Product highlights

CD playback and wake-up track

Digital tuning with presets

Touch Screen

Touch Screen Control allows you to control your device by simply pressing on-screen buttons rather than physical buttons on the device. Simply power up the device and the touch screen user interface will show up on the LCD display with all the control options for the device. Touch Screen Control combines LCD display technology with pressure sensors and a powerful digital micro processor. When you press on a specific area of the screen with your finger, the relevant signal is sent to the processor and the command is immediately executed.

Alarm Time Display

Alarm Time Display always shows both the current time and the time that your alarm is set to go off. The constant display eliminates the need to press a button in order to check whether the alarm has been set and at what time it will go off. Alarm Time Display constantly reassures you that your alarm is set correctly and that it will wake you up at the intended time.

Gentle Wake

Gentle Wake is a customizable volume control for your alarm that gently wakes you up at your preferred volume level instead of jolting you awake. Simply set 'start' and 'end' volume levels that you feel comfortable with and your CD, radio or buzzer alarm will gently bring you out of sleep, with an increasing volume, to a state of wakefulness. Gentle Wake allows you to easily personalize the volume range for your alarm.

Sleep Timer

Sleep Timer lets you decide how long you want to listen to music or a radio station of your choice before falling asleep. Simply set a time limit (up to 1 hour) and choose a CD or radio station to listen to while you drift off to sleep. The set will continue to play for the selected duration and then automatically switch off to a power-efficient, silent stand-by mode. Sleep Timer lets you fall asleep to your favorite CD or radio DJ without counting sheep or worrying about wasting power.

Repeat alarm

Dual alarm

Big display for easy reading
