- Material Polystyrene
- Weight (kg) 0.55
- Dimensions (mm) 200 W x 55 H
x 155 D
- Packaging dimensions 235 W x 73 H
(mm) x 178 D
- Quantity/ Mastercarton 6

Digital tuning with radio station presets

By allocating favourite radio stations a preset number, it's quick and convenient to return to them without having to remember frequencies.

Easy access radio presets

5-key interface for easiest possible radio station selection.

Backlit LCD with brightness control

The backlit display makes this clock easy to use even in the dark.

Dual alarm

Two alarms that can be set independently with the choice of waking up to your favourite music from the radio station or from the buzzer.

Gentle wake (increasing alarm volume)

Gentle wake lets you customise your alarm volume to the level you need to wake up. When the wake-up time arrives, the alarm will switch on and the volume will gradually increase until the sound wakes you up.

Sleep timer

Sleep timer can be programmed to allow music to play for any period up to 60 minutes. Once the selected time period has expired, the clock switches to stand-by mode.

Repeat alarm

Automatically resets the alarm for the same time on the next day, so you don't have to keep manually resetting the alarm.
