AA/R6/LM-3
(not included)

General

- Material Polystyrene
- Weight (g) 390
- Dimensions (mm) 105 W x 105 H
x 96 D
- Packaging dimensions 195 W x 144 H
(mm) x 128 D
- Quantity/ mastercarton 6

Rotate clock to change the alarm sound

Personalize your wake-up sound by turning the clock in different positions.

Time display rotates with clock

Separate hour and minute display rotates as you turn the clock, and appears in correct orientation.

Wake up to sonar, frog, radio or buzzer

Gives you the choice of waking up to sonar, frog, radio station or alarm buzzer.

Gentle wake

Gentle Wake lets you customize your alarm volume to the level you need to wake up. When the wake-up time arrives, the alarm will switch on and the volume will gradually increase until the sound wakes you up.

Sleep timer

Sleep timer can be programmed to allow music to play for any period up to 60 minutes. Once the selected time period has expired, the clock switches to stand-by mode.

Battery low indicator and back-up alarm

Even when the battery is low, this clock will wake you up by changing to the battery low back-up alarm.
