

Portable Radio AE1500

You can enjoy loud, good quality sound wherever you go with this pocket-size Philips AE1500 AM/FM pocket radio.

The light weighted portable product, with reduced use of PVC and brominated flame retardants, in packaging made of recycled paper improve the total environmental performance of this product compared to predecessors.

Our eco passport

Philips wants to make the world healthier and more sustainable. To make this a reality, we have to keep thinking differently; pushing the boundaries of what is currently believed possible. We continuously innovate and deliver products and technologies that are positive for people and the environment. At Philips we call this Green Innovation.

We know this is important to you too. So we have developed an eco passport which explains the environmental performance of our products in the six Philips Green Focal Areas, developed through our eco design process since 1994, enabling you to make conscious, informed decisions. An eco passport will explain the Green Focal Areas considered and applied in the specific product.
