

**IMPORTANT SAFETY INSTRUCTIONS - Read before operating equipment**

1. Read these instructions.
2. Keep these instructions.
3. Heed all warnings.
4. Follow all instructions.
5. Do not use this apparatus near water.
6. Clean only with dry cloth.
7. Do not block any ventilation openings. Install in accordance with the manufacturer's instructions.
8. Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
9. Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
10. Protect the power cord from being walked on or pinched, particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.

➤ **DGX 220**

This Quick Set-up Guide is applicable for :

**DGX 220**

**Easy To Use Digital Audio**

The DGX220 provides digital quality audio without the need for a soundcard and is completely self-powered over the USB bus, making a bulky power adaptor unnecessary.

The system even includes the award winning Sound Agent 2 software to optimize and give you full control over your audio. Thank you for choosing the Philips DGX220 bus-powered speaker system.

11. Only use attachments/accessories specified by the manufacturer.
12. Use only with a cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
13. Unplug this apparatus during lightning storms or when unused for long periods of time.
14. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
15. Battery usage CAUTION - To prevent battery leakage which may result in bodily injury, property damage, or damage to the unit:
  - Install all batteries correctly, + and - as marked on the unit.
  - Do not mix batteries (old and new or carbon and alkaline, etc.).
  - Remove batteries when the unit is not used for a long time.

EL 6475-E004: 02/B

The socket-outlet shall be installed near the equipment and shall be easily accessible.

**Class II equipment symbol**  
This symbol indicates that the unit has a double insulation system.

**PHILIPS** DGX 220 / 17  
Tested To Comply With FCC Standards  
**FOR HOME OR OFFICE USE**

Philips Consumer Electronics North America  
One Philips Drive, P.O. Box 14810, Knoxville, TN 37914-1810  
Phone: 1-800-531-0039

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

**NOTE:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

**Important notes for users in the U.K.**

**Mains plug**  
This apparatus is fitted with an approved 13 Amp plug. To change a fuse in this type of plug proceed as follows:  
1 Remove fuse cover and fuse.  
2 Fix new fuse which should be a BS1362.5 Amp, A.S.T.A. or BSI approved type.  
3 Refit the fuse cover.  
If the fitted plug is not suitable for your socket outlets, it should be cut off and an appropriate plug fitted in its place. If the mains plug contains a fuse, this should have a value of 5 Amp. If a plug without a fuse is used, the fuse at the distribution board should not be greater than 5 Amp.  
**Note:** The severed plug must be disposed of to avoid a possible shock hazard should it be inserted into a 13 Amp socket elsewhere.

**How to connect a plug**  
The wires in the mains lead are coloured with the following code: blue = neutral (N), brown = live (L). As these colours may not correspond with the colour markings identifying the terminals in your plug, proceed as follows:  
• Connect the blue wire to the terminal marked N or coloured black.  
• Connect the brown wire to the terminal marked L or coloured red.  
• Do not connect either wire to the earth terminal in the plug, marked E (or ±) or coloured green (or green and yellow).  
Before replacing the plug cover, make certain that the cord grip is clamped over the sheath of the lead - not simply over the two wires.  
**Copyright in the U.K.**  
Recording and playback of material may require consent. See Copyright Act 1956 and The Performer's Protection Acts 1958 to 1972.
