- **Included Accessories:** AC Power Cord, User Manual, Warranty certificate
- **Remote control:** 14 keys

Dimensions

- **Packaging dimensions (W x H x D):** 475 x 211 x 260 mm
- **Product dimensions (W x H x D):** 405 x 162 x 232 mm
- **Weight:** 3.2 kg
- **Weight incl. Packaging:** 3.9 kg

Power

- **Battery voltage:** 1.5 V
- **Mains power**
- **Number of batteries:** 6
- **Battery type:** LR14

Product highlights

Easy Access Keyboard

The Easy Access Keyboard features a phone-style numerical keypad that is a simple and handy tool for selecting CD tracks, radio presets or tuning in to radio stations. Located conveniently at the front of the set, the ten numerical keys make selection and programming a simple one-touch operation. To select a specific track or choose a tuner preset, simply key in the track number or preset number using the keypad. Tune in to your favorite radio station by simply keying in the frequency. Easy Access Keyboard helps you select a specific track, tuner preset or your favorite radio station.

Dynamic Bass Boost

Dynamic Bass Boost maximizes your music enjoyment by emphasizing the bass content of the music throughout the range of volume settings - from low to high - at the touch of a button! Bottom-end bass frequencies usually get lost when the volume is set at a low level. To counteract this, Dynamic Bass Boost can be switched on to boost bass levels, so you can enjoy consistent sound even when you turn down the volume.

Bass Reflex Speaker System

Bass Reflex Speaker System delivers a deep bass experience from a compact loudspeaker box system. It differs from a conventional loudspeaker box system in the addition of a bass pipe that is acoustically aligned to the woofer to optimize the low frequency roll-off of the system. The result is deeper controlled bass and lower distortion. The system works by resonating the air mass in the bass pipe to vibrate like a conventional woofer. Combined with the response of the woofer, the system extends the overall low frequency sounds to create a whole new dimension of deep bass.

CD-R/RW Compatible

CD-Rewritable Compatible means that your audio set can play both CD-Recordable (CD-R) and CD-Rewritable (CD-RW) discs. CD-R discs are recordable once and can be played on any audio CD player while CD-RW discs can be recorded and rewritten multiple times and can only be played back on compatible audio CD players. The laser pick-up and CD decoder circuitry of CD-RW compatible players are specially designed to read the special audio CD-RW phase-change recording layer, ensuring you can always play your home-recorded discs on your audio CD system.
