## Product highlights

### 3-Way Bass Reflex sky sys

### 2x40W RMS/1500W PMPO

### Dynamic Bass Boost

*Dynamic Bass Boost maximizes your music enjoyment by emphasizing the bass content of the music throughout the range of volume settings - from low to high - at the touch of a button! Bottom-end bass frequencies usually get lost when the volume is set at a low level. To counteract this, Dynamic Bass Boost can be switched on to boost bass levels, so you can enjoy consistent sound even when you turn down the volume.*

### Digital Sound Control

*Digital Sound Control lets you select from pre-set modes that control the frequency bands of sound to optimize certain musical styles. You can choose between different sound settings - Optimal, Jazz, Rock, Techno, Pop or Classic. Each mode uses graphic equalizing technology to automatically adjust the sound balance and enhance the most important sound frequencies in your chosen music style. Digital Sound Control lets you get the most out of your music by adjusting the sound balance to match the music type you are playing.*

### Karaoke

*The Karaoke feature on your DVD player provides endless entertainment and maximum audio and singing enjoyment. You can enhance your performance by adding an 'echo' effect to your voice. The key controls allow you to choose the optimal key for your personal vocal range.*
