Dimensions

- Product dimensions (W x H x D): 390 x 140.5 x 200.5 mm
- Packaging dimensions (W x H x D): 496 x 238 x 180 mm
- Weight incl. Packaging: 3.5 kg

Highlights

One-touch 2x recording speed

Simply plug in your USB mass storage device to the USB port on Philips audio system and start recording your favorite music from CDs to your USB device or MP3 player in 2X speed - with one touch operation and no computer needed.

Dynamic Bass Boost

Dynamic Bass Boost maximizes your music enjoyment by emphasizing the bass content of the music throughout the range of volume settings - from low to high - at the touch of a button! Bottom-end bass frequencies usually get lost when the volume is set at a low level. To counteract this, Dynamic Bass Boost can be switched on to boost bass levels, so you can enjoy consistent sound even when you turn down the volume.

Digital Sound Control

Digital Sound Control offers you a choice of pre-set Jazz, Rock, Pop and Classic controls you can use to optimise the frequency ranges for different musical styles. Each mode uses graphic equalizing technology to automatically adjust the sound balance and enhance the most important sound frequencies in your chosen music style. Ultimately, Digital Sound Control makes it easy for you get the most out of your music by precisely adjusting the sound balance to match the type of music you are playing.
