- Soft glow night light

#### Easy to use

- Discover, share music and more features via DockStudio app
- Songbird to discover, play and sync music between your PC and Android
- Smartly designed FlexiDock to fit/charge Android phone

# PHILIPS

# Highlights

## FlexiDock

The Philips FlexiDock is perfect for Android powered phones. Its unique design cleverly docks most Android powered phones - whether the phone's connection socket is at the bottom, on the side or even on the top. This extreme flexibility is the first of its kind, catering to Android powered phones that are made by different manufacturers with no standardised position and orientation for the micro USB connection socket. The dock is also adjustable to hold the phone in both portrait and landscape positions, letting you position your Android powered phone at the centre of the speaker.

## DockStudio app for Android

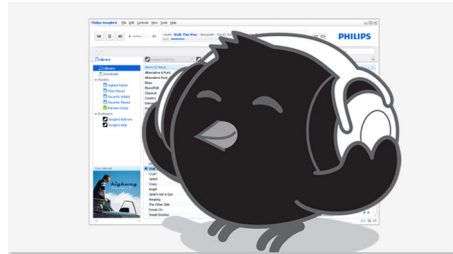

The free Philips DockStudio app brings a myriad of unique features to your docking speakers. You can listen to thousands of Internet radio stations worldwide, browse your music collection and share what you are listening to with friends via Facebook, or photos of the artist on Flickr. The app comes with Songbird music function, so you can discover, play and sync media seamlessly between PC and Android powered devices. In Clock mode, the app lets you set multiple customised music alarms and gives updated weather reports. Completely free, the app can be downloaded from Google play.

## Bluetooth music streaming

Listen to all your favourite songs on a speaker that delivers fabulous sound. This docking speaker plays music from your Android powered devices via Bluetooth. Simply download the free Philips DockStudio app and the Bluetooth will automatically be turned on and connect once when your device is docked. You get to enjoy powerful and outstanding sound, with unbeatable convenience. Hardly anything else sounds as good.

## Songbird music network

Songbird is a simple, easy-to-use PC program and Android app. It lets you discover and play all your media and sync it seamlessly with your PC. Its intuitive and powerful music management features let you discover new artists and music styles directly in the program through music and media shops, services and websites. Play your own library and media from the Internet and seamlessly sync all of it from your PC to your Android devices.

## Auto clock synchronisation

Simply connect your Android powered phone, and the docking speaker will automatically synchronise its clock's time with your phone's.
