PHILIPS

Standard product information

The FB 201 powered active subwoofer offers the floor shaking bass to existing Dolby Surround Pro Logic system and Normal stereo system.

ACTIVE SUBWOOFER SPEAKER

The active subwoofer speaker contain a 6" inch down-firing driver. The down-firing design ensure a floor shaking reproduction of bass which enrich the great sound of Philips Home Theatre entertainment.

By adding the 50 Watt powered active subwoofer, it can increase the bass of your existing audio system.

The FB 201 active subwoofer speaker offers a great design without intruding your living space. It can be used with any Dolby Surround Pro Logic set and Normal Stereo set through normal speaker jack or subwoofer inputs. It can used for all FW7xx series and most FW3xx series, especially recommended for FW770P and FW375P.
