CONTROLS, refer to the illustration on page 3

1. ..................display
2. ..................stops CD play, erases a program and switches the set off
3. ..................switches the set on, starts and interrupts CD play
4. ..................CD Audio: skips or fast search tracks forwards
     MP3: skips or search a previous track or album (AL)
5. PROGRAM ........programs tracks and reviews the program
6. ..................CD Audio: skips or fast search tracks backwards
     MP3: skips or search a next track or album (AL)
7. MODE ............selects the different playing possibilities: SHUFFLE,
     SHUFFLE REPEAT ALL, REPEAT, REPEAT ALL and SCAN
8. 4.5V DC...........socket for external power supply
9. LINE OUT ........3.5mm line out socket to connect the set to an audio input
     of an additional appliance
10. ..................3.5 mm headphone and remote control socket
11. OPEN ............opens the CD lid
12. VOL ................adjusts the volume
13. OFF/DBB ..........DYNAMIC BASS BOOST switches the bass enhancement on/off
14. OFF/ESP ..........ELECTRONIC SKIP PROTECTION ensures continuous playback
     regardless of vibrations and shocks
15. OFF ..............switches RESUME and HOLD off
    RESUME ..........CD Audio: stores and continues playback from the last position
     played
    MP3: stores and continues playback from the last track played

   HOLD ..................locks all buttons
16. ..................battery compartment
17. ..................typeplate
With this set you can use:

- alkaline batteries (type LR6, UM3 or AA)

Inserting batteries
1. Open the battery compartment and insert 2 alkaline batteries.

Notes: – Old and new or different types of batteries should not be used in combination.
– Remove batteries if they are empty or if the set will not be used for a long time.

Batteries contain chemical substances, so they should be disposed of properly.

Battery indication
- The battery symbol on the display is divided into 3 segments which indicate the approximate power capacity of the batteries. Full battery capacity is shown by three segments.

Indication of empty batteries
- Replace the batteries or connect the mains adapter as soon as $\mathbf{A}$ flashes and $\mathbf{B} \mathbf{a} \mathbf{t} \mathbf{t}$ is displayed.

Notes: The average playing time of batteries under normal conditions.

Mains adapter (supplied or optionally available)
Only use the AY 3170 mains adapter (4.5 V/300mA direct current, positive pole to the centre pin). Any other product may damage the set.

1. Make sure the local voltage corresponds to the adapter’s voltage.
2. Connect the mains adapter to the 4.5V DC socket of the player and to the wall socket.

Note: Always disconnect the adapter when you are not using it.

Line out
You can connect the CD player to an additional appliance, e.g. amplifier, radio cassette recorder, etc., with a LINE IN socket.

1. Turn down the volume on the additional appliance.
2. Connect an audio signal cable (not supplied) to the LINE OUT socket of the CD player and the CD IN, AUX IN or LINE IN socket of the additional appliance.
3. To adjust the sound and volume, use the controls on the connected appliance.
Connecting the headphones

• Connect the supplied headphones to \( \Omega \).

Use the AY 3767 cord remote control. The buttons on the remote control have the same functions as the corresponding buttons on the CD player.

1 If necessary press \( \Box \) once or twice until the set is switched off.

2 Connect the remote control to \( \Omega \) and the headphones firmly to the remote control’s socket.

3 Turn the volume down with VOL \( \longrightarrow \) on the remote control and set VOL \( \longrightarrow \) on the CD player to position 8.

Remote control (supplied or optionally available)

Use the AY 3787 cord remote control. The buttons on the remote control have the same functions as the corresponding buttons on the CD player.

• Do not touch the lens \( A \) of the CD player.

• Do not expose the set, batteries or CDs to humidity, rain, sand or excessive heat (caused by heating equipment or direct sunlight).

• You can clean the CD player with a soft, slightly dampened lint-free cloth. Do not use any cleaning agents as they may have a corrosive effect.

• To clean the CD, wipe it in a straight line from the centre toward the edge using a soft, lint-free cloth. A cleaning agent may damage the disc! Never write on a CD or attach a sticker to it.

• The lens may cloud over when the set is moved suddenly from cold to warm surroundings. Playing a CD is not possible then. Leave the CD player in a warm environment until the moisture evaporates.

• Active mobile phones in the vicinity of the CD player may cause malfunctions.

• Avoid dropping the set as this may cause damage.

Environmental information

• All redundant packing material has been omitted. We have done our utmost to make the packaging easily separable into three materials: cardboard (box), polystyrene foam (buffer) and polyethylene (bags, protective foam sheet).

• Your set consists of materials which can be recycled if disassembled by a specialized company. Please observe the local regulations regarding the disposal of packing materials, exhausted batteries and old equipment.

Use your head when using headphones

• Hearing safety: Do not play your headset at a high volume. Hearing experts advise against continuous extended play. If you experience a ringing in your ears, reduce the volume or discontinue use.

• Traffic safety: Do not use while operating a motorized vehicle. It may create a traffic hazard and it’s illegal in many areas. You should use extreme caution or temporarily discontinue use in potentially hazardous situations. Even if your headset is an open-air type designed to let you hear outside sounds, don’t turn up the volume so high that you can’t hear what’s around you.
**IN-CAR CONNECTION**

**In-car use (connections supplied or optionally available)**

Only use the AY 3545 car voltage converter (4.5 V, DC, positive pole to the centre pin) and the AY 3501 car adapter cassette. Any other product may damage the set.

1. Put the CD player on a horizontal, vibration-free and stable surface. Make sure it is a safe place, where the player is not a danger or obstacle to the driver and passengers.
2. Connect the DC plug of the voltage converter to the 4.5 V DC socket of the CD player (*only for a 12 V car battery, negative grounding*).
3. Insert the voltage converter into the cigarette lighter socket. If necessary, clean the cigarette lighter socket to obtain a good electrical contact.
4. Turn down the volume and connect the adapter cassette plug to the LINE OUT of the CD player.
5. Carefully insert the adapter cassette into the car radio's cassette compartment.
6. Make sure the cord does not hinder your driving.
7. Start the CD player, set VOL to position 8 and adjust the sound with the car radio controls.
   • Always remove the voltage converter from the cigarette lighter socket when the CD player is not in use.

**Notes:**
- Avoid excessive heat from the car heating or from direct sunlight (e.g. in a parked car in the summer).
- If your car radio has a LINE IN socket, use the LINE IN socket for the car radio connection instead of the adapter cassette. Connect the signal lead to this LINE IN socket and the LINE OUT socket of the CD player.

---

**CD PLAY**

**Playing a CD**

This CD player can play all kinds of Audio Discs and MP3 CD-ROM such as CD Recordables and CD Rewritables. Do not try to play a CDi, CDV or computer CD or DVD.

1. Push the OPEN slider. ➔ The lid opens.
2. Insert an audio CD, printed side up, by pressing gently on the CD centre so that it fits onto the hub. Close the lid by pressing it down on the left side.
3. Press ▶ for approximately 1 second to switch the set on and start playback. ➔ The current track number and the elapsed playing time are displayed.
   • You can interrupt playback by pressing ▶. ➔ The time where playback was interrupted is flashing.
   • Continue playback by pressing ▶ again.
4. Press □ to stop playback. ➔ The total number of tracks and the total playing time of the CD are displayed.
5. Press □ again to switch off the set.
6. To remove the CD, hold it by its edge and press the hub gently while lifting the CD.
CD PLAY

**Playback information**
- If a CD Rewritable (CD Recordable) is not recorded properly, `nF d iSC` is displayed. For CD Audio, use FINALIZE on your CD recorder to complete the recording.

**Note:** it is possible to play multi-session MP3 tracks without finalizing.
- If you play CD Audio tracks on a CD Rewritable disc, it takes 5–15 seconds for sound reproduction to start after you have pressed >. MP3 track recordings take 30–90 seconds for sound reproduction to start.

- Playback will stop if you open the CD lid.
- While the CD is read, `d iSC` flashes.
- If there is no activity for 10 seconds, the set will clear the display, and if there is no activity after another 25 seconds, the set will switch off automatically to save energy. Any settings like program and playing modes will be then lost.

**Volume and sound adjustment**
- Adjust the volume by using VOL ➛.

**DBB - Dynamic bass boost**
- Switch the slider to DBB to activate the DBB. `DBB` is shown and bass enhancement is activated.

**Note:** The DBB sound option is only activated in the headphone mode.

---

FEATURES

**Selecting a track and searching**

**Selecting a track during playback**
- Briefly press ➛ or ➟ once or several times to skip to the current, previous or subsequent track start.
  ➛ Playback continues with the selected track and its number is displayed.

**Selecting a track when playback is stopped**
1. Briefly press ➛ or ➟ once or several times.
  ➛ The selected track number is displayed.
2. Press ➔ to start CD play.
  ➛ Playback starts with the selected track.

**Searching for a passage during playback**
1. Keep ➛ or ➟ depressed to find a particular passage in a backward or forward direction.
  ➛ Searching is started and playback continues at a low volume. After 2 seconds the search speeds up.
2. Release the button when you reach the desired passage.
  ➛ Normal playback continues from this very position.

**Notes:**
- During SCAN, searching is not possible.
- During SHUFFLE, SHUFFLE REPEAT ALL, REPEAT or while playing a program searching is possible only within the particular track.
- Searching is not possible while playing MP3 tracks.
**FEATURES**

### Programming track numbers

You can select up to 30 tracks and store them in the memory in a desired sequence. You can store any track more than once.

1. While playback is stopped, select a track with << or >>.

2. Press PROGRAM to store the track. 
   - PROGRAM lights up, the track number programmed and P with the total number of stored tracks are displayed.

3. Select and store all desired tracks in this way.

4. Press ▶ to start playback of your selected tracks.
   - PROGRAM is shown and playback starts.

   - You can review the program by pressing PROGRAM for more than 2 seconds.
   - The display shows all stored tracks in sequence.

**Notes:**
- If you press PROGRAM and there is no track selected, SELECT is displayed.
- If you try to store more than 30 tracks, FULL is displayed.

### Erasing the program

1. If necessary, press □ to stop playback.

2. Press □ to erase the program.
   - CLEAR is displayed once, PROGRAM goes off and the program is erased.

**Notes:**
- The program will also be erased if you
  - interrupt the power supply,
  - open the CD lid, or
  - the set is switched off automatically.

### Storing the last position played – RESUME

You can store the last position played. When restarting, playback continues from where you have stopped, according to CD Audio or MP3 playback.

1. Switch the slider to RESUME during playback to activate RESUME.
   - RESUME is shown.

2. Press □ whenever you want to stop playback.

3. Press ▶ whenever you want to resume playback.
   - RESUME is shown and playback continues from where you have stopped (CD Audio), or from the last track played (MP3).

**To deactivate RESUME,** switch the slider to OFF.

### Locking all buttons – HOLD

You can lock the buttons of the set. When a key is pressed, no action will be executed then.

1. Switch the slider to HOLD to activate HOLD.
   - All buttons are locked. HOLD is displayed by pressing any key. If the set is switched off, HOLD is displayed only by pressing ▶ and □.

2. To deactivate HOLD, switch the slider to OFF.

**Note:** When you deactivate HOLD by switching the slider to RESUME and restart, playback continues from where you have stopped (CD Audio), or from the last track played (MP3).
FEATURES

ESP

With a conventional portable CD player, you might have experienced that the music stopped e.g. when jogging. The ELECTRONIC SKIP PROTECTION protects against loss of sound caused by vibrations and shocks. Continuous playback is ensured. However, it does not protect the set against any damage caused by dropping:

- Switch the slider to ESP during playback to activate the shock protection.
  - ESP is shown and the protection is activated.
- To deactivate the shock protection, switch the slider to OFF.
  - ESP goes off and the protection is deactivated.

Note: When playing MP3 tracks, the display  and the ESP feature is automatically activated, regardless of the ESP switch setting.

Selecting different playing options – MODE

It is possible to play tracks in random order, to repeat a track or the CD and to play the first few seconds of each track.

1. Press MODE during playback as often as necessary until the display shows either:
   - SHUFFLE: All tracks of the CD are played in random order until all of them have been played once.
   - SHUFFLE REPEAT ALL: All tracks of the CD are played repeatedly in random order.
   - REPEAT: The current track is played repeatedly.
   - REPEAT ALL: The entire CD is played repeatedly.
   - SCAN: The first 10 seconds of each of the remaining tracks are played in sequence.

2. Playback starts in the chosen mode after 2 seconds.

3. To return to normal playback, press MODE until the display indication disappears.
MP3-CD PLAYBACK

To play MP3-CDs

IMPORTANT INFORMATION

• Use .mp3 as the extension to save audio files onto CD-R(W) or CD ROM, e.g. Michael08.mp3. Do not use any other extensions e.g. .doc, .txt, .pdf, etc., when making audio files into MP3.

• Do not use the .mp3 extension for text or other non-audio data files. This may result in serious malfunction of the set and harmful noise interference.

• Single session means only one session created in the CD-ROM.

• Multi-session means more than one session created in the CD-ROM.

• AL: this is the set’s display abbreviation for “album.” On a PC display, an album is shown as Folder in Windows Explorer.

• Do not attempt to combine CD audio and MP3 tracks within a CD-R(W) or CD-ROM, as the set will only be able to playback your CD audio tracks from mixed CD formats.

• This set cannot read DirectCD recordings.

1 Place a MP3 CD-ROM with the label side up.

Push the CD centre lightly to set it in position.

2 Press ▶ to start playback.

The display shows ♫ and ESP, the current track number and it’s elapsed playing time.

3 Press ▴ to stop playback.

Playback stops and the display shows the total number of tracks and total number of albums.

Selecting and searching a track/album

The following table shows the different functions available for the ▶, ▶ controls when playing CD Audio or MP3 CDs.

• AL 00 is the set’s display for a MP3 CD with only a root directory. This has no additional albums (folders).

• With albums means a MP3 CD with more than one album (folders), and is shown by AL and a number on the set’s display, e.g. AL 09.

<table>
<thead>
<tr>
<th>function</th>
<th>CD audio</th>
<th>MP3 (AL 00)</th>
<th>MP3 (with albums)</th>
</tr>
</thead>
<tbody>
<tr>

<tr>
<td>Fast track select</td>
<td>✓</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Fast album select</td>
<td></td>
<td>✓</td>
<td></td>
</tr>
</tbody>
</table>

Select track

To select the next or previous track.

• Press ▶ or ◀ briefly once or more during playback.

✓ Playback is interrupted and starts from the beginning of the selected track.

Music search

To fast search only within a CD Audio track.

• During playback, press and hold down ▶ or ◀ . Release button at the desired passage.
The following chart is an example of a Windows Explorer display for a single session MP3 CD ROM with albums. Check the added Notes to help you understand the MP3 CD unit display, and the playback sequence of albums and tracks on single session MP3 CDs.

**Notes:**

- Arrow pathway shows the sequence of MP3 album and track playback.

**AL 01 - AL 07** This CD ROM example has a total number of 7 MP3 albums (folders).

**Skipped** Denotes an album which contains non-audio files only, eg. .jpg, .wav, .doc. These cannot be detected nor played on the MP3-CD player, and are hence ‘skipped’. Where an album contains mixed format files, the non-MP3 files will be skipped.

---

**Fast track select**

In the stop position, you can select tracks from your album (AL 00). The display will show the total number of tracks, and AL 00.

1. Press $<$ or $>$ briefly and repeatedly until the display shows the desired track number. If you wish, hold $<$ or $>$ to search tracks at high speed.
2. Press $\triangleright$ to start playback.

**Fast album select**

In the stop position, you can select an album if your root directory holds more than one directory. The display will show the total number of tracks, and the total number of albums.

1. Press and hold $<$ or $>$ until you reach the album you want. Release $<$ or $>$.
2. Press $\triangleright$ to start playback.
   - Playback starts from the first track of your selected album.
3. If you wish to start playback from another track within the album, press $<$ or $>$ briefly and repeatedly until the display shows the desired track number.
**Multi-session**

This chart is an example of a Windows Explorer display for a multi-session MP3 CD ROM with albums. Multi-session playback differs from single session in that each time you add a new session to your CD ROM, the original playback sequence for both your albums and tracks will change. Playback of the first session will include new albums and albums and tracks from the new sessions created. Check the added Notes to help you understand the MP3 CD unit display, and the playback sequence of albums and tracks on multi-session MP3 CDs.

### Notes:

- Arrow pathway shows the sequence of MP3 album and track playback.

**AL 01 - AL 12** This CD ROM example has a total number of 12 MP3 albums (folders).

Blur01.mp3-Eagles25.mp3 This CD ROM example has a total number of 25 tracks, where ‘01’ is the first track and ‘25’ is the last track.

**Skipped** Denotes an album which contains non-audio files only, e.g., jpg, wav, doc. These cannot be detected nor played on the MP3-CD player, and are hence ‘skipped.’ Where an album contains mixed format files, the non-MP3 files will be skipped.
### TROUBLESHOOTING

**WARNING**
*Under no circumstances should you try to repair the set yourself as this will invalidate the guarantee.*

If a fault occurs, first check the points listed, before taking the set for repair. If you are unable to solve a problem by following these hints, consult your dealer or service centre.
