

Philips
CD Soundmachine with
Dynamic Bass Boost

AZ1510

Direct track and station selection

You seek control of your music with ease and precision! The portable AZ1500's digital tuning with 40 presets let's you savor your favorite music, easily and quickly.

Easy to use and precise control

- Easy Access Keyboard for selecting tracks or radio stations
- Digital tuning with preset stations for extra convenience
- Stereo headphone socket

Impressive sound

- Dynamic Bass Boost for deep and dramatic sound
- Bass Reflex Speaker System delivers a powerful, deeper bass

Everything you need

- Compatible with CD-Recordable and CD-ReWritable
- CD Shuffle/Repeat for personalized music enjoyment

PHILIPS

Highlights

Easy Access Keyboard

The Easy Access Keyboard features a phone-style numerical keypad that is a simple and handy tool for selecting CD tracks, radio presets or tuning in to radio stations. Located conveniently at the front of the set, the ten numerical keys make selection and programming a simple one-touch operation. To select a specific track or choose a tuner preset, simply key in the track number or preset number using the keypad. Tune in to your favorite radio station by simply keying in the frequency. Easy Access Keyboard helps you select a specific track, tuner preset or your favorite radio station.

Digital tuning with presets

Simply tune into the station that you want to preset, press and hold the preset button to memorize the frequency. With preset radio stations that can be stored, you can quickly access your favorite radio station without having to manually tune the frequencies each time.

Stereo headphone socket

Connect your own headphone for a more personal listening experience whenever you want it. You can enjoy your favorite music in great sound without disturbing others by connecting your headphones to the player.

Dynamic Bass Boost

Dynamic Bass Boost maximizes your music enjoyment by emphasizing the bass content of the music throughout the range of volume settings - from low to high - at the touch of a button! Bottom-end bass frequencies usually get lost when the volume is set at a low level. To counteract this, Dynamic Bass Boost can be switched on to boost bass levels, so you can enjoy consistent sound even when you turn down the volume.

Bass Reflex Speaker System

Bass Reflex Speaker System delivers a deep bass experience from a compact loudspeaker box system. It differs from a conventional loudspeaker box system in the addition of a bass pipe that is acoustically aligned to the woofer to optimize the low frequency roll-off of the system. The result is deeper controlled bass and lower distortion. The system works by resonating the air mass in the bass pipe to vibrate like a conventional woofer. Combined with the response of the woofer, the system extends the overall low frequency sounds to create a whole new dimension of deep bass.

CD-R/RW Compatible

CD-Rewritable Compatible means that your audio set can play both CD-Recordable (CD-R) and CD-Rewritable (CD-RW) discs. CD-R discs are recordable once and can be played on any audio CD player while CD-RW discs can be recorded and rewritten multiple times and can only be played back on compatible audio CD players. The laser pick-up and CD decoder circuitry of CD-RW compatible players are specially designed to read the special audio CD-RW phase-change recording layer, ensuring you can always play your home-recorded discs on your audio CD system.

CD Shuffle/Repeat

The "Shuffle/Repeat" function helps you to get rid of the boredom of hearing your music played in the same order all the time. After loading your favorite songs to the player, all you have to do is to select one of the modes - "Shuffle" or "Repeat" for your tunes to be played in different modes order. Enjoy the different and unique music experience every time you hook up to your player.

Specifications

Sound

- Loudspeaker types: Bass Reflex Speaker System
- Output power (RMS): 2X1W
- Sound System: Stereo
- Speaker diameter: 4"
- Sound Enhancement: Dynamic Bass Boost
- Volume Control: Volume Control up/down
