

Audio Compact Disc Recorder

- **Record your own digital audio compact discs (CD-R)** which can then be played back on any standard CD player
- **Easy to use** with CD-Sync autostart recording and both automatic and manual track numbering
- **Digital and analog inputs and outputs** for easy connection to almost any player or music production source (including optical and coaxial digital connections)
- **Record from various digital sources** using integrated sample rate conversion technology (from 12kHz - 56kHz to the standard 44.1kHz). Sample rate convertor is bypassed in CD to CD digital transfer for optimum quality of recording - direct line recording
- **Audio* CD-Recordable and audio* CD-Rewritable** (reusable) discs are supported by the CDR880
 - *The CDR880 is designed to use CD-R and CD-RW discs optimized for audio recording and bearing these logos. Discs produced for CD-R and CD-RW computer drives are not suitable. CD-RW discs will play only on CD-RW compatible players and recorders.
- **A high quality audio CD player** featuring 1-bit A to D converter technology
- **Gold-plated audio connections** for optimum signal transfer

Record your own digital audio CDs!

Remote control pictured is not necessarily the correct model. For illustration purposes only.

Let's make things better.

PHILIPS

General

Digital Audio Recorder/Player offering high quality digital reproduction of CDs and home recording of both digital (CD, DAT, and digital radio) and analog sources.

CD-Recordable

Recording onto special blank compact discs (audio CD-R discs), it is possible to compile an archive of highest quality digital recordings, for playback on conventional CD players, as well as on the CDR880. Once recorded, CD-R discs are then "fixed" for life.

CD-Rewritable

When using the standard rewritable discs (audio CD-RW discs), it is possible to erase the last track recorded or to erase the complete disc in order to correct recording mistakes and re-record the disc. Rewritable discs can be played in the CDR880 and in players/recorders prepared for rewritable discs.

Technical Specifications:**General**

• System	compact disc digital audio
• Number of channels	2 (stereo)
• Applicable discs	CD, CD-R, CD-RW
• Power supply	AC 120V
• Power consumption	15W
• Operating temperature	40-95°F
• Weight	9 lbs.
• Dimensions	17"W x 12"D x 3"H

Audio

• Frequency response	20Hz-22kHz
• Playback S/N (w/o SRC)	110dB (A-weighted)
• Playback dynamic range	98dB
• Playback total harmonic distortion	89dB (0.0035%)
• Recording S/N	93dB or equal to source in digital w/o SRL
• Recording dynamic range	95dB
• Recording total harmonic distortion	85dB (0.0056%)
• Line output voltage	2Vrms @ 0dB
• Digital coaxial output	0.5V(pp)/75Ω
• Digital optical output	-20dBm
• Headphones	0-5Vrms/8-2000Ω
• Recording values for line input/output:	
- Digital coaxial input	12kHz-56kHz (automatic sample rate conversion) in case of 44-1, no SRL
- Digital optical input	12kHz-56kHz (automatic sample rate conversion) in case of 44-1, no SRL
- Analog input	700mVrms/50k Ω=0dB

Recording Functions

- Recording on CD-R & CD-RW disc
- Autostart recording (CD-Sync)
- Pause recording
- Erase last track (CD-RW disc)
- Erase disc (CD-RW disc)
- Erase TOC (RW disc)
- Manual track increment
- Automatic track increment
- Remaining recording time display
- Finalize (writing TOC)
- SCMS (Serial Copy Management System)
- RID code (Recorder unique IDentifier)

Accessories

- Remote control (+ batteries)
- Audio cable (x1)
- Digital coaxial cable (x1)
- AC power cable
- Instruction manual

Playback Functions

- Play
- Pause
- Stop
- Direct track selection
- Next/previous track selection
- Search forward/reverse
- Fast search forward/reverse
- Repeat (all/1-track)
- Program play (20 tracks)
- Time display switching

Important:

It is a criminal offense, under applicable copyright laws, to make unauthorized copies of copyright protected material, including sound recordings. This equipment should not be used for such purposes.

SCMS is an internationally accepted system of copy management allowing only single direct copies of digital source material. It is not possible to copy a digital copy.
