Highlights

Dual Media

Philips DVD Recorders support 'dual media' recording – the ability to create recordings on DVD+R/RW and DVD-R/RW discs. Now you can buy any disc and your Philips recorder will always create fully compatible recordings, which can be played on any DVD player.

VCR Plus+

With the VCR Plus+ system, all you need to do to program your video recorder is to enter the 'Pluscode' – a single code of up to nine digits (but usually less) that is printed next to each TV program in most TV guides.

i.LINK digital input

Also known as IEEE 1394 and FireWire, i.Link carries all audio and video signals via a single cable digitally, with no loss in picture and sound quality. With i.Link digital video input, you can copy your home videos in their original digital picture quality.

SmartAlgo

SmartAlgo™ ensures quality recordings, regardless of disc format or quality. Its patented self-learning adaptive technology chooses the optimal write strategy for the particular disc that is being used. By doing this, it significantly improves the reliability of the recording, ensuring zero failures when recording and guaranteeing playback compatibility.

Easy to use user interface

From a simple timer recording to more advanced editing features, explore all these functions with the greatest ease. With this easy-to-use graphic interface anyone can operate this recorder. The on-screen menus are logically arranged and easy to understand. Additionally, guiding text is provided where needed.
