- Playback Media: CD, CD-R, CD-RW
- Loader Type: 3 CD Carousel
- Number of Discs: 3
- Disc Playback Modes: Repeat/one/disk/program, Shuffle Play, 40-Track Programmable
- Cassette Deck Technology: Mechanical
- Number of decks: 2
- Cassette Playback Modes: Continuous Play, Fast Wind/Rewind, Full Auto Stop

Audio Recording

- Tape Recording Enhancement: Automatic

Recording Level, CD Synchro Start Recording

Tuner/Reception/Transmission

- Auto digital tuning
- Tuner Bands: FM, MW
- Tuner Enhancements: Auto Store, Easy Set (Plug & Play)

Connectivity

- Headphone: 3.5 mm
- Other connections: FM Antenna, MW Antenna

Convenience

- Alarms: CD Alarm, Radio Alarm, Sleep timer
- Clock: On main display
- Display Type: FTD
- Indications: DIM mode

Accessories

- Included accessories: AC Power Cord, FM/MW Antenna

Highlights

Full range Bass Reflex Speaker

Bass Reflex Speakers delivers a deep bass experience. Differ from conventional loudspeakers, the addition of a bass pipe that is acoustically aligned to the woofer optimizes the low frequency roll-off. The result is a deep controlled bass and low distortion. Combined with the response of the woofer, it extends the overall low frequency sounds to create a whole new dimension of deep bass.

400W PMPO / 10W RMS

This system has 400W PMPO / 10W RMS total output power. RMS refers to Root Mean Square which is a typical measurement of audio power, or rather, the electrical power transferred from an audio amplifier to a loudspeaker, which is measured in watts. The amount of electrical power delivered to the loudspeaker and its sensitivity determines the sound power that is generated. The higher the wattage, the better the sound power emitted by the speaker.

3-disc changer

With a three-disc changer for music playback, you can choose between three different CDs inside the device at any one time. This convenient feature allows you to savor a variety of music while saving you precious time from changing CDs frequently.

Dual Tape Deck

Dual Tape Deck

Digital Sound Control

Digital Sound Control offers you a choice of pre-set Jazz, Rock, Pop and Classic controls you can use to optimise the frequency ranges for different musical styles. Each mode uses graphic equalizing technology to automatically adjust the sound balance and enhance the most important sound frequencies in your chosen music style. Ultimately, Digital Sound Control makes it easy for you get the most out of your music by precisely adjusting the sound balance to match the type of music you are playing.

Dynamic Bass Boost

Dynamic Bass Boost maximizes your music enjoyment by emphasizing the bass content of the music throughout the range of volume settings - from low to high - at the touch of a button! Bottom-end bass frequencies usually get lost when the volume is set at a low level. To counteract this, Dynamic Bass Boost can be switched on to boost bass levels, so you can enjoy consistent sound even when you turn down the volume.
