- Demo mode
- Interactive Dashboard display with Dual VU meter

Gameport

With the growing demand for game consoles, we will see a similar increase in the need for a complete entertainment system that can give enhancement to the sound quality of games. Gameport allows users to connect their game console to the Philips Mini Hi-Fi system to enjoy a total game immersion experience by having powerful sound output. Through the Game Sound Mode, the user can also select the type of sound setting to best suit the game currently on play; i.e. Blast for Explosive and Shooting games; Punch for games with lots of kicks and punches and Speed for games which involves high speed driving and flying. The Game Mix function (MIX-IT) allows users to mix their game sound to their favorite music from CD, Radio Stations or an external source such as Portable CD, MP3 Player, etc.

USB PC Link

USB PC Link allows the user to turn his PC Hard Disk into a 'Massive MP3 Music Jukebox'. User can playback their MP3 Music Collection from their PC via powerful Amplifier and Speakers on the Philips Audio System. Consumers can use the remote control to navigate through the contents stored in the MusicMatch Jukebox. In addition, personal setting on this MP3 music is also possible via the audio system. During streaming of MP3 music from the PC via USB PC Link, the display on the audio system will give the track information such as Song title and playtime. You can now sit back on your sofa and navigate through your MP3 music from the PC via 'Audio System Remote Control' e.g. Play, Pause, Stop, Next, Previous track. There is no need to run back to your PC for this.

MAX Sound for instant Power Boost

Consumers constantly want maximum performance from their Audio System but most do not know how to achieve this through their system's equalizer setting. They would like to have a convenient sound feature that at the push of a button enables them to obtain the maximum sound performance from their Audio System. MAX Sound technology produces instant boosting in bass, maximizes the volume performance, and instantly creates the most impressive listening experience with just the touch of the MAX button.
