6-Mode Digital Sound Control

Choose from 6 modes of Digital Sound Control

6Mode Virtual Ambience Control

Choose from 6 modes of Virtual Ambience Control

3-step Dynamic Bass Boost

Dynamic Bass Boost maximizes your music enjoyment by emphasizing the bass content of the music throughout the range of volume settings - from level one to level three - at the touch of a button! You can customize the bass level that fits your style. Bottom-end bass frequencies usually get lost when the volume is set at a low level. To counteract this, Dynamic Bass Boost can be switched on to boost bass levels, so you can enjoy consistent sound even when you turn down the volume.

Incredible Surround™

Incredible Surround™ widens the sound stage, giving you the impression of having extra speakers all around you.

Animated dashboard display

Animated dashboard displays a dual VU meter

Karaoke

The Karaoke feature on your DVD player provides endless entertainment and maximum audio and singing enjoyment. You can enhance your performance by adding an 'echo' effect to your voice. The key controls allows you to choose the optimal key for your personal vocal range.
