Start the day your way

- Wake up to your favorite iPod music
- Dual alarm time
- Gentle wake for a pleasant wake up experience

Easy to use

- 10 preset tuning stations
- Convenient line-in jack for portable music playback
- Sleep timer for easy falling asleep to your favorite music

PHILIPS

Highlights

DAB

DAB (Digital Audio Broadcasting) digital radio is, on top of FM analog transmission, a new way of broadcasting radio via a network of terrestrial transmitters. It provides listeners with more choices and information delivered in clear and crackle-free sound quality. The technology allows the receiver to lock on to the strongest signal it can be find. With DAB digital stations there are no frequencies to remember, and sets are tuned by station name, so there is no returning on the move.

wOOx™ Technology

wOOx technology is a revolutionary loudspeaker concept that allows you to hear and feel profoundly deep bass that is richer than any other audio system. Special speaker drivers work in harmony with the wOOx bass radiator, and precise tuning between the main driver and the tweeter ensures smooth transitions from low-mid to high frequencies. Dual suspension and a totally symmetrical sandwich construction deliver low and precise base without noticeable distortion. wOOx produces exceptionally deep and dynamic bass by using the speaker box full volume to truly magnify the impact of the music.

Wake up to iPod music

Wake up to your favorite iPod music

10 preset tuning stations

10 preset tuning stations

Convenient line-in jack

Line-in connection allows you to play your music on other device with the Philips player, just simply connect the player to the Line-out or Audio-out, or to connect the headphone jack of other media players such as CD or DVD player, VCR and MP3 player.
