Start the day your way

- Wake up to your iPod/ iPhone music or radio tunes
- Gentle wake for a pleasant wake up experience
- Dual alarm to wake you and your partner at different times

PHILIPS

Highlights

Dual alarm

The Philips audio system comes with two alarm times. Set one alarm time to wake you up and the other time to wake up your partner.

All-in-one remote control

With the Philips all-in-one remote control, you can now navigate both your Philips music system and your iPod/iPhone through hundreds of songs easily with the one simple press of the remote control. Displaying information listed according to playlist, album, artist, genre or track, the navigation offers speedy yet simple through hundreds of files. It allows one handed operation and guarantees a unique user experience.

Dock iPod/iPhone in its case

Smartly designed spring-loaded docking port effortlessly accommodates any iPod or iPhone,

without special adaptors. What's more, it works even when most protective cases are on – just dock your iPod or iPhone as it is. Now you can truly have fuss-free enjoyment of your music.

Auto clock synchronization

When connect and dock, this docking system will automatically synchronize the clock with your iPod/iPhone within a few seconds. With this convenient feature, you do not need to set the time manually.

Gentle wake

Start your day right by waking up gently to a gradually escalating alarm volume. Normal alarm sounds with a preset volume are either too low to wake you up or are so uncomfortably loud that you are rudely jolted awake. Choose to wake up to your favorite music, radio station or buzzer alarm. Gentle wake's alarm volume gradually increases from subtly low to reasonably high in order to gently rouse you.

Wake up to iPod/iPhone/radio

Wake up to your iPod/ iPhone music or radio tunes
