

Software history (BDP9700)

The latest software improves the below:

NOTE: Each release contains all solutions identified in the earlier version.

System Software Version 4.42 (For BDP9700/12, /51, /79, /93, /98)

- Improved audio & video sync issue

System Software Version 4.39 (For BDP9700/12, /51, /79, /93, /98)

- Improve SACD playback performance.

System Software Version 4.38 (For BDP9700/12, /51, /79, /93, /98)

- Required version for upgrading to v4.42.
- To ensure smoothness of SmartTV performance and improve compatibility.

System Software Version 4.33

- Reduced standby time
- Remove Skype from Applications
- Fix the digital keyboard in SmartTV issue

System Software Version 4.31

- Improve the display and reading of MKV files
- Improve display of Disc Menu for 3D Blu-ray disc
- Add help text for Miracast in Network setup
- Improve Youtube searching function

System Software Version 4.22

- Improve Miracast setup and connectivity for devices running with Android OS 4.3.
- Fix small picture stuttering on some 3D Blu-ray discs.
- Fix no SACD text displayed when playing SACD layers.
- Support USB keyboards

System Software Version 4.21

- Miracast feature has been enabled in this SW release. You can now use a Miracast certified mobile device to stream to the BDP. For more information about the Miracast feature, please refer to the BDP9700 FAQ from the product support page.
- Fixes the following issues:
 - No picture via HDMI when used with certain TV's.
 - Playback via HDMI sometimes loses sound after skipping chapters during

BD/DVD playback.

- Video stuttering sometimes during BD playback.
- YouTube playback sometimes freezes.
- Inconsistent sound output when used with Onkyo NR626 receiver.
- Things to note in V4.21:
 - In compliance with new AACs requirements, Blu-ray playback via CVBS output is now
 - disabled. Please watch your Blu-ray movies via HDMI connection.
 - As we are moving to a more efficient browser firmware, certain SmartTV applications and services may not be available.
 - USB keyboard and mouse will not work when used inside SmartTV. This will be fixed in the next SW release.

System Software Version 3.92

- Improves compatibility with TV's supporting 10-bit XV.Colour (or Deep Colour).
- Improves compatibility with older 1080i projectors.
- Allows selection of DSD Multi-channel or DSD Stereo for SACD playback via Audio button on Remote control and Setup menu.
- Fixes an issue where SACD DSD Stereo outputs 5.1 Multi-channel on analogue outputs.
- Allows FLAC files to be streamed over DLNA.
Note: some media servers do not support FLAC, please check your media server compatibility.

System Software Version 3.85.10

- Improves compatibility with receivers/amplifiers.
- Improves picture quality (artifacts) during BD playback
- Improves support of USB3.0 HDD that are USB2.0 backward compatible.
- Purple screen/Green screen during wake-up of device when DVI is connected.
- Allows selection of DSD Multichannel or DSD Stereo for SACD playback (via setup menu and only for HDMI2 output).

System Software Version 3.80

Fixes the following issues:

- Greenish picture observed at certain operations.
- SACD DSD is outputted as 2CH PCM on HDMI2.
- SACD hybrid disc hangs up intermittently.
- Improved compatibility with AV receivers.
- Red color menu overlaps Euronews page in SmartTV

System Software Version 3.76

- Improvement on playback of 3D blu-ray disc "Avengers" (Asia Pacific version only)
- Enhance Blu-ray disc playability
- Enhance SACD playability
- Enhance the performance of HDMI connection
- Enhance playback performance
- Various bug fix

System Software Version 3.71.01

Fixes the following issues:

- Transparent black bar seen on the bottom of the screen during 3D playback.
- Device hang-up when loading 3D discs while it is connected to HDMI TV and HDMI AV receiver.
