Software History (BDP2900/F7)

The latest software improves the below:

NOTE: Each release contains all solutions identified in the earlier version.

System software version: v2.60

- Add an option called "PCM" under "HDMI Audio" in Setup Menu. User can select this option if there is no audio output when using Vudu or Netflix with some TVs.

System software version: v2.59

- Fix aspect ratio 4:3 issues of Netflix
- Enable Pandora feature

System software version: v2.52

- Update on Verance.

System software version: v2.47

- Improve playback performance
- Improve HDMI connection compatibility
- Fix the issue of not having no video on 720P TV

System software version: v2.42

- Improve performance of Wi-Fi installation
- Fix the MKV aspect ratio issue - 4:3/16:9 would display normally
- Compliance with new regulation from AACS (Advanced Access Content System) by implementing the Cinavia watermark content protection solution from Verance. With this Cinavia watermark implementation, the player will not be able to play unauthorized copied disc. For details on Cinavia protection technology, visit Cinavia Online Consumer Information Center (http://www.cinavia.com).
