgeNet® HD Built-in standard and offering SmartPort.

**Sustainable solutions**
- SmartPower™ for the best picture and ultra low power use
- ENERGY STAR® qualified product
- Eco-friendly design & flame retardant housing

**Guest experience**
- ThemeTV simplifies channel selection
- SmartCP integrated connectivity for the guest
- SmartWindow for simultaneous TV viewing and PC use.
- Full HD LCD display, with a 1920x1080p resolution

**Operational excellence**
- SmartInstall allows easy installation, cloning and setup
- SmartUpdate keeps TV channels, settings and software current
- Integrated two-way b-LAN™ communication with PPV support
- SmartStand² for security and elegance
- Two-year advanced exchange warranty
Eco-friendly design
Sustainability is integral to the way Philips does business. Philips TVs are designed and produced according to our EcoDesign principles aimed at minimizing overall environmental impact, through lower power consumption, removal of hazardous substances, lower weight, more efficient packaging and better recyclability. Philips TVs also have a special housing of flame retardant material. Independent tests carried out by emergency fire services have shown that whereas TVs can sometimes intensify fires caused by external sources, Philips TVs will not contribute to the fire.

ENERGY STAR®

This product has earned the ENERGY STAR®. ENERGY STAR qualified products meet or exceed the guidelines established by the U.S. government for in-use and standby power consumption, at the time of manufacture. Learn more at ENERGYSTAR.gov.

Everyday support (USA-based)
Your hotel never closes, and neither do we. Philips offers you real help from a live person 7 days a week, excluding major holidays.

Full HD LCD display 1920x1080p

The Full HD screen has the widescreen resolution of 1920 x 1080p. This is the highest resolution of HD sources for the best possible picture quality. It is fully future proof as it supports 1080p signals from all sources, including the most recent like Blu-ray and advanced HD game consoles. The signal processing is extensively upgraded to support this much higher signal quality and resolution. It produces brilliant flicker-free progressive scan pictures with superb brightness and colors.

Integrated two-way b-LAN™
Philips televisions feature the LodgeNet Interactive b-LAN™ communication protocol built into the TV. This allows for simple and reliable cloning, customizing, and updating of our products. By integrating b-LAN™, these televisions also work right out of the box in all LodgeNet® systems, without any need for terminals or cards.

SmartCP autosensing inputs
Allowing your guests to access their content has never been easier or more affordable. Guests can simply plug devices into our easily accessible side connectivity panel and the television will automatically detect and switch to the correct input. Guests can even plug their USB memory sticks right into the set and play back music or photos (.mp3 or .jpg files).

SmartInstall
Philips introduces SmartInstall, the most complete and easy to use installation process we have ever offered. SmartInstall consists of an easy to use PC program that allows all features to be configured and all channels to be mapped in a fraction of the time it takes to do so on an actual television with a remote. And with the addition of the Philips Smart Gateway, the televisions can even automatically clone all settings when plugged in.

SmartPower³ with AutoSense
SmartPower³ allows the backlight intensity to be varied based on real time picture measures and actual room lighting conditions to deliver the best possible picture at the lowest possible energy consumption.

SmartStand²
Philips unique SmartStand² is a complete commercial solution, offering 180 degree swivel that can be limited in either or both directions to 30, 60, or 90 degrees. The stand includes a secure mounting plate that can be affixed either using security screws or non-drill adhesive. In addition, all security hardware for drill and non-drill mounting is included on select models (check with your Philips representative for specific models).

SmartUpdate
Philips televisions are the first to automatically keep themselves updated. All SmartUpdate featured Philips commercial televisions on the property can automatically check for and download updated channel maps, settings, and/or software. Philips televisions update in the background when new files are found, and as a result, the guest experience has minimal disruption. SmartUpdate requires a Philips Smart Gateway to operate.

SmartWindow
SmartWindow allows your guests the added convenience of working on their laptop PC’s on one half of the screen while enjoying the TV content of their choice on the other half. This feature offers the perfect balance of work and leisure.

ThemeTV
Hotel guests often have difficulty locating desirable programs since they are unfamiliar with the channel lineup. Traditional Electronic Program Guides (EPGs) are little help as the guest has to scroll through multiple pages to find channels. In addition, traditional EPGs require hotels to pay fees for channel information on a per room basis. Philips is proud to introduce a better program-location tool with ThemeTV. Guests simply filter by type of channel, for example "Sports" and instantly see and tune to any Sports channel available. Guests are seconds away from desirable content.
Specifications

**Picture/Display**
- Aspect ratio: 16:9, Widescreen
- Color cabinet: Black
- Brightness: 500 cd/m²
- Contrast ratio (typical): 1400:1
