**CHILD SAFETY: PROPER TELEVISION PLACEMENT MATTERS**

**THE CONSUMER ELECTRONICS INDUSTRY CARES**
- Manufacturers, retailers and the rest of the consumer electronics industry are committed to making home entertainment safe and enjoyable.
- As you enjoy your television, please note that all televisions—new and old—must be supported on proper stands or installed according to the manufacturer’s recommendations. Televisions that are inappropriately situated on dressers, bookcases, shelves, desks, speakers, chests, carts, etc., may fall over, resulting in injury.

**TUNE IN TO SAFETY**
- **ALWAYS** follow the manufacturer’s recommendations for the safe installation of your television.
- **ALWAYS** read and follow all instructions for proper use of your television.
- **NEVER** allow children to climb on or play on the television or the furniture on which the television is placed.
- **NEVER** place the television on furniture that can easily be used as steps, such as a chest of drawers.
- **ALWAYS** install the television where it cannot be pushed, pulled over or knocked down.
- **ALWAYS** route cords and cables connected to the television so that they cannot be tripped over, pulled or grabbed.

**WALL OR CEILING MOUNT YOUR TELEVISION**
- **ALWAYS** contact your retailer about professional installation if you have any doubts about your ability to safely mount your television.
- **ALWAYS** use a mount that has been recommended by the television manufacturer and has a safety certification by an independent laboratory (such as UL, CSA, ETL).
- **ALWAYS** follow all instructions supplied by the television and mount manufacturers.
- **ALWAYS** make sure that the wall or ceiling where you are mounting the television is appropriate. Some mounts are not designed to be mounted to walls and ceilings with steel studs or cinder block construction. If you are unsure, contact a professional installer.

**MOVING AN OLDER TELEVISION TO A NEW PLACE IN YOUR HOME**
- Many new television buyers move their older CRT televisions into a secondary room after the purchase of a flat-panel television. Special care should be made in the placement of older CRT televisions.
- **ALWAYS** place your older CRT television on furniture that is sturdy and appropriate for its size and weight.
- **NEVER** place your older CRT television on a dresser where children may be tempted to use the drawers to climb.
- **ALWAYS** make sure your older CRT television does not hang over the edge of your furniture.

Register online today at www.philips.com/support today to get the most benefits from your purchase.

Registering your model with Philips makes you eligible for all of the valuable benefits listed below, so don’t miss out. Register online at www.philips.com/support to ensure:

**Product safety notification**
- By registering your product, you’ll receive notification—directly from the manufacturer—in the rare case of a product recall or safety defect.

**Additional benefits**
- Registering your product guarantees that you’ll receive all of the privileges to which you’re entitled, including special money-saving offers.

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated “dangerous voltage” within the apparatus’s enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the apparatus.

**WARNING**: To reduce the risk of fire or electric shock, do not expose this apparatus to rain or moisture. Apparatus shall not be exposed to dripping or splashing and no objects filled with liquids, such as vases, shall be placed on the apparatus.

**CAUTION**: To prevent electric shock, match wide blade of plug to wide slot, fully insert.

Important safety instructions

1. Read these instructions.
2. Keep these instructions.
3. Heed all warnings.
4. Follow all instructions.
5. Do not use this apparatus near water.
6. Clean only with dry cloth.
7. Do not block any ventilation openings. Install in accordance with the manufacturer’s instructions.
8. Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
9. Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
10. Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
11. Only use attachments / accessories specified by the manufacturer.
12. The recommended wall mount bracket kit (sold separately) allows the mounting of the TV on the wall.

Note to the CATV system installer:
This reminder is provided to call the CATV system installer’s attention to Article 820-40 of the NEC that provides guidelines for proper grounding and, in particular, specifies that the cable ground shall be connected to the grounding system of the building, as close to the point of cable entry as practical.

Example of antenna grounding as per NEC - National Electric Code

- Your TV meets the VESA standard for wall mounting. Consult with your local dealer for a wall mount bracket which is compatible with your TV model.
- The recommended wall mount bracket kit (sold separately) allows the mounting of the TV on the wall.
- For detailed information on installing the wall mount, refer to the wall mount Instruction book.
- Funai Corporation is not responsible for any damage to the product or injury to yourself or others if you elect to install the TV wall mount bracket or mount the TV onto the bracket.
- The wall mount bracket must be installed by experts.

Funai Corporation is not liable for these types of accidents or injuries noted below.
- If installed onto a ceiling or slanted wall, the TV and wall mount bracket may fall which could result in a severe injury.
- Do not use screws that are longer or shorter than their specified length. If screws too long are used this may cause mechanical or electrical damage inside the TV set. If screws too short are used this may cause the TV set to fall.
- Do not fasten the screws by excessive force. This may damage the product or cause the product to fall, leading to an injury.
- For safety reasons use 2 people to mount the TV onto a wall mounting bracket.
- Do not mount the TV onto the wall mounting bracket while your TV is plugged in or turned on. It may result in an electrical shock injury.

When installing the unit on the wall, allow this much space.
- Top: 118 inches (30cm)
- Left and right side: 5.9 inches (15cm)
- Bottom: 3.9 inches (10cm)
1 Notice

Trademarks are the property of Koninklijke Philips N.V. or their respective owners.
Funai Corporation reserves the right to change products at any time without being obliged to adjust earlier supplies accordingly. The material in this Owner's manual is believed adequate for the intended use of the system. If the product or its individual modules or procedures are used for purposes other than those specified herein, confirmation of their validity and suitability must be obtained. Funai Corporation warrants that the material itself does not infringe any United States patents. No further warranty is expressed or implied. Funai Corporation cannot be held responsible neither for any errors in the content of this document nor for any problems as a result of the use of the product.

Pixel characteristics
This LCD product has a high number of color pixels. Although it has effective pixels of 99.999% or more, black dots or bright points of light (red, green or blue) may appear constantly on the screen. This is a structural property of the display (within common industry standards) and is not a malfunction.

Warranty
No components are user serviceable. Do not open or remove covers to the inside of the product. Repairs may only be done by service centers and official repair shops. Failure to do so shall void any warranty, stated or implied.
Any operation expressly prohibited in this manual, any adjustments or assembly procedures not recommended or authorized in this manual shall void the warranty.

Federal communications commission notice
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

Connections to this device must be made with shielded cables with metallic RFI / EMI connector hoods to maintain compliance with FCC Rules and regulations.

Canadian notice
CAN ICES-3 (B) / NMB-3 (B)
Analog and digital television receiving apparatus, Canada BETS-7 / NTMR-7.

The following FCC/IC RSS applies to the wireless LAN adapter included in this product.

FCC caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.
This transmitter must not be co-located or operated in conjunction with any other antenna or transmitter.

FCC/IC RF Exposure Compliance
This equipment complies with FCC/IC radiation exposure limits set forth for an uncontrolled environment and meets the FCC radio frequency (RF) Exposure Guidelines and RSS-102 of the IC radio frequency (RF) Exposure rules.
This equipment should be installed and operated keeping the radiator at least 20cm or more away from your body.

5150-5250 MHz band is restricted to indoor operations only.
High-power radars are allocated as primary users (i.e. priority users) of the bands 5250–5350 MHz and 5650–5850 MHz and that these radars could cause interference and/or damage to LE-LAN devices.

Compliance with IC requirement RSS-210 A9.4.4
Data transmission is always initiated by software, which is the passed down through the MAC, through the digital and analog baseband, and finally to the RF chip. Several special packets are initiated by the MAC. These are the only ways the digital baseband portion will turn on the RF transmitter. When the data is transmitted, the packets are initiated by the MAC. The packets are transmitted on the wireless LAN adapter and transmitted on the wireless LAN adapter. In other words, this device automatically discontinues transmission in case of either absence of information or transmission of operational failure.
Positioning the TV
- Large screen TVs are heavy. 2 people are required to carry and handle a large screen TV.
- Make sure to hold the upper and bottom frames of the unit firmly as illustrated.
- Install the unit in a horizontal and stable position.
- Do not install the unit in direct sunlight or in a place subject to dust or strong vibration.
- Depending on the environment, the temperature of this unit may increase slightly. This is not a malfunction.
- When installing this unit in a temperate environment, avoid a place with rapid temperature changes.
  - Operating temperature: 41°F (5°C) to 104°F (40°C)
- This unit should not be used in a tropical environment as it has not been evaluated under such conditions.
- No objects should be placed directly on or under this unit, especially lighted candles or other flammable objects.
- Depending on your external devices, noise or disturbance of the picture and/or sound may be generated if the unit is placed too close to them. In this case, please ensure enough space between the external devices and the unit.
- Do not insert the AC power cord into the power socket outlet before all the connections are made.
- Ensure that you always have easy access to the AC power cord and outlet to disconnect the TV from the AC outlet.
- Before you move the TV, disconnect attached cables to prevent damage to connectors, especially the TV tuner.
- Be sure to unplug the AC power plug from the AC outlet before moving or carrying the unit.
- When moving the TV and then setting it down, please be careful not to pinch the AC power cord under the unit.
- Do not place this unit in an area where it may be exposed to water, oil or grease such as near a bathtub, basin, kitchen sink, washing tub, swimming pool, kitchen exhaust fan, etc., or in a damp basement.

Regulatory notices
**WARNING:** To prevent injury, this apparatus must be securely attached to the furniture / wall in accordance with the instructions. Tipping, shaking or rocking the unit may cause injury / death.

**WARNING:** Never place a TV in an unstable location. A TV may fall, causing serious personal injury or death. Many injuries, particularly to children, can be avoided by taking simple precautions such as:
- Using cabinets or stands recommended by the manufacturer of the TV
- Only using furniture that can safely support the TV
- Ensuring the TV is not overhanging the edge of the supporting furniture.
- Not placing the TV on tall furniture (for example, cupboards or bookcases) without anchoring both the furniture and the TV to a suitable support.
- Not placing the TV on cloth or other materials that may be located between the TV and supporting furniture.
- Educating the children about the dangers of climbing on furniture to reach the TV or its controls.

If your existing TV is being retained and relocated, the same considerations as above should be applied.

Do not place the unit on the furniture that is capable of being tilted by a child and an adult leaning, pulling, standing or climbing on it. A falling unit can cause serious injury or even death.

In order to avoid interruption of ventilation, this unit should not be placed in built-in equipment such as a book cabinet, rack, etc., and the vents of this unit should not be covered with anything such as a tablecloth, curtain, newspaper, etc. Make sure that there is enough ventilation space (4 inches / 10 cm or more) around this unit.

Press \( \textcircled{B} \) (POWER) to turn the unit on and go into standby mode. To completely turn off the unit, you must unplug the AC power plug from the AC power outlet.

Disconnect the AC power plug to shut the unit off when trouble is found or not in use. The AC plug shall remain readily available.

Environmental care

The packaging of this product is intended to be recycled. Contact your local authorities for information about how to recycle the packaging.

For product recycling information, please visit - www.recycle.philips.com

End of life directives

Philips pays a lot of attention to produce environmental-friendly products in green focal areas. Your new TV contains materials which can be recycled and reused. At the end of its life, specialized companies can dismantle the discarded TV to concentrate the reusable materials and to minimize the amount of materials to be disposed of. Please ensure you dispose of your old TV according to local regulations.

**⚠️ Batteries usage**

**CAUTION:** Danger of explosion if battery is incorrectly replaced. Replace only with the same or equivalent type.

**WARNING:** Batteries (battery pack or battery installed) should not be exposed to excessive heat such as sunshine, fire or the like.
- Do not mix old and new batteries.
- Do not mix alkaline, standard (carbon-zinc) or rechargeable (ni-cad, ni-mh, Li-ion, etc.) batteries.

Disposal of used batteries

The batteries included do not contain the heavy metals mercury and cadmium, however in certain localities, disposing batteries with household waste is not permitted. Please ensure you dispose of batteries according to local regulations.

Preparing to move / ship the unit

Please pack the unit properly by following the diagram on the carton (as noted below).

- To avoid damage to the screen, do not pack the stand on the same side as the TV screen, refer to the illustration above.
2 Getting started

Features

- **Google Assistant on Android TV**
  Android TV brings a world of content to your biggest screen. With the Google Assistant built in, you can quickly access entertainment, get answers, and control devices around your home. Find the latest blockbuster, check the score of the big game, or dim the lights. Just say “Hey Google,” or press the mic button on your remote to get started.

- **Google Play**
  Android TV offers thousands of movies, shows, and games from Google Play, YouTube, and your favorite apps. Discover your favorite content, apps, and games on Google Play.

- **DTV / Analog TV / CATV**
  You can use your remote control to select channels which are broadcast in digital format and conventional analog format. Also, cable and satellite subscribers can access their TV channels.

- **Information display**
  You can display on the TV screen the title, contents (DTV only) and other information on the current program.

- **Autoprogram**
  This unit automatically scans and memorizes channels available in your area, eliminating difficult setup procedures.

- **Parental controls**
  This feature allows you to block children’s access to inappropriate programs.

- **Internet Browsing**

- **Closed caption decoder**
  Built-in closed caption decoder displays text for closed caption supported programs.

- **MTS / SAP tuner**
  Audio can be selected from the remote control.

- **Auto standby**
  If there is no input signal and no operation for 15 minutes, the unit will go into standby mode automatically.

- **Sleep timer**
  You can set the unit to go into standby mode after a specific amount of time.

- **Choices for on-screen language**
  Select your on-screen language: English, Spanish or French.

- **Stereo sound function**

- **PLL frequency synthesized tuning**
  Provides free and easy channel selection and lets you tune directly to any channel using the number and decimal point “•” keys on the remote control.

- **Various adjustments for picture and sound**
  Customizes picture quality suitable for your room and sets your sound preference.

- **HDMI control**
  HDMI control allows your other HDMI link devices to be controlled by the HDMI cable connected to your TV.

- **HDMI input**

- **HDMI-DVI input**
  If your video device has a DVI output jack, use an HDMI-DVI conversion cable to connect the unit.

- **AV input**
  Audio and video input from an external device.

- **Digital audio output**

- **Headphone audio output**
  Headphone 3.5mm stereo jack for personal listening.

---

Included accessories

- **Quick start guide**
- **Caution sheet**
- **Remote control**
- **Batteries** (AAA, 1.5V x 2)
- **TV base and screws** *
  * Screws packed with this unit

</tr>
</tbody>
</table>

**Note(s)**

- If you lose the screws, please purchase the above-mentioned phillips head screws at your local store.
- If you need to replace these accessories, please refer to the part name or No. with the illustrations and call our toll free customer support line found on the cover of this user manual.

**When using a universal remote control to operate this unit.**

- Make sure the component code on your universal remote control is set to our brand. Refer to the instruction book accompanying your remote control for more details.
- We do not guarantee 100% interoperability with all universal remote controls.

Symbols used in this user manual

The following is the description for the symbols used in this user manual. Description refers to:

- **Digital TV operation**
- **Cable / NTSC (Analog) TV operation**

- If neither symbol appears, the operation is applicable to both.
Unpacking

It is recommended that two or more people remove the TV set from the box. Be careful not to injure your fingers and keep children away during assembly.

1. Open the top flaps of the box.

2. Remove all accessories.

3. Remove the packing joints from the box.

4. Remove the outer slipbox with care.

5. Support the top of the TV set with a hand to prevent the TV from falling.

6. Unhinge the retaining tabs and unfold the left and right side of the bottom packaging.

Caution(s)

- DO NOT take the TV set out of the box yet.

Continued on next page.
Installing the stands

1. Remove both of the bottom polystyrene foam bases. Carefully tear the plastic bag until the bottom corner of the TV is exposed.
   - Support the top of the TV set at all times to prevent the TV from falling.

2. Lift up one side of the TV approx. 1 inch (2.5 cm) and insert the matching stand upward until it fits the main unit.

3. Fasten the matching stand to the TV with 2 screws (included).

4. In the same manner as step 2, install the other stand.

5. Fasten the other stand to the TV with 2 screws (included).

6. Both stands should now be securely fastened.

Caution(s)

- Before installing the matching stand, remove the protective cardboard and carefully peel away the film from the area so that it will not get stuck between the unit and the stand.

Note(s)

- A wide open space is recommended for assembly.
- A Phillips-head screwdriver is required to fasten the stands to the TV set.
- When attaching the stand, ensure that all screws are tightly fastened. If the stand is not properly attached, it could cause the unit to fall, resulting in injuries as well as damage to the unit.
- To remove the stand from this unit, unscrew the phillips-head screws by reversing the procedure. Be careful not to drop the stand when you remove it.
Lifting the TV set

Carefully lift the TV set as shown in the illustration and place it onto a stable, level surface.

![Diagram of lifting the TV set]

Removing cardboard

Remove the cardboard attached to the screen.

![Diagram of removing cardboard]

Installing the remote control batteries

1. Open the battery cover by firmly sliding down.
2. Insert 2 AAA (1.5V) batteries matching the polarity indicated inside the battery compartment of the remote control.
3. Slide the cover back into position.

**Caution(s)**

- For remote controls that have the battery cover on the front, please take care to slide the cover down BEFORE lifting it off to prevent accidentally breaking the tabs that hold it in place.

**Note(s)**

- Remove the batteries if not using the remote control for an extended period of time.

Continued on next page.
Remote control

○ (POWER)  
Turns the TV on and off of standby.

VUDU  
Access directly to VUDU.

● (INFO)  
Displays input, resolution, and HDR information.

♦ (Google Assistant)  
Activates your personal Google Assistant.

≡ (OPTIONS)  
Displays a list of menu options applicable to the active screen.

OK  
Press to decide the command of setting when the Home menu is displayed.

▲ ▼ ◀ ▶ (NAVIGATION buttons)  
Moves the cursor, selects the on-screen menu items.

☐ (HOME)  
Access to your apps, Live TV, input devices, settings, and the Google Play Store.

TV  
Direct access to your installed TV channels. (This feature is only available for OTA and select cable channels.)

COLOR buttons*  
Use these keys according to the directions on-screen with HDMICEC function.

❑ (INPUTS)  
Change input source. 
Select and change access to the attached devices such as Blu-ray player, gaming consoles, or cable box.

CH + / –*  
Selects a channel.

0 - 9 (NUMBER buttons)*  
Used to enter a channel / program number.

• (DOT)  
Use with 0-9 to select digital channels.  
For example, to enter 21, press.

* Depending on the type of remote control, these buttons may not be present.

HDMI-CEC keys

▶ / ▼  
Starts, pauses or resumes playback.

■  
Stops the disc playback.

 ◀ / ▶  
Searches backward or forward through the disc.

 ◀ / ▶*  
Skips backward or forward chapters, titles or tracks on a disc.

Note(s)

● Pause may not work properly on some devices even if they are HDMI control (HDMI CEC) compliant.

CC  
Displays the audio portion of programming as text superimposed over the video.

 لكل (MUTE)  
Turns the sound on and off.

VOL + / –  
Adjusts the volume.

← (BACK)  
Returns to the previous menu screen.

≡ (TV GUIDE)  
Access to the Electronic Program Guide (EPG). 
It allows you to find channels and content easily.

❑ (FORMAT)*  
Adjusts the picture size on the TV screen.

SAP  
Selects audio mode (MONO / STEREO / SAP) / audio language.

NETFLIX  
Access directly to Netflix.

Continued on next page.
Control panel

1. Remote control sensor
   Receives IR signal from remote control.

2. CH + / –
   Selects a channel.

3. (POWER)
   Turns the TV on or switches the TV into standby mode.

4. (MUTE)
   Turns the sound on and off.

5. (INPUTS)
   Selects connected devices.

6. VOL + / –
   Adjusts the volume.
   VOL + : Volume up
   VOL – : Volume down

Terminals

7. 75 ohm Cable / Antenna connection
   Signal input from an antenna or Cable / Satellite set-top boxes.

8. Analog audio (L/R) input jacks
   Connect analog audio signals from;
   - HDMI-DVI / Analog audio (L/R) jacks signal
   - Composite video / Analog audio (L/R) jacks signal
   - PC connection / Analog audio (L/R) jacks signal with stereo mini 3.5mm plug audio cable on PC

9. Digital audio output (Optical) jack
   Digital audio (S/PDIF) output to home theaters and other digital audio systems.

10. Composite video (VIDEO) input jack
    Connect composite analog video signal.

11. Ethernet port
    For internet connection using an Ethernet cable with an RJ-45 connector.

12. HDMI input jack(s)
    Digital audio and video input from high definition digital devices such as DVD / Blu-ray Disc™ players, cable / satellite set-top boxes, PC’s, etc.
    * For HDMI 2 only
    In addition to normal HDMI and HDMI-DVI functionality, it outputs TV audio to an HDMI-ARC-compliant device, such as a home theater system.

13. Headphone audio output jack
    Headphone 3.5mm stereo jack for personal listening.

14. USB terminal
    Data input from USB memory stick only.

Note(s)

- This TV has a USB port which is designed for USB media playback or to connect peripheral devices, such as a keyboard or mouse. While you may find that a particular keyboard or mouse works to some extent, we cannot guarantee full functionality. You will not damage the TV in any way by trying various keyboards or mice, but the performance of that device may be limited.

Continued on next page.
Connecting antenna or cable / satellite / IPTV set-top box

Be sure your antenna or another device is connected properly before plugging in the AC power cord.

If connecting to an antenna through an RF cable

Any DTV programs that are broadcast in your area can be received for free through an antenna connection.

If connecting cable / satellite / IPTV set-top box using an RF cable

If the TV is connected to a cable / satellite set-top box via a coaxial connection, set the TV to channel 3/4 or the channel specified by the service provider.

If connecting cable / satellite / IPTV set-top box using an HDMI cable

If the TV is connected to a cable / satellite set-top box via an HDMI cable, make sure you select the correct source by using (INPUTS).

Note(s)

- If you have any question about the DTV's antenna, visit www.antennaweb.org for further information.
- Depending on your antenna system, you may need different types of combiners (mixers) or separators (splitters) for HDTV signal. The minimum RF bandpass on these devices is 2,000MHz or 2GHz.
- For your safety and to avoid damage to this unit, please unplug the RF coaxial cable from the antenna input jack before moving the unit.
- If you did use an antenna to receive analog TV, it should also work for DTV reception. Outdoor or attic antennas will be more effective than a set-top box or inside antenna.
- To turn on your reception source easily between antenna and cable, install an antenna selector.
- If you are not receiving a signal from your cable service, contact the cable provider.

Plugging in the AC power cord

Make sure that the AC power cord must be plugged to an AC outlet after all the necessary connections are made.

Caution(s)

- Connect the analog audio signal cables from the external device to the analog audio L/R input jacks.
- If you have an amplifier, connect the HDMI cable to the HDMI input via your amplifier.

Note(s)

- Each time you plug in the AC power cord, no operations will be performed for several seconds. This is not a malfunction.
No included cables are used with these connections:
• Please purchase the necessary cables at your local store

Before you connect the AC power cord:
Be sure other devices are connected properly before plugging in the AC power cord.

Selecting your connection quality

HDMI – Highest quality

![HDMI cable](image)

Supports high-definition digital signals and gives highest picture and sound quality. Video and audio signals are combined in one cable. You must use HDMI for full high-definition video and to enable HDMI control (HDMI CEC).

Note(s)
• Philips HDMI supports HDCP (High-bandwidth Digital Contents Protection). HDCP is a form of digital rights management that protects high-definition content in Blu-ray Disc™ or DVDs.
• The HDMI-ARC connector on the TV features HDMI-ARC functionality. This allows output of TV audio to an HDMI-ARC-compliant device.

Composite – Basic quality

![Composite video cables](image)

For analog connections. Composite video / Audio analog cable usually combine a yellow video cable with red / white audio (L/R) cables.

Note(s)
• Some HDMI cables and devices may not be compatible with the TV due to different HDMI specifications.
• Use an HDMI cable with the HDMI logo (a certified HDMI cable). High speed HDMI cable is recommended for the better compatibility.
• The unit accepts 480i, 480p, 720p, 1080i, 1080p, 2160p 24/30/60Hz of video signals, 32kHz / 44.1kHz and 48kHz of audio signals.
• This unit accepts LPCM, AC-3, DD+ audio signal.
• This unit accepts only signals in compliance with CTA-861-G.

Connecting your devices

HDMI digital connection

HDMI connection offers the highest picture quality. HDMI (High-Definition Multimedia Interface) transports high-definition digital video and multi-channel digital audio through a single cable.

Note(s)
• If there are issues with picture/color and/or sound when connecting an external device using the HDMI port, please try switching the HDMI EDID Version. (Refer to HDMI EDID Version → p. 16)
• Some HDMI cables and devices may not be compatible with the TV due to different HDMI specifications.
• Use an HDMI cable with the HDMI logo (a certified HDMI cable). High speed HDMI cable is recommended for the better compatibility.
• The unit accepts 480i / 480p / 720p / 1080i / 1080p / 2160p 24/30/60Hz of video signals, 32kHz / 44.1kHz and 48kHz of audio signals.
• This unit accepts LPCM, AC-3, DD+ audio signal.
• This unit accepts only signals in compliance with CTA-861-G.

HDMI-DVI connection

This unit can be connected to a device that has a DVI terminal. Use an HDMI-DVI conversion cable for this connection and it requires audio cable for analog audio signal as well.

Note(s)
• Some HDMI cables and devices may not be compatible with the TV due to different HDMI specifications.
• Use an HDMI cable with the HDMI logo (a certified HDMI cable). High speed HDMI cable is recommended for the better compatibility.
• The unit accepts 480i / 480p / 720p / 1080i / 1080p / 2160p / 30/60Hz of video signals.
• When connecting with HDMI-DVI, the operation is maximum 2160p@30Hz.
• HDMI-DVI connection requires separate audio connections as well and the audio signals are output as analog (L/R) audio.
• DVI does not display 480i image which is not in compliance with CTA-861-G.
**HDMI-ARC connection**

HDMI-ARC allows you to use HDMI control to output TV audio directly to a connected audio device, without the need for an additional digital audio cable.

![HDMI cable connecting to a digital home theater amplifier that supports HDMI-ARC](image)

**Note(s)**

- The HDMI 2 connector is HDMI Audio Return Channel (ARC) compliant. Use it to output digital audio to an HDMI home theater system.
- Be sure that the device is HDMI CEC and ARC compliant and that the TV is connected to the device using an HDMI cable attached to HDMI-ARC connectors.

**HDMI EDID Version**

If there are issues with picture/color and/or sound when connecting an external device using the HDMI port, please try switching the HDMI mode following the instructions below.

1. Press (HOME) to display the Home menu.
2. Use ▲▼◄► to select Settings, then press OK.
3. Use ▲▼ to select Inputs, then press OK.
4. Scroll down to HDMI EDID Version and select HDMI1, HDMI2 (ARC) or HDMI3, then press OK.
5. Select EDID 2.0 for 4K@60 Hz or HDR signals. Select EDID 1.4 for legacy devices that output 4K@30HZ or less with no HDR.

![HDMI EDID Version](image)

**Note(s)**

- EDID 1.4 is used for legacy devices that can output in 2K or 4K @30Hz.
- EDID 2.0 is used for modern devices that can output 4K @ 60Hz and 4K with HDR 10.

**Composite analog video connection**

Composite analog video connection offers standard picture quality for video devices connected to the unit.

If you connect to the unit’s composite video (VIDEO) input jack, connect audio cables to the audio (L/R) input jacks. When the audio is monaural, then only connect to the audio L input jack.

![Composite analog video connection](image)

**Connecting the TV to the internet using an Ethernet cable**

Connecting the TV to the internet using an Ethernet cable.

![Connecting the TV to the internet using an Ethernet cable](image)

**Note(s)**

- Please purchase shielded Ethernet cables at your local store and use them when you connect to network equipment.
- After connecting an Ethernet cable, set up necessary network settings.
- Do not insert any cable other than an Ethernet cable to the Ethernet port to avoid damaging the unit.
- If your telecommunications equipment (modem, etc.) does not have broadband router functions, connect a broadband router.
- If your telecommunications equipment (modem, etc.) has broadband router functions but there is no vacant port, then add a hub.
- For a broadband router, use a router which supports 10BASE-T / 100BASE-TX.
- Do not connect your PC directly to the Ethernet port of this unit.

Continued on next page.
Connecting the TV to the internet using a wireless LAN

- Network provisioning equipment
- Broadband router
- LAN cable
- WLAN
- Ethernet

**Note(s)**
- After you make the wireless connection, set up the necessary network settings. [Network p. 22](#)
- Use a wireless LAN Access Point (AP) (e.g., broadband wireless router) which supports IEEE 802.11 a/b/g/n/ac. (n is recommended for stable operation of the wireless network.)
- This unit does not support Ad-hoc mode.
- Other radio devices or obstacles may cause interference to the wireless network connection.

Digital audio output connection

If you connect this unit to an external digital audio device, you can enjoy multi-channel audio like 5.1ch digital broadcasting sound. Use a digital audio optical cable to connect the unit to external digital audio devices.

**Note(s)**
- To enable audio output from the optical cable, go to [Settings > Sound > Speakers](#). It must be set to Digital audio output.

PC connection

Should mention that PC content can also be sent to the TV via GoogleCast compatible apps such as Chrome and many others. PC content can also be sent to the TV via any Google Chromecast compatible application. See [https://store.google.com/product/chromecast_apps](https://store.google.com/product/chromecast_apps) for details.

HDMI connection

This unit can be connected to your PC that has an HDMI terminal. Use an HDMI cable for this digital connection.

**HDMI-DVI connection**

This unit can be connected to your PC that has a DVI terminal. Use an HDMI-DVI conversion cable for this video digital connection and it requires stereo mini 3.5mm plug audio cable for analog audio signal as well.

The following PC-input video signals can be displayed:

<table>
<thead>
<tr>
<th>Format</th>
<th>Resolution</th>
<th>Refresh rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>VGA</td>
<td>640 x 480</td>
<td>60Hz</td>
</tr>
<tr>
<td>SVGA</td>
<td>800 x 600</td>
<td></td>
</tr>
<tr>
<td>XGA</td>
<td>1,024 x 768</td>
<td></td>
</tr>
<tr>
<td>WXGA</td>
<td>1,280 x 768</td>
<td></td>
</tr>
<tr>
<td>FHD</td>
<td>1,920 x 1,080</td>
<td>24/30/60Hz</td>
</tr>
<tr>
<td>UHD</td>
<td>3,840 x 2,160</td>
<td>24/30/60Hz</td>
</tr>
</tbody>
</table>

Other formats or non-standard signals will not be displayed correctly.

- When connecting with HDMI-DVI, the operation is maximum 2160p@30Hz.

**Note(s)**
- Please purchase a HDMI-DVI conversion cable that has a ferrite core.
- The following operations may reduce noise:
  - Attach a ferrite core to the AC power cord of your PC.
  - Unplug the AC power cord and use the built-in battery of your portable / laptop PC.
- Some HDMI cables and devices may not be compatible with the TV due to different HDMI specifications.
- Use an HDMI cable with the HDMI logo (a certified HDMI cable). High speed HDMI cable is recommended for the better compatibility.
- The unit accepts 480i, 480p, 720p, 1080i, 1080p and 2160p video signals only when using the HDMI connection and HDMI-DVI connection. When connecting with HDMI-DVI, the operation is maximum 2160p@30Hz.
- HDMI-DVI connection requires separate audio connections as well and the audio signals are output as analog (L/R) audio.
- DVI does not display 480i image which is not in compliance with CTA-861-G.
3 Use your TV

Switching on your TV and putting it in standby mode

Turns the TV on and off of standby.
- Press (POWER) on the TV or the remote control.

Note(s)
- Energy consumption contributes to air and water pollution. When the AC power cord is plugged in, your TV consumes energy with a very low standby power consumption.

Adjusting volume

To decrease or increase volume
- Press VOL + / – on the TV or the remote control.
  VOL + : Volume up
  VOL – : Volume down

To mute or unmute sound
- Press (MUTE) on the TV or the remote control to mute the sound.
- Press (MUTE) again or VOL + / – to recover the original sound.

Switching channels

To change channels, you can do any of the following:
- Press CH + / – on the TV.
- Press CH + / –* on the remote control.
- Use the NUMBER buttons* on the remote control.
- Press ▲▼ on the remote control for digital channels only.

* Depending on the type of remote control, these buttons may not be present.

Watching channels from an external device

Switching each input mode can easily switch with the remote control between TV and external devices when they are connected to the unit.

1. Turn on the set-top box or the connected device.
   ① Press (INPUTS) and use ▲▼ to select the set-top box or the connected device and wait a few seconds till the picture appears.

   ② Use the remote control of the set-top box or the connected device to select channels.
Access the Home menu

1. Press (HOME).

Guide to Home menu

From the Android TV home screen, you can easily access movies, TV shows, music, apps, input devices, settings, and more.

To go back to the home screen at any time, press (HOME) on your remote control.

1. **Google Assistant**: Activates your personal Google Assistant. Type or speak to search for content, control your TV, manage your smart home devices, and more.
2. **Source**: Toggle inputs between your favorite source devices.
3. **e-Help**: Online help videos and tutorials.
4. **Settings**: Configure your television settings and connect to wireless devices.
5. **Apps**: Apps gallery. You must sign in with a Google account to visit and download apps from the Google Play store.
6. **How to rearrange channels**: Within the row, you want to rearrange, press (J) on your remote control. To rearrange channels, select arrow (▲ ▼) icon, and press OK. Use ▲ ▼ to move up or down. Press OK.
7. **Install additional apps**: Select the “+” and click on the Google Play Store to expand your entertainment library.
8. **How to move or delete applications**: Select the application and long press OK on your remote control. To move, select Move in the list, and press OK. Use ◀► to move left or right. Press OK.
9. **Installing**: Select the app, and press OK to launch Google Assistant. You can operate what you want to do and what you want to ask by hands-free.

Mic

1. Activating the Google Assistant on the home screen will launch a Google Query.
   - Activating the Google Assistant within an app will allow you to search and find information only related to a specific app.

2. Speak into the microphone located on the top of your remote control. Speech examples may be displayed depending on your model. Refer to the Google web site (https://support.google.com/assistant/) for more information on what to ask.

TV screen information

You can display the currently selected channel or other information.

1. Press (INFO).

Note(s)

- The information display will automatically disappear in 5 seconds. This information is for cable/antenna broadcasts only. Information for streaming apps will vary on the app.
Using options menu

You can access some TV settings directly by using OPTIONS.

1. Press OPTIONS to display options menu, then press OK.
2. Use ▲▼◄► to select a desired setting, then press OK.

Picture style

Following settings can be configured:
- Standard
- Natural
- Vivid
- Sports
- Movie
- Game
- Energy saving

Picture ➔ p. 25

Picture format

The items displayed depending on the input terminal and the reception resolution are different:
- 4:3
- Wide screen
- Full
- Unscaled

Picture ➔ p. 25

Closed captions

This item displays only when captions are on the streaming:
- Off
- On
- CC w/ mute

Multi audio

- Language list
  This item is displayed when DTV broadcasting is received.
  - Mono
  - Stereo
  - SAP
  This item is displayed when ATV broadcasting is received.

Speakers

Sleep time
- Off
- 10 minutes
- 20 minutes
- 30 minutes
- 60 minutes
- 90 minutes
- 120 minutes
- 180 minutes
- 240 minutes

Picture off

Select Picture off, the TV screen is switched off, to switch the TV screen back on, press any key on the remote control.

Settings

See Getting more from your TV ➔ p. 21
4 Getting more from your TV

This section describes the overview of the Settings menu displayed when you press \textit{(HOME)} and use \texttt{HIJK} to Select Settings.

The Settings menu consists of the function setting items below.

1. Press \texttt{(HOME)} to display the Home menu.
2. Use \texttt{HIJK} to select Settings, then press \texttt{OK}.
3. Use \texttt{HIJK} to select the desired menu and an item, then press \texttt{OK}.

<table>
<thead>
<tr>

<td>Off</td>
<td>If you do not use a wireless LAN Access Point (AP), select Off.</td>
</tr>
</tbody>
</table>

Connect via WPS
Please select if you are using WPS compatible wireless router.

1. Press the WPS button on your router.

Add new network
Add new network. You can add wireless network.

Scanning always available
Let Google’s location service and other apps scan for networks, even when Wi-Fi is off.

Connected
Display the connection status of the wired LAN.

Proxy settings
Set Proxy manually.

IP settings
Configure the IP setting for your network connection.

Channel
Be sure the RF cable is correctly connected to this unit and you are registered with your cable TV provider when you install cable channels.

1. Press (HOME) and use ▲▼◄► to select Settings then press OK.
2. Use ▲▼◄► to select Channel, then press OK.

Channel sources

Parental controls
You can restrict your children from watching certain programs or channels, by setting parental controls using a rating lock.

1. Use ▲▼ to select Parental controls, then press OK.
2. Use ▲▼ to enter the 4-digit numbers for your PIN code.
   - When the PIN code is not set, register and confirm the PIN code.
   - When the PIN code is correct, Parental controls menu is displayed.

Note(s)
- When you select the higher rating and set it to 3, the lower ratings will be blocked automatically.
- RRT5 setting will be available when the unit receives a digital broadcast using the new rating system.
- To block any inappropriate programs, set your limits in United States, United States (Film ratings) and RRT5 setting.
- For the United States, the unit may download the region ratings lock table, if required.
- The Canadian rating systems on this unit are based on CEA-766-A and CRTC policy.
Setting TV and film ratings

Film ratings lock is the rating system created by MPAA. TV ratings lock has controlled access to individual programs based on their age ratings and content rating.

3 Use ▲▼ to select Program restrictions, then press OK.

4 Use ▲▼ to select Ratings, then press OK repeatedly to switch between block and view.

Note(s)
- The V-Chip can block non rated programs as per “CEA-608-E sec. L.3” if the option to block UNRATED NR TV-UNRATED TV-NONE or E programs are used in United States (Film ratings) United States. Canada or Canada (French) accordingly “unusual results may occur and the unit may not receive emergency bulletins or other types of programming” / Emergency bulletins (Such as EAS messages, weather warnings and others) / Locally originated programming / News / Political / Public service announcements / Religious / Sports / Weather.
**Change pin**

1. Use ▲▼ to select **Change pin**, then press **OK**.
2. Use ▲▼ to enter the current 4-digit PIN code.
3. Use ▲▼ to enter the new 4-digit PIN code.
   - Enter PIN code again to confirm.

**Caution(s)**

- If you have forgotten the current 4-digit PIN code, you can reset the code by performing **Factory data reset**. (Refer to **Storage & reset** p. 27)
- **Factory data reset** will erase all data from your TV’s internal storage, including your Google account, system and app data and settings, and downloaded apps.

**Note(s)**

- Make sure new PIN code and confirm PIN code must be exactly the same.
- If they are different, the space is cleared for reentering.

**Multi audio**

You can select the audio language while your TV is receiving the digital broadcasting.

1. Use ▲▼ to select **Multi audio**, then press **OK**.

</tr>
<tr>
<td>CC w/ mute</td>
<td>Closed caption is displayed when the sound is off.</td>
</tr>
</tbody>
</table>

Caption service

| CC-1 and T-1 | The primary closed captions and text services. The closed captions or text is displayed in the same language as the program’s dialog (up to 4 lines of script on the TV screen). |
| CC-3 and T-3 | Serve as the preferred data channels. The closed captions or text is often a secondary language. |
| CC-2, CC-4, T-2 and T-4 | Rarely available and broadcasters use them only in special conditions, such as when CC-1 and CC-3 or T-1 and T-3 are not available. |

In addition to the basic closed caption, DTV has its own closed caption called digital caption service. Use this menu to change the settings for digital caption service.

Advanced selection

| CS-1 to CS-6 | Select one of these before changing any other item in Caption (Cable/Antenna) menu. Choose CS-1 under normal conditions. |

Picture display

- Text font (Font family, Text size, Text color and Text opacity)
- Text edge (Edge color and Edge type)
- Background (Background color and Background opacity)

• Review your setting choice made above by looking in the bottom left corner of the displayed setting box (not all selections show the differences selected).

Continued on next page.
• Caption service that you can switch differs depending on the broadcast description.
• Closed captioning service may not be controlled by this unit’s menu options if you are watching television through an external cable or satellite set-top box. In which case you will need to use the menu options on the external set-top box to control closed captioning.
• The captions do not always use correct spelling and grammar.
• Not all TV programs and product commercials include closed caption information. Refer to your area TV program listings for the TV channels and times of closed caption shows. The captioned programs are usually noted in the TV listings with service marks such as CC.
• Not all captioning services are used by a TV channel during the transmission of a closed caption program.
• Closed caption will NOT be displayed when you are using an HDMI or a component connection.
• To show the closed caption on your TV screen, broadcast signal must contain the closed caption data.
• Not all TV programs and commercials have the closed caption or all types of the closed caption.
• Caption’s and text may not exactly match the TV voice.
• Changing channels may delay the closed caption for a few seconds.
• Adjusting or muting the volume may delay the closed caption for a few seconds.
• Abbreviations, symbols and other grammatical shortcuts may be used in order to keep pace with the on-screen action. This is not a malfunction.
• The unit retains the closed caption setting if the power fails.
• When the unit receives special effects playback signal (e.g., search, slow and still) from a VCR’s video output channel (ch 3 or ch 4), the unit may not display the correct caption or text.

Audio description
Off / Minimum / Medium / Maximum
Audio description provides a narration of visual information when available and may be referred to as video description.

High contrast text
On / Off

TalkBack
TalkBack is the Google screen reader included on Android devices. TalkBack gives you spoken feedback so that you can use your device without looking at the screen.

Switch Access
Switch Access lets you interact with your Android device using one or more switches instead of the touch screen. Switch Access can be helpful for people with dexterity impairments that prevent them from interacting directly with the Android device.

Text to speech
Text to speech output settings.
To set On / Off of this function, select and set TalkBack.
Security & restrictions

Unknown sources
Allow installation of apps from sources other than the play store.

Verify apps
Disallow or warn before installation of apps that may cause harm.

Restricted Profile
Create restricted profile

To set up the restricted profile:

1. Press (HOME) and use ▲▼◄► to select Settings then press OK.
2. Use ▲▼ to select Security & restrictions, then press OK.
3. Use ▲▼ to select Create restricted profile, then press OK.
4. Enter a PIN code with the remote control.
5. In the list of available apps, select an app and press OK to allow or not allow this app.
6. Press ←(BACK) to go back one step.

Now you can enter the restricted profile.

With the PIN code, you can always change the PIN code or edit the list of allowed or not allowed apps.

Enter restricted profile
To enter switch to the restricted profile.

1. Press (HOME) and use ▲▼◄► to select Settings then press OK.
2. Use ▲▼ to select Security & restrictions, then press OK.
3. Use ▲▼ to select Enter restricted profile, then press OK.
4. After waiting for a while, it switches to the restricted home screen.

To return to the unrestricted mode, select Exit restricted profile from the Security & restrictions screen and enter the PIN code.

Allowed apps
Please select an available application.

Change pin
To change PIN code, please select here.

Delete restricted profile

Caution(s)
- Please select a PIN code you will always remember, or write down the PIN. If you forget the current PIN code, you will not be able to exit the restricted profile mode.
- Factory data reset can only be performed when NOT in the restricted profile mode.

Usage & Diagnostics

On / Off

Google account

[Account]
Register your Google Account.
You can use multiple Google Accounts on your TV. Unleash your television's true potential. With a Google™ account you can effortlessly expand your entertainment library via the Google Play Store and Google Play app and also keep apps up-to-date. You can enjoy this Philips Android TV even without a Google account. For example, you can watch Live TV programming, streaming applications such as Netflix, VUDU, YouTube and more.

Note(s)
- Simply login with your Google account.
- It is recommended to create a new Google account specifically for your Android TV. A new account will prevent interference and syncing of your personal account. To create a new Google account, visit http://accounts.google.com/signup on your smartphone, tablet, or computer.

# 5 Useful tips

## FAQ

<table>
<thead>
<tr>
<th>Question</th>
<th>Answer</th>
</tr>
</thead>
</table>
| My remote control does not work. What should I do?                     | • Check the antenna or cable connection to the main unit.  
• Check the batteries on the remote control.  
• Check if there is an obstacle between the infrared sensor window and the remote control.  
• Test the IR signal output use **IR signal check** ➔ p. 35  
  If okay, then possible infrared sensor trouble.  
• Aim the remote control directly at the infrared sensor window on the front of the unit.  
• Reduce the distance to the unit.  
• Re-insert or replace the AAA batteries with their polarities (+/–) as indicated on the remote control battery area.  
• When there is an infrared-equipped device such as PC near this unit, it may interrupt the remote control signal on this unit. Move the infrared-equipped device away from this unit, change the angle of the device’s infrared sensor or turn off the infrared communication function. |
| How come the initial setup appears every time I turn on this unit?      | • Make sure to complete the initial setup before the unit goes into standby mode.                                                                                                                      |
| Why can I not watch some RF signal TV programs?                         | • The selected channel may not be broadcasting.  
• The selected channel cannot be viewed by the **Parental controls** setting ➔ p. 22  
• The unit requires some kind of antenna input. An indoor antenna (Digital or VHF / UHF), an external antenna (Digital or VHF / UHF) or an RF coaxial cable from your wall cable or set-top box needs to be plugged into the unit. |
| How come there is no image from the connected external devices?         | • Check if the correct input is selected by pressing **INPUTS** ➔ p. 18  
• Check the antenna, cable or other input connection to the unit.                                                                                                                                         |
| When I enter a channel number, why does it change automatically?        | • Many digital channels have alternate channel numbers. The unit changes the numbers automatically to the ones signifying the broadcasting station’s channel number. These basic numbers used for the previous analog broadcasts. (e.g., input digital ch# 30 automatically changes to digital ch# 8.1) |
| Why are captions not displayed entirely? Or why are captions delayed behind the dialog? | • Closed captions that are delayed a few seconds behind the actual dialog are common for live broadcasts. Most captioning production companies can display a dialog to maximum of 220 words per minute. If a dialog exceeds that rate, selective editing is used to insure that the closed captions remain up-to date with the current TV screen dialog. |
| How can I set the clock?                                                | • From the Android TV home screen, select **Settings** in the upper right of the screen.  
  Scroll down to **Preferences** and select **Date & time**  
  Please set it automatically or manually.                                                                                                          |
Troubleshooting tips

If the unit does not perform properly when operated as instructed in this manual, please check the following Troubleshooting tips and all connections once before calling for service.

Power

- **No power**
  - Make sure the AC power cord is plugged in.
  - Make sure that the AC outlet supplies the proper voltage, plug another electrical appliance into the AC outlet to ensure that the AC outlet operates normally.
  - If a power failure occurs, unplug the AC power cord for 1 minute to allow the unit to reset itself.

Remote

- **Control buttons do not work.**
  - Do NOT press more than one button at the same time.
  - Ensure that no buttons on the remote control are depressed and move freely.
  - Re-insert or replace the AAA batteries with their polarities (+/-) as indicated on the remote control battery area.

Universal remote control does not work properly.

- Refer to the user manual of the universal remote control for the Philips code.
- (Google Assistant) microphone on the remote control does not work.
- To pair the remote control, refer to the step “6 Connecting your devices” in the Quick start guide and see “How to connect to your Bluetooth® devices”.

Performance

- **Remote response is delayed or sluggish during initial use.**
  - Your television is automatically downloading and installing the latest applications, for the best user experience.
  - During this time, you may experience a delayed response from your remote control. Upon successful installation, your remote control will operate normally.

Accessibility

- **Television is speaking prompts out-loud.**
  - To enable or disable the talkback (text to speech) on your television, press (HOME) on your remote control, navigate to settings (found in the upper right corner of the home screen) and select accessibility. Select talkback, press OK to toggle between on or off.
  - Shortcut: Press (OPTIONS) on your remote control seven times in rapid succession to enable text to speech.

Picture

- **Power is on but screen image is off.**
  - Check if the connection for your source device is properly secured.
  - Check if the correct input is selected by pressing (INPUTS).
  - Verify that your HDMI mode is set to your input selected matches the resolution output of your source device.
  - Change source input until you have picture and sound.

- **No sound is heard when using the HDMI digital connection.**
  - Some HDMI cables and devices may not be compatible with the TV due to different HDMI specifications.

- **No sound, distorted sound or incorrect audio sound is heard when using the HDMI-DVI connections.**
  - Make sure that the analog audio signals from the HDMI-DVI device are connected to the analog audio input L/R jacks.
  - When using Composite analog video, make sure that the analog audio (L/R) connectors are mounted into the audio (L/R) input jacks.

Sound

- **No sound is heard when using the HDMI digital connection.**
  - Some HDMI cables and devices may not be compatible with the TV due to different HDMI specifications.

- **No sound, distorted sound or incorrect audio sound is heard when using the HDMI-DVI connections.**
  - Make sure that the analog audio signals from the HDMI-DVI device are connected to the analog audio input L/R jacks.
  - When using Composite analog video, make sure that the analog audio (L/R) connectors are mounted into the audio (L/R) input jacks.

Sound intermittent or no sound.

- Check if the audio cable is connected into the unit correctly.
- You switch to a different input and the volume changes.
  - This unit will memorize the volume level from the last time you adjusted it.
  - If the volume of the sound from another device is higher or lower, then the loudness will change.
- Make sure Auto volume leveling is set to On ➔ p. 26

Picture & Sound

- **No sound with distorted picture occurs when using the HDMI digital connection.**
  - Some HDMI cables and devices may not be compatible with the TV due to different HDMI specifications.

- **No picture or sound**
  - Check if the power is on.
  - Check whether all the cables to the unit are correctly connected.
  - Unplug the AC power cord and turn on the unit again.
  - Check whether the connection of the antenna or cable / satellite set-top box is connected correctly.
  - Make sure that the selected input mode is connected to the working input jack.
  - Make sure that the sound is not muted. Press (MUTE) so that the volume loudness will change.
  - Make sure that the volume is NOT set to 0 or (MUTE). If so, use VOL + / – to adjust to the desired volume.
  - Make sure that the headphone is NOT connected to the headphone audio output jack.
  - Make sure that the TV speakers is NOT set to Off.
  - Please make sure that the speaker of the TV is not set for Digital audio output.
  - If there are issues with picture/color and/or sound when connecting an external device using the HDMI port, please try switching the HDMI EDID Version (Refer to HDMI EDID Version ➔ p. 16).

Adjusted Picture or Sound settings are not effective every time the unit is turned on.

- You need to turn off the Retail mode setting ➔ p. 28. (Otherwise, the settings you adjusted will not be memorized after the unit goes into standby mode.)

You see a distorted picture or hear an unusual sound. (Analog TV - NTSC signal)

- You may be getting NTSC (Analog) TV signal (not HDTV signal) interference from electrical appliances, automobiles, motorcycles or fluorescent lights.

- Try moving the unit to another location to see if this is the cause of the problem.

- **Ghosts, lines or streaks in picture.**
  - Electrical interference from nearby appliances may affect picture quality.
  - View other TV channels. The problem might be limited to the broadcasting station or weak signal strength.

- **Picture poor, sound intermittent or no sound**
  - View other TV channels. The problem might be limited to the broadcasting station or weak signal strength.

Screen

- You switch to a different input and the screen size changes.
  - This unit will memorize the viewing mode from the last time you used the particular input mode.
  - The display image does not cover the entire screen.
  - If you are watching TV or using the composite video or HDMI with 480i input, select Picture format, and then switch to various screen modes. (Refer to Picture format ➔ p. 20)

- **Different color marks on the TV screen**
  - View other TV channels. The problem might be limited to the broadcasting station, missing data or pixelation due to weak signal strength.

Continued on next page.
Closed captions
Closed captions are displayed as a white box. No closed captions are displayed in the closed captions-supported program.
- Interference from buildings or weather conditions may cause closed captions to be incomplete if watching analog TV signals.
- Broadcasting station may shorten the program to insert advertisements.
  The closed caption decoder cannot read the information of the shortened program.
Black box is displayed on the TV screen.
  - The text mode is selected for caption. Select CC-1, CC-2, CC-3 or CC-4.

Software update
A message appears on the screen prompting for software update again.
- When you start up the TV or a net service after executing the software update, a message may appear on the screen prompting for software update again. In this case, please execute the software update. (start from Settings > About > System update)

Network
Cannot connect to the network.
  - Check if the broadband router and/or modem is correctly connected
  - Check if the Ethernet cable connection is properly made. Turn on the broadband router and/or modem.
  - Check the network settings.

Sometimes video quality is poor when using the wireless LAN.
- The wireless network connection quality varies depending on the distance or obstacles (e.g. wall, basement, 2nd floor) between the TV wireless LAN adapter and the wireless router (access point), from other wireless networks, and brand and type of the wireless router (access point). When using the wireless LAN of the TV, it is suggested to place the wireless router as close as possible to the television.

Wireless LAN connection fails or wireless connection is poor.
- Check the installation location of the TV and wireless router (access point). Signal quality may be affected for the following reasons.
  - Interference of other wireless devices, microwaves, fluorescent lights, etc., are placed nearby.
  - There are floors or walls between the wireless router and TV.
  - If the problems continue even after checking the above, try making a wired LAN connection.

Cannot use the wireless connection.
- Check if the wireless LAN Access Point (AP) (e.g. wireless router) is oriented properly or not placed too close between them.
- Once you have activated the wireless connection please wait 30 seconds for the connection to be established after turning on the unit, before trying to access network features.

Slow Data Connection or buffering
- Check the settings between your router and ISP modem or gateway (if applicable).
- Connect to a stable wireless connection from home wireless or wired network.
- The use of mobile hot spots or public wireless connections is not recommended.

Cannot use Netflix feature.
- Check if the network connection is properly made.
- Visit http://www.netflix.com on your PC and become a Netflix member.
- Some network services may not be available in your country.

Cannot add movies or TV episodes to the Instant Queue.
- Visit www.netflix.com on your PC.
- Even though the speed of the internet connection improves during playback, the picture quality of Netflix streaming movie does not improve.
  - The picture quality does not change during playback. It differs depending on the speed of internet connection at the time of loading.

Cannot use VUDU feature.
- VUDU is available only in the United States.
- Check if the network connection is properly made.

Cannot rent or buy movies / TV episodes on VUDU.
- You need to activate the VUDU account. For detailed information, please visit the service providers website at http://www.vudu.com
- Log into your account at http://my.vudu.com and check your payment information.

The picture quality of a streaming movie (Netflix or VUDU) is poor.
- Check the speed of your internet connection. You need speeds of at least 8 Mbps to this player for high quality uninterrupted playback.

Streaming movie (Netflix or VUDU) often stops or starts buffering during playback.
- Contact your internet service provider to troubleshoot your internet connection for speed and line quality. Consistent line quality and speed are very important for internet video playback.

Cannot connect to the network while my PC is connected to the network.
- Check the content of your internet service contract to see if your internet service provider prevents multiple terminals connecting at the same time.

Cannot use WEP to connect to the access point.
- Connect the unit to the access point using scan or manual entry mode. If the access point’s security mode is set to WEP*, change the setting to others (recommended); then try WPS again. (For access point configuration, please consult its user manual or manufacturer.)
  - WEP is not recommended to be used due to its major security flaws.
  - Change the security protocol on the wireless router to others (recommended) mode.

Folder or files stored on home network media server are not displayed in the file list or cannot be played back.
- Check the setting on your home media server. (Refer to the user manual of the home media server.)
- Check the network connection and settings.

Note(s)
- The LCD screen is manufactured to provide many years of useful life. Occasionally a few non active pixels may appear as a fixed point of blue, green or red.
  - This is not to be considered a defect in the LCD screen.
- Some functions are not available in specific modes, but this is not a malfunction. Read the description in this manual for more details on correct operations.

For additional troubleshooting, refer to the Frequently Asked Questions or FAQs on www.philips.com/support.
Glossary

Analog TV (NTSC)
Acronym that stands for National Television Systems Committee and the name of analog broadcasting standards. Off the air analog TV signals are no longer being sent by major broadcasting stations in the USA.

ARC (Audio Return Channel) (HDMI 2 only)
HDMI-ARC allows you to use Philips HDMI control to output TV audio directly to a connected audio device, without the need for an additional digital audio cable. Be sure that the device is HDMI CEC and ARC compliant, and that the TV is connected to the device using an HDMI cable attached to both HDMI-ARC connectors.

Aspect ratio
The width of a TV screen relative to its height. Conventional TVs are 4:3 (in other words, the TV screen is almost square); widescreen models are 16:9 (the TV screen is almost twice as wide as its height).

CEC (Consumer Electronics Control)
This allows you to operate the linked functions between our brand devices with CEC feature and this unit. We do not guarantee 100% interoperability with other brands of CEC compliant devices.

Dolby Digital
The system developed by Dolby Laboratories to compress digital sound. It offers stereo sound (2ch) or multi-channel audio.

DTV (ATSC)
Abbreviation that stands for Advanced Television Systems Committee and the name of the digital broadcasting standards.

e-POP
e-POP is showing set features, technical information, etc on this TV set that is displayed on the TV screen mainly used by TV retailers. Previously the information was on a printed sticker that was put on the display.

HDMI (High-Definition Multimedia Interface)
Interface that supports all uncompressed, digital audio / video formats including set-top box, Blu-ray Disc™ / DVD recorder or digital television, over a single cable.

HDR
HDR stands for High Dynamic Range. By using additional data encoded with the source signal, HDR capable products offer greater contrast through an expansion of the range of the image’s color luminance. The source, cable and display must all support HDR.

HDTV (High-Definition TV)
Ultimate digital format that produces high resolution and high picture quality.

PIN code
A stored 4-digit number that allows access to parental control features.

SAP (Secondary Audio Program)
Second-audio channel delivered separately from the Main-audio channel. This audio channel is used as an alternate in bilingual broadcasting.

SDTV (Standard Definition TV)
Standard digital format that is similar to the analog TV picture quality.

6 Information

Maintenance

Cleaning
- Clean the front panel and other exterior surfaces of the unit with a soft microfiber cloth or lens brush. Before cleaning the panel, disconnect the AC power cord.
- Never use a solvent or alcohol. Do not spray insecticide liquid near the unit. Such chemicals may cause damage and discoloration to the exposed surfaces.
- Do not spray any liquids on the screen or other exterior surfaces of this unit. If liquids enter the unit, they could cause shorts, electric shocks or fire damage.

Servicing
Should your unit become inoperative, do not try to correct the problem yourself. There are no user serviceable parts inside. Call our toll free customer support line found on the cover of this user manual to locate an authorized service center.

IR signal check
If the remote control is not working properly, you can use a digital or cell phone camera to see if it is sending out an infrared signal.

Note: Some cameras may have an IR filter or dual camera cell phones may have an IR filter in one of the camera’s and both will not display the IR signal.

| Temperature | Operating temperature: 41°F (5°C) to 104°F (40°C) |

*Specifications are subject to change without prior notice.*
**LIMITED WARRANTY**

**ONE (1) YEAR**

**WARRANTY COVERAGE:**
This warranty obligation is limited to the terms as set forth below.

**WHO IS COVERED:**
This product warranty is issued to the original purchaser or the person receiving the product as a gift against defects in materials and workmanship as based on the date of original purchase (“Warranty Period”) from an Authorized Dealer. The original sales receipt showing the product name and the purchase date from an authorized retailer is considered such proof.

**WHAT IS COVERED:**
This warranty covers new products if a defect in material or workmanship occurs and a valid claim is received within the Warranty Period. At its option, the company will either (1) repair the product at no charge, using new or refurbished replacement parts, or (2) exchange the product with a product that is new or which has been manufactured from new, or serviceable used parts and is at least functionally equivalent or most comparable to the original product in current inventory, or (3) refund the original purchase price of the product.

Replacement products or parts provided under this warranty are covered against defects in materials and workmanship from the date of replacement or repair for ninety (90) days or for the remaining portion of the original product’s warranty, whichever provides longer coverage for you. When a product or part is exchanged, any replacement item becomes your property and the replaced item becomes company property.

When a product or part is exchanged, any warranty that remains on the replaced product or part is void, and the replacement product or part becomes subject to whatever remaining warranty applies at that time.

This warranty does not cover: • Shipping charges to return defective product. • Labor charges for installation or setup of the product, adjustment of customer controls on the product, and installation or repair of antenna/signal source systems outside of the product. • Product repair and/or part replacement because of improper installation or maintenance, connections to improper voltage supply, power line surge, lightning damage, retained images or screen markings resulting from viewing fixed stationary content for extended periods, product cosmetic appearance items due to normal wear and tear, unauthorized repair or other cause not within the control of the company. • Damage or claims for products not being available for use, or for lost data or lost software. • Damage from mishandled shipments or transit accidents when returning product. • A product that requires modification or adaptation to enable it to operate in any country other than the country for which it was designed, manufactured, approved and/or authorized, or repair of products damaged by these modifications.

**WHAT IS NOT COVERED - EXCLUSIONS AND LIMITATIONS:**
This Limited Warranty applies only to new company manufactured products that can be identified by the trademark, trade name, or logo affixed to it. This Limited Warranty does not apply to any hardware product or any software, even if packaged or sold with the product, as manufacturers, suppliers, or publishers may provide a separate warranty for their own products packaged with the bundled product.

The company is not liable for any damage to or loss of any programs, data, or other information stored on any media contained within the product, or other additional product or part not covered by this warranty. Recovery or reinstallation of programs, data or other information is not covered under this Limited Warranty.

This warranty does not apply (a) to damage caused by accident, abuse, misuse, neglect, misapplication, or non-supplied product, or (b) to damage caused by service performed by anyone other than the company approved Authorized Service Location, or (c) to a product or a part that has been modified without written company permission, or (d) if any serial number has been removed or defaced, or (e) product, accessories or consumables sold “AS IS” without warranty of any kind by including refurbished product sold “AS IS” by some retailers.

This warranty gives you specific legal rights. You may have other rights which vary from state/province to state/province.

Funai Service Corporation, 2425 Spiegel Drive, Groveport, OH 43125, USA
Funai Corporation, Inc. hereby offers to deliver, upon request, a copy of the complete corresponding source code for the copyrighted open source code packages, on an “AS IS” basis, used in this product for which such offer is requested by the respective licenses. This offer is valid up to three years after the product purchase to anyone in receipt of this information. To obtain source code, please contact Funai Corporation, Inc. You should write to Funai Service Corporation OSS Request, 2425 Spiegel Drive, Groveport, OH 43125, USA. Funai Corporation, Inc. disclaims any and all warranties and representations with respect to such software and related source code including quality, reliability, usability, and accuracy, and further disclaim all express, implied, statutory or otherwise, including without limitation, any implied warranties of title, non-infringement, merchantability, or fitness for a particular purpose. Funai Corporation, Inc. shall not be liable to make any corrections to the open source software or source code or to provide any support or assistance with respect to it. Funai Corporation, Inc. disclaims any and all liability arising out of or in connection with the use of this software and/or source code.
This product has been manufactured by and is sold under the responsibility of Funai Corporation, Inc., and Funai Corporation, Inc. is the warrantor in relation to this product.
