Our entire product range is thoroughly tested, controlled and certified (ISO 9001, ISO 14001 and QSO 9000) to the highest ECE requirements. Put simply, this is quality you can trust.

#### **Rewarded Car lamps**

Our lamps are often rewarded by automotive experts

#### **Distinctive blue effect**

Thanks to a color temperature of 6000 K Xenon BlueVision ultra provides the most demanding drivers with a distinctive cool bluish light for an ultra powerful lighting on the road.

#### **Maximum style**

Xenon BlueVision ultra lamps are designed for drivers looking for maximum style. It delivers distinctive blue effect light in your car headlamps.

# **Original Xenon technology**

Xenon HID (High Intensity Discharge) lamps offer twice as much light for safer driving in all conditions. As a mattter of fact, the intense white light produced by the Xenon HID lamps is comparable to daylight. Studies have demonstrated that xenon automotive lighting helps drivers to concentrate on the road and to distinguish obstacles and road signs much faster than traditional lamps.

#### **UV** Resistant

Philips special anti-UV coating technology protects the headlights against harmful ultraviolet radiation, making Philips UV-coated quartz glass perfect for all driving conditions and ensures their longevity

#### High quality quartz glass

UV-Quartz glass is stronger than hard glass and highly resistant to temperature extremes and vibrations, which eliminates the risk of explosion. Philips quartz-glass lamps are able to withstand severe thermal shock. With the capability of increased pressure inside the lamp, UV-quartz glass is able to produce a more powerful light.

### Resistance against humidity

Only a burning bulb made of quartz glass can resist thermal shocks: if a drop of cold water touches the hot bulb, which can happen when you drive through water with a broken headlight unit.
