Spa for scalp, shine for hair

Philips SpaShine range is designed to provide an efficient and comfortable scalp and hair drying experience. Enjoy the relaxing feeling of the Soft Protective Airflow (SPA) for healthy, shiny looking hair.

Hair care technology

- SPA Technology for superior hair & scalp care

Beautifully styled hair

- Wide and even ionic care for shiny hair
- Curl diffuser to enhance curls and create volume
- Concentrator for quick drying and easy styling
- 1500W for efficient and gentle drying

Easy to use

- 3 flexible pre-selected drying settings for different needs
- Foldable handle for easy storage

Highlights

3 pre-selected drying settings

This compact hair dryer offers you 3 pre-selected heat & speed setting for cool, caring or quick drying.

Wide angle ionic care

Give your hair an instant care with ionic conditioning. Negatively charged ions eliminate statics, condition the hair and smooth down the hair cuticles. With SPA Technology, the drying area and thus the ionic flow is wider* and evenly distributed to intensify the hair's shine and glossiness.

Curl diffuser

The curl diffuser spreads the flow of air across the hair, boosting volume and enhancing curls while drying. For best results, hold the diffuser close to the crown and root area. The diffuser's fine textured pins will add volume, maximize thickness, bounce and help shape curls.

Concentrator

The concentrator works by focusing the flow of air through the opening onto specific areas. This results in a quick drying and more precise styling.

Foldable Handle

This hairdryer benefits from a foldable handle. The result is a small, compact hairdryer that will pack easily into even the smallest spaces and that you can take virtually anywhere.

1500W for efficient and gentle

This 1500W hairdryer creates the optimum level of airflow and gentle drying power, for beautiful results every day.

SPA Technology (1500W Firefly)

SPA, Soft Protective Airflow, is designed to provide efficient and comfortable scalp and hair drying. Thanks to its patented EHD (Even Heat Distribution, NO. CN102143697A) air outlet design, SPA technology helps to create an optimal balance between evenly distributed heat and softened airflow, which enables you to easily upgrade your drying process to a soothing SPA experience. SPA technology with 1500W power, dries faster*, wider* in a gentle way which ensures thorough drying result with less discomfort and hot spot on scalp or hair.
