Highlights

Bass Reflex Speaker System

Bass Reflex Speaker System delivers a deep bass experience from a compact loudspeaker box system. It differs from a conventional loudspeaker box system in the addition of a bass pipe that is acoustically aligned to the woofer to optimize the low frequency roll-off of the system. The result is deeper controlled bass and lower distortion. The system works by resonating the air mass in the bass pipe to vibrate like a conventional woofer. Combined with the response of the woofer, the system extends the overall low frequency sounds to create a whole new dimension of deep bass.

wOOx™ Technology

wOOx technology is a revolutionary loudspeaker concept that allows you to hear and feel profoundly deep bass that is richer than any other audio system. Special speaker drivers work in harmony with the wOOx bass radiator, and precise tuning between the main driver and the tweeter ensures smooth transitions from low-mid to high frequencies. Dual suspension and a totally symmetrical sandwich construction deliver low and precise base without noticeable distortion. wOOx produces exceptionally deep and dynamic bass by using the speaker box full volume to truly magnify the impact of the music.

Incredible Surround™

Incredible Surround™ widens the sound stage, giving you the impression of having extra speakers all around you.

Interactive Dashboard Display

Interactive Dashboard Display is a visually attractive animated graphics display with volume meter. It gives you at-a-glance track and volume information using an attractive dashboard interface. Interactive Dashboard Display integrates a Fluorescent Tube Display (FTD) and a Volume Unit (VU) meter to display volume levels, useful track information and music amplitude during playback. The exciting animated graphics add to the overall 'feel' of the music.
