BATTERIES

- Open the battery door, take out the battery holder and insert as indicated four (preferably Alkaline) batteries, type R6, UM3 or AA-cells, see fig. 1. You may also use rechargeable Nickel-Cadmium batteries.

- Remove the batteries if exhausted or if they are not to be used again for a long period.

If BATT flashes in the display, the batteries (or rechargeable battery SBC 6411) are weak. If BATT lights up continuously, the battery voltage is too low and the CD player will soon shut down.

The battery supply is switched off when the 6 V DC socket is in use. When changing over to battery supply, pull out the plug from the 6 V DC socket.

Rechargeable battery SBC 6411, available from your dealer

Instead of normal batteries, you can use the rechargeable battery SBC 6411 (fig. 1). It can be charged in the CD player which is connected to the mains adapter. It can also be charged outside the CD player by connecting it directly to the mains adapter.

When the charging indicator on the rear of the battery goes out, the battery is 80% charged (after approx. 3 hours). After another 3 hours the battery will be fully charged.

If the CD-player is used during charging, the charging time will be longer.

- If the battery is not to be used for a long period, store it fully charged outside the CD player. Each battery, even when not in use, discharges slowly, so recharge the battery every 6 months to prevent it from being discharged completely.

MAINS ADAPTER SBC 6619 (fig. 2)

At home, you can use the mains adapter SBC 6619 (fig. 2), delivering 6 V/600 mA Direct Current, \ominus - \oplus , plus-pole to the centre pin.

- Connect the mains adapter to the 6 V DC socket and the wall socket. Remove the mains adapter from the wall socket when the CD player is not in use.

CONNECTIONS**Headphone socket PHONES**

- For headphones (or mini loudspeakers) with 3.5 mm plug, see 'Accessories'.

REMOTE socket

- For a remote control unit, see 'Accessories'.

CD OUT socket

- For CD reproduction at home through your stereo system (amplifier, receiver, recorder, etc.). Use the signal lead SBC 1059 (fig. 2) to connect the socket CD OUT to the input sockets LINE IN, AUX or CD IN of the other set.

- Adjust the sound with the controls of the stereo system.

IN-CAR USE

GB

- Using the Velcro tapes supplied, the CD player can easily be attached to and removed from a fixed place in your car. Find a good and safe place for the CD player, on a horizontal, vibration-free and stable surface where it is not dangerous or in the way of the driver or passengers. Avoid excessive heat from the car heating or from direct sunshine, e.g. when parking in the sun and avoid moisture, dust and dirt.
- To apply the Velcro tapes, do not separate them yet, but first remove the paper from one side and stick the tapes in the two rectangular recesses on the base of the CD player. Then remove the other paper and stick the CD player onto a horizontal and clean surface in your car.

Supply from the cigarette lighter socket

Use the voltage converter from the accessory kit SBC 3557MKII (fig. 2) for power supply from the cigarette lighter socket (*only for a 12 V car battery, negative grounding*). The converter delivers 6 V/500 mA Direct Current, \diamond - \ominus - \diamond plus-pole to the centre pin

- If your car radio is provided with a LINE IN socket, preferably connect this LINE IN socket with the CD OUT socket of the CD player using the signal lead SBC 1085 (fig. 2, not on all versions).
- For a car radio/cassette player without LINE IN socket, you can use the cassette adapter from the accessory kit SBC 3557 MKII (fig. 2) as follows:

 - Connect the cassette-adapter plug to the socket CD OUT of the CD-player.
 - Switch off the autoreverse function of the car cassette player (if present).

- To stop playback, press STOP . The display will show the total number of tracks present on the CD.
- The CD player also goes to position STOP:
 - when the end of the CD is reached;
 - when the CD cover is opened;
 - if the batteries run down or if the power supply is interrupted in another way.
- Open the CD cover only if the CD player is in STOP position.
- In the STOP position, the CD player automatically shuts down 10 seconds after the last command. Press PLAY  to reactivate the CD player.

When using an external power supply via the 6 V DC socket, the CD player enters the standby mode 10 seconds after the last command and the illumination extinguishes. To reactivate, press any CD-player or remote-control button.

Remarks

- If the batteries are exhausted, the CD player will not function normally, e.g. it will not start. Replace the batteries or use the mains adapter.

DYNAMIC COMPRESSION MAINTENANCE

DYNAMIC COMPRESSION

GB

When listening to a CD in noisy surroundings, you can hardly hear the quiet passages and if you turn up the volume, the loud passages become too loud.

In this case, switch on DYNAMIC COMPRESSION to compress the dynamics of the sound. The quiet passages will then be reproduced more loudly and the loud passages less loudly.

Under normal listening conditions, switch off DYNAMIC COMPRESSION to obtain the full dynamic range of the CD.

MAINTENANCE

- *Avoid excessive heat (maximum 50 °C), e.g. from the car heating or from direct sunshine, e.g. when parking in the sun.*
- *Do not expose the set, batteries or CD's to rain or moisture.*
- *Keep the set and the CD's away from sand.*
- The mechanism of the CD player is fitted with self-lubricating bearings and therefore must not be oiled or greased.
- Fingerprints, dust and dirt on the apparatus can be removed using a soft, clean and slightly damp leather cloth. Cleaning agents may damage the cabinet.
- The lens (⊗) (fig. 4) should never be cleaned.
- The lens may steam up when the set is taken from a cold into a warm environment. Playing a CD is then not possible. Do not clean the lens, but let the set acclimatize for a while.
- Always pick up the CD by the edge and put it back in its box immediately after use.
- To remove dirt from a CD, first breathe on the CD and wipe it off in a straight line from centre to edge (fig. 5) using a soft, lint-free cloth. The use of cleaning agents may damage the CD.

USE YOUR HEAD WHEN USING HEADPHONES

- **Hearing safety:** Do not play your headphones at a high volume. Hearing experts advise against continuous extended play. If you experience a ringing in your ears, reduce the volume or discontinue use.
 - **Traffic safety:** Do not use headphones while driving a vehicle. It may create a traffic hazard and it is illegal in many countries.
- Even if your headphones are an open-air type designed to let you hear outside sounds, do not turn up the volume so high that you cannot hear what is going on around you.
