- Handy remote control
- Line-in connection
- Stereo headphone socket

PHILIPS
sense and simplicity

Specifications

Sound

- Output power (RMS): 2x4W (Mains power), 2x2W (Battery)
- Sound System: Stereo
- Volume Control: Volume Control rotary/encoder
- Loudspeaker types: 2-way Bass Reflex Speaker
- Speaker diameter: 4"
- Sound Enhancement: Dynamic bass boost 2 steps

Audio Playback

- Loader Type: Top
- Playback Media: CD, CD-R, CD-RW, MP3-CD, WMA-CD
- Disc Playback Modes: Fast Forward/Backward, Next/Previous Track Search, Repeat Play, Shuffle Play
- Programmable Tracks: 20
- Number of decks: 1
- Cassette Deck Technology: Mechanical

Tuner/Reception/Transmission

- Auto digital tuning
- Station presets: 30
- Antenna: FM Antenna
- Tuner Bands: FM, MW

Connectivity

- Aux in: Line in
- Headphone: 3.5 mm

Convenience

- Display Type: LCD
- Remote control: 20 keys

Accessories

- Included Accessories: AC Power Cord, User Manual, Warranty certificate

Power

- Mains power
- Battery type: LR20
- Battery voltage: 1.5 V
- Number of batteries: 6

Dimensions

- Packaging dimensions (W x H x D): 493 x 210 x 314 mm
- Product dimensions (W x H x D): 435 x 174 x 263 mm
- Weight: 3.3 kg
- Weight incl. Packaging: 4.4 kg

2-step Dynamic Bass Boost

2-step Dynamic Bass Boost for a deeper bass experience

Bass Reflex Speaker System

Bass Reflex Speaker System delivers a deep bass experience from a compact loudspeaker box system. It differs from a conventional loudspeaker box system in the addition of a bass pipe that is acoustically aligned to the woofer to optimize the low frequency roll-off of the system. The result is deeper controlled bass and lower distortion. The system works by resonating the air mass in the bass pipe to vibrate like a conventional woofer. Combined with the response of the woofer, the system extends the overall low frequency sounds to create a whole new dimension of deep bass.

MP3-CD or WMA-CD playback

MP3 is a revolutionary compression technology by which large digital music files can be made up to 10 times smaller without radically degrading their audio quality. A single CD can store up to 10 hrs of music. MP3 has become the standard audio compression format, allowing quick and easy audio file transfer. Windows Media Audio (WMA) is a highly compressed digital audio format from Microsoft that delivers great sound with music files that take up half the disk space and download in half the time. A single CD can store up to 20 hours of good quality WMA music recorded at a bit rate of 64 Kbps.
