Dimensions

- Product dimensions (W x H x D): 421 x 158 x 139 mm
- Packaging dimensions (W x H x D): 484 x 220 x 158 mm

Highlights

Pure digital sound

Advanced pure digital sound processing technology offers vastly superior sound performance compared to the conventional analog audio processing technology that is found in docking players that use the analog audio output from an iPod/iPhone. By collecting the iPod's/iPhone's digital audio output and employing digital processing at each stage of the circuit, a much higher Signal-to-Noise ratio is produced. The result is unsurpassed sound clarity that is in perfect balance.

Built-in rechargeable battery

Built-in rechargeable battery for even better portability

SoundCurve

The carefully designed curved back cover of this Philips docking speaker creates a highly effective acoustic structure for sound reproduction. Its clean curve enforces the rigidity of the speaker cabinet, dramatically reducing internal resonance and eliminating the vibration and distortion of sound. You get to enjoy superb crystal-clear sound in stunning looking speakers.

Optimal acoustic volume

Smart sound design brings you the best bass reproduction possible. The acoustic volume allocated to each midrange driver perfectly matches its acoustic requirements. Low tones come out deep and tight – delivering strong and rich bass.

Superb gaming sound effects

The gaming experience is never complete without great sound effects. Now your games from Smartphone or any portable device can be made even more thrilling, thanks to Philips docking speaker that puts the boom in the sound. Hear all the sounds loud and clear, and boost your experience to new levels. What's more, you can do this with outstanding convenience, via Bluetooth. Simply make the wireless Bluetooth connection between your portable device and the docking speaker, and play away.

Video stand for iPad

Video stand for hands-free iPad movie enjoyment
