- Play MP3-CD, CD and CD-R/RW
- USB Direct for easy MP3 music playback

Enrich your sound experience

- Bass Reflex Speaker System delivers a powerful, deeper bass
- Digital Sound Control for optimized music style settings
- 20W RMS maximum output power

Design that blends into your interior

- Compact design fits any space, any lifestyle
- Wall-mountable option for flexible placement

Easy to use

- Bluetooth standby mode always on for easy reconnection
- Fast and efficient USB charging for your smart device

PHILIPS

Highlights

USB Direct for easy MP3 music

Thanks to the complete file transferability, you can easily enjoy the convenience and fun of accessing more digital music via the built-in USB Direct.

Bass Reflex Speaker System

Bass Reflex Speaker System delivers a deep bass experience from a compact loudspeaker box system. It differs from a conventional loudspeaker box system in the addition of a bass pipe that is acoustically aligned to the woofer to optimize the low frequency roll-off of the system. The result is deeper controlled bass and lower distortion. The system works by resonating the air mass in the bass pipe to vibrate like a conventional woofer. Combined with the response of the woofer, the system extends the overall low frequency sounds to create a whole new dimension of deep bass.

Digital Sound Control

Digital Sound Control offers you a choice of pre-set Balance, Clear, Powerful, Warm and Bright controls you can use to optimise the frequency ranges for different musical styles. Each mode uses graphic equalizing technology to automatically adjust the sound balance and enhance the most important sound frequencies in your chosen music style. Ultimately, Digital Sound Control makes it easy for you get the most out of your music by precisely adjusting the sound balance to match the type of music you are playing.

Swap music between 2 devices

Pair with 2 smart devices simultaneously so you can stream music from whichever device you want, without the hassle of un-pairing and re-pairing. To play a song on a different device, pause the song on the original device first and then play the new song on a different device to take over. It's perfect for sharing music with friends, parties, or just playing different songs stored on different devices. Let friends and family pair at the same time, so you can swap between each other's music easily.

Wall-mountable

The perfect combination of a slim and versatile design, your Philips audio system is cleverly designed to blend into your living space. The base of the audio system is a stand so the system can sit securely and nicely on any shelf or cabinet. When wall mounted you have all the same flexibility of the freestanding stand.

Bluetooth standby

After your smart device has been connected once, your Philips music system can be woken from standby mode by your smart device's Bluetooth function. This will also activate the Bluetooth source, making it quick and easy to stream music, any time.

USB fast charging

The USB port isn't just for music playback. The intelligent USB power management system enables a 2A fast charging current to rapidly charge your smart device when the music system is in standby mode.

Specifications

Sound

- Sound enhancement: digital sound control
- Maximum output power (RMS): 20W

Loudspeakers

- Speaker drivers: 2.75" woofer
- Speaker types: bass reflex speaker system
