AD752

## Music from your iPod/iPhone wirelessly

Built-in with Bass Reflex speakers, this sleek docking system delivers rich, deep bass and powerful sound. Its smart dock lets you charge your iPod/iPhone without the need to remove its protective casing.

### **Rich and clear sound**

- Play and charge your iPod/iPhone simultaneously
- Bass Reflex Speaker System delivers a powerful, deeper bass
- 20W RMS total output power

### **Easy to use**

- Bluetooth wireless music streaming from iPod/iPhone
- Dock any iPod/iPhone, even in its case
- Auto clock synchronization with iPod/iPhone when docked
- MP3 Link for portable music playback

# PHILIPS

## Highlights

### Bluetooth music streaming

Bluetooth is a short range wireless communication technology that is both robust and energy-efficient. The technology allows easy wireless connection to other Bluetooth devices, so you can play your favorite music from your iPod or iPhone on your Philips audio system - conveniently, anytime you want.

### Bass Reflex Speaker System

Bass Reflex Speaker System delivers a deep bass experience from a compact loudspeaker box system. It differs from a conventional loudspeaker box system in the addition of a bass pipe that is acoustically aligned to the woofer to optimize the low frequency roll-off of the system. The result is deeper controlled bass and lower distortion. The system works by resonating the air mass in the bass pipe to vibrate like a conventional woofer. Combined with the response of the woofer, the system extends the overall low frequency sounds to create a whole new dimension of deep bass.

### Play & charge your iPod/iPhone

Enjoy your favorite MP3 music while charging your iPod/iPhone! The dock lets you connect your

portable device directly to the Docking entertainment system so you can listen to your favorite music in superb sound. It also charges your iPod/iPhone while it plays so you can enjoy your music and not have to worry about your portable player battery running out. The Docking entertainment system automatically charges your portable device while it is docked.

### Dock iPod/iPhone in its case

Smartly designed spring-loaded docking port effortlessly accommodates any iPod or iPhone, without special adaptors. What's more, it works even when most protective cases are on – just dock your iPod or iPhone as it is. Now you can truly have fuss-free enjoyment of your music.

### Auto clock synchronization

When connect and dock, this docking system will automatically synchronize the clock with your iPod/iPhone within a few seconds. With this convenient feature, you do not need to set the time manually.

## Specifications

### iPod compatibility
