

Philips
Clock Radio

AJ3470

Digital tuner with 15 presets

This radio alarm clock has an extra large quartz display making it easier to see and control the time. The quartz clock ensures that the time stays correct even if the mains falls back a bit (up to 3 minutes self powered backup).

Your personal wake-up call

- Digital tuning with preset stations for extra convenience
- Wake up to your favorite radio tune or a buzzer

Easy to use

- Touch screen for easy navigation
- Two-Color Display for Current Time and Alarm Time
- Alarm Time Display shows you the wake-up call time
- Dual alarm time

Start the day your way

- Gentle wake for a pleasant wake up experience
- Sleep timer for easy falling asleep to your favorite music
- Repeat alarm for additional snooze

PHILIPS

Highlights

Digital tuning with presets

Simply tune into the station that you want to preset, press and hold the preset button to memorize the frequency. With preset radio stations that can be stored, you can quickly access your favorite radio station without having to manually tune the frequencies each time.

Wake up to radio or a buzzer

Wake up to sounds from your favorite radio station or a buzzer. Simply set the alarm on your Philips Clock radio to wake you with the radio station you last listened to or choose to wake up with a buzzer sound. When the wake up time is reached, your Philips Clock radio will automatically turn on that radio station or trigger the buzzer to sound.

Touch screen

Touch screen control allows you to control your device by simply pressing on-screen buttons rather than physical buttons on the device. Simply power up the device and the touch screen user interface will show up on the LCD display with all the control options for the device. Touch screen control combines LCD display technology with pressure sensors and a powerful digital micro processor. When you press on a specific area of the screen with your finger, the relevant signal is sent to the processor and the command is immediately executed.

2-Color Display for Time/Alarm

Two-Color Display is an LCD that displays the alarm time on an amber background and the current time on a backlit green background. The alarm time display is backlit only when the alarm is activated. Clear, easy-to-read LCD colors help to clearly distinguish between alarm time and current time displays. The green current time display is constantly backlit for emphasis and ease of use. Once the alarm is activated, the amber alarm time display will light up, immediately differentiating it from the current time display. No more mistakes changing the time when you want to set the alarm.

Alarm Time Display

Alarm Time Display always shows both the current time and the time that your alarm is set to go off. The constant display eliminates the need to press a button in order to check whether the alarm has been set and at what time it will go off. Alarm Time Display constantly reassures you that your alarm is set correctly and that it will wake you up at the intended time.

Dual alarm time

The Philips audio system comes with two alarm times. Set one alarm time to wake you up and the other to wake up your partner.

Gentle wake

Start your day right by waking up gently to a gradually escalating alarm volume. Normal alarm sounds with a preset volume are either too low to wake you up or are so uncomfortably loud that you are rudely jolted awake. Choose to wake up to your favorite music, radio station or buzzer alarm. Gentle wake's alarm volume gradually increases from subtly low to reasonably high in order to gently rouse you.

Sleep Timer

Sleep timer lets you decide how long you want to listen to music or a radio station of your choice before falling asleep. Simply set a time limit (up to 1 hour) and choose a CD or radio station to listen to while you drift off to sleep. The set will continue to play for the selected duration and then automatically switch off to a power-efficient, silent stand-by mode. Sleep Timer lets you fall asleep to your favorite CD or radio DJ without counting sheep or worrying about wasting power.

Repeat alarm

To counter oversleeping, the Philips Clock radio has a snooze feature. Should the alarm ring and you wish to continue sleeping a bit longer, simply press the Repeat Alarm button once and go back to sleep. Nine minutes later the alarm will ring again. You can continue to press the Repeat Alarm button every nine minutes until you turn off the alarm altogether.

Specifications

Sound

- Output power (RMS): 80mW
- Sound System: Mono
- Volume Control: Volume Control up/down

Tuner/Reception/Transmission

- Antenna: AM Antenna, FM Antenna
