CD playback and wake-up track

Gives you the choice of waking up to your favourite CD track, radio station or alarm buzzer.

Digital tuning with presets

By allocating favourite radio stations a preset number, it's quick and convenient to return to them without having to remember frequencies.

LCD touch screen control

Touch screen let's you control CD, radio and time/alarm set features.

Big display for easy reading

Big LCD ensures good visibility of the displayed information.

Dual alarm

Two alarms that can be set independently.

Alarm time display

A continuous display shows both the current time and the time that the alarm is set to go off, giving constant reassurance to the alarm user.

Gentle wake (increasing alarm volume)

Gentle Wake lets you customise your alarm volume to the level you need to wake up. When the wake-up time arrives, the alarm will switch on and the volume will gradually increase until the sound wakes you up.

Sleep timer

Sleep timer can be programmed to allow music to play for any period up to 60 minutes. Once the selected time period has expired, the clock switches to stand-by mode.

Repeat alarm

Automatically resets the alarm for the same time on the next day, so you don't have to keep manually resetting the alarm.
