

## Software history (BDP7700)

**The latest software improves the below:**

**NOTE:** Each release contains all solutions identified in the earlier version.

*Note:*

*The filename of the bin file may NOT necessary be the same as the model number.*

### System Software Version 4.02

- Fix hang up issue.
- In compliance with new AACCS requirements, Blu-ray playback via CVBS output is now disabled. Please watch your Blu-ray movies via HDMI connection.

### System Software Version 3.71

- Improve playability of 3D discs such as Prometheus, Rio 3D, Ice Age 3 and Ice Age 4.
- Improve CEC feature – if the player is connected to a TV via HDMI connection, switching on the player would also switch on the TV.

### System Software Version 3.53

- Fix for the following potential hang-up issues:
  - When factory restore is triggered from setup menu.
    - Going into standby.
    - Changing from “Browse PC” to Blu-ray/SmartTV playback (and vice-versa).
  - Potential hang-up while upgrading SW via USB.
- Fixes an issue where Philips TV's receive digital stereo audio via HDMI connection. (Please visit FAQ in the website for more information).
- Improvements for Russian on screen display:
  - Add ID3 tags in Russian
  - Keep Russia OSD in Skype after Standby
  - Add Russian text in Skype user profile
  - Improve Skype texts translation
  - Co translation in Russian OSD
- Improve playability for the following disc title:
  - My Bloody Valentine 3D
- German translation for Skype.

**Note:** After upgrading the firmware, follow the steps below to reset the device to factory settings:

1. Switch off the player.
2. Switch on the player.
3. Go to **Setup Menu** (Do not go to Easylink / Preferences).
4. On the remote control press **UP** to scrolled to **ADVANCED**.
5. In **ADVANCED**, select **RESTORE FACTORY DEFAULT**.
6. The player would automatically restart.

### System Software Version 3.46

- Correction on Russian translation in menu.
- Fix a bug when HDMI audio is set to bitstream mode.
- Acetrax and Maxdome video on demand service is available.

### System Software Version 3.34

- Enables support for 4k x 2k Full Quad HD HDMI TVs.

- Fixes the following issues:
  - USB device or SD card not detected by the player if Fast Wake-up mode is set to ON.
  - USB mouse icon not appearing in NetTV internet browser.
  - USB mouse icon not appearing in NetTV internet browser.

### **System Software Version 3.28**

- Additional French and Russian menu languages for Skype (VideoCall).
- Improved video de-interlacing.
- Improved support for Upnp and DLNA media servers.
- Fixes an issue where the BDP will hang-up in Setup menu (Easylink and Preferences) found in 3.17.
- General improvements in system stability.
- General improvements in Skype (VideoCall) user interface.

**Note:** VideoCall menu will not be active if there is no camera connected to the BDP and if there is no internet connection. To purchase a compatible Skype camera, visit: [www.freetalk.me/philips](http://www.freetalk.me/philips).

### **System Software Version: 3.17**

- VideoCall (Skype) is added to the home menu. Add a new dimension to your calls and contact your friends and relatives as if you are there. Simply plug in a selected\* Skype™ camera to your home theater or Blu-ray player and enjoy HD video and excellent sound quality from the comfort of your couch. Use your familiar list of Skype™ contacts from your current Skype™ account and start calling! Skype™ camera is sold separately. To purchase, visit: [www.freetalk.me/philips](http://www.freetalk.me/philips). Refer to the FAQ in the product support website for more information on how to use VideoCall.
- System stability improvement.
