- Update for Remote control SW v15
- Update eSticker v2.2

TPM171E _ 105.000.159.034 – Date: 2018/04/04
- Supports introduction of 8303 and 8503 ranges
- Fix for AL flicker
- Fix for HBBTV language selection
- Improvement for picture quality of 7xxx range
- Improvement for audio
- Improvement for TV Guide acquisition
- Improvement for general stability
- Improvement for channel installation
- Update for channel logo's

TPM171E _ 105.000.159.006 – Date: 2018/02/26
- Initial SW for the 2K18 73x3/7503/7803 ranges

Software history – Philips 2K17 6412/6482/7002/7502/8102/8602/9002/973/873 ranges

TPM171E _ 003.001.012.000 – Date: 2018/09/17
- Improvements for screensaver with TXT-subtitling on OLED devices
- Improvements for system stability
- Improvements for standby mode
- Improvements for AL style in slideshow
- Updated translation string database

TPM171E _ 003.000.246.005 – Date: 2018/06/18
- Improvements for AL Hue
- Improvements for Ethernet connection loss
- Improvements for order SmartTV apps
- Improvements in on screen messages
- Improvements in country selection channel installation
- Improvements in Txt for Turkish language
- Introduction "Follow flag" in AL style

TPM171E _ 003.000.240.000 – Date: 2018/05/21
- Improvements for sound interruptions after channel change
- Improvements to media playback
- Improvements for ARC connection
- Fix to avoid at audio being heard at 4AM/6AM on some ARC devices
- Fix for standby issue with PS4

- Fix for HbbTV notification being shown sometimes when HbbTV was deactivated
- Security fix for WPA2 protocol related to Key Reinstallation Attacks (KRACK)
- Update for channel logo's
- Updated translation string database

TPM171E _ 001.002.177.000 – Date: 2017/11/13
- Fix for the loss of channel specifically using TeleColumbus-Germany

TPM171E _ 001.002.176.000 – Date: 2017/10/27
- Improvement for PQ of 8102 and 8602 range

TPM171E _ 001.002.171.000 – Date: 2017/10/16
- Fix for missing channels in DVBC
- Improvement for stability and no response

TPM171E _ 001.002.167.001 – Date: 2017/10/06
- Supports introduction of 8602 range
- Fix for slow response of the set
- Improvement for auto start-up
- Improvement for YT playback
- Improvements for stability/crashes
- Update for channel logo's
- Update for Remote control SW

TPM171E _ 001.002.161.000 – Date: 2017/09/18
- Supports introduction of 8102 range
- Improvement for PQ and gamma correction

TPM171E _ 001.002.159.000 – Date: 2017/09/06
- Fix for no reaction on Home button
- Fix for Ambilight in screen demo
- Fix for lost/mixed-up channel list
- Fix for sound loss from ARC (5.1 sound) after start-up
- Fix for HBBTV Denmark (DR) content playback
- Improvements for lipsync optical out
- Improvements for stability/crashes
- Improvements for CEC

TPM171E _ 001.002.089.005 – Date: 2017/06/29
- Improvements for network connection in case of low signal
- Improvements for Netflix recommendation

TPM171E _ 001.002.089.001 – Date: 2017/06/09
- Supports introduction of 9002 OLED range
- Fix for reddish and too bright picture
- Fix for no TV Guide in DVBS
- Fix for lipsync when using sound system
- Fix for pink screen after startup on HDMI
- Fix for Videoland buffering issue
- Improvements for stability/crashes
- Improvements for CEC
- Improvements for startup behaviour (auto startup, no picture)
- Improvements for power consumption

TPM171E _ 001.002.035.013 – Date: 2017/05/11
- Fix for startup issues
    - o Green splash at startup
    - o No picture/No Ambilight at startup
    - o Not able to startup

TPM171E _ 001.002.035.010 – Date: 2017/04/25
- Initial SW for the 2K17 6412/6482/7002/7502 ranges
