- Do not place the unit in direct sunlight or close to radiators, heaters etc.
- Do not expose the unit to rain or moisture.

CONNECTION

- Insert the red and the black plug of the audio connecting cable [8] in the corresponding sockets of the PHONO input of the main unit.
- Insert the plug of the supply lead [7] into the main unit.

CONTROLS

Fig. 1

- [1] adapter for 45 rpm records.
- [2] 33  SPEED  45 button, to select the speed.
- [3] REJECT button, to stop during playback.
- [4] LIFT   button.
To lift () and lower () the pick-up arm.
- [5] Pick-up arm lock.
- [6] dust cover hinges.
- [7] supply lead.
- [8] audio connecting cable.

SWITCHING ON AND OFF

- Switching on:
The record player receives power as soon as the main unit plug is inserted into the main unit.
- Switching off:
The motor stops as soon as the pick-up arm has returned to its rest. The player will continue to be under power as long as the plug is in the main unit and the main unit is on.

PLAYBACK

- Place the record on the turntable.
- Select the speed with the 33  SPEED  45 button [2] : 33 rpm = button not depressed, 45 rpm = button depressed.
- Remove the stylus protection cover (Fig. 2).
- Free the pick-up arm by releasing the pick-up arm lock [5].
- Press the LIFT   button [4] to the  position.
- Guide the pick-up arm above the desired position on the record.
- Press the LIFT   button [4] to let the stylus descend on the record.

Does the pick-up arm immediately return to its rest?

Then the REJECT button has accidentally been depressed before. As soon as the turntable has come to a standstill you may resume starting.

When the record has finished, the pick-up arm is automatically lifted from the record and will return to its rest. Obstruction of the movement of the pick-up arm should absolutely be avoided to prevent damage to the mechanism!

INTERRUPTING AND RESUMING PLAYBACK

- Press the LIFT   button [4].
The pick-up arm will then be lifted and kept clear of the rotating record.
- To resume playback press the LIFT   button [4] again.

STOPPING DURING PLAYBACK

- Press the REJECT button [3].
The pick-up arm is then automatically lifted from the record and will return to its rest.

RECOMMENDATION

When the record player is not in use it is advisable:

- To lock the pick-up arm on its rest by swinging the pick-up arm lock [5] over it.
- To replace the stylus protection cover (Fig. 2).

MAINTENANCE

The mechanism of the player has self-lubricating bearings and must not be lubricated. If necessary, the cabinet and the turntable mat can be cleaned with a chamois leather slightly moistened with water. Do not use cleaning agents.

The stylus is kept clean with a soft brush, if necessary moistened with some pure alcohol or cleaning spirit. Always strike the brush over the stylus in a direction moving from rear to front of the cartridge.

REPLACING THE STYLUS UNIT (Fig. 3)

Depending on the state of your records, you may count on a lifetime of between 1000-1500 hours. To be quite sure of avoiding damage, however, and to know in good time when the stylus should be replaced, it is advisable to have the stylus checked by your dealer once a year.

- Firmly hold the pick-up arm with one hand and carefully pull off the stylus carrier with the other.
- Continue to hold the pick-up arm and slide the new stylus carrier on until it comes to a stop.

ADJUSTING THE DUST COVER HINGES (Fig. 4)

As the dust cover is fitted with friction hinges, it can remain open in almost any position. If the friction effect decreases, it can be increased again by tightening the adjustment screws of the hinges a little. Do not tighten them too much, however, otherwise excessive force will have to be exerted on the cover. Do not lubricate the hinges.
