# __Software Update Instructions__

To get the best features and support, update your product with the latest software.

What you need
• Connect product to your TV through HDMI (recommended non-HDMI ARC input)

## Check software version

In HDMI ARC source mode, within 6 seconds press **MUTE** twice, and **VOLUME+** once, then hold down **MUTE** for 5 seconds. (USB device must not be plugged in)

Check on TV screen if the version info is as follows:
**V32.25.02.1310210E**

If software version is different from the above, then a software upgrade is required

## Update software via USB

1 Check the latest software version on www.philips.com/support.
• Search for your model and click on "Software and drivers".

2 Download the software into a USB storage device.

a. Unzip the downloaded file, and make sure that the unzipped file is named the following:
**BTS7000.bin**

b. Put the related software file in the root directory of the USB storage device.

This will be a 2-part software upgrade, please follow below instructions.

3 Connect the USB storage device to the USB port on this product.

## Software Upgrade Procedure Part 1

**1** Switch this product to the HDMI ARC source, and switch your TV to the HDMI source. You should be able to see blue wallpaper on the TV screen
