Impressive power and bass

- 3-way Speaker System with MAX bass port
- 2x100W RMS with 3300W Peak Music Power Output

Extensive sound features

- MAX Sound for instant power boost
- Digital Sound Control for optimized music style settings
- Virtual Ambience Control provides simulated sound settings

PHILIPS

Highlights

3 DVD changer

3 DVD Changer

DTS Digital Surround

DTS delivers superior surround sound with your DVD movies.

Dolby Pro Logic II Surround

Dolby Pro Logic II is an advanced matrix decoder that derives five channels of surround sound, including two full-range surround channels, from any stereo source.

Play DVD, DivX & MP3/WMA-CD

The Philips player is compatible with most DVD and CD discs available in the market. DVD, DivX®, (S)VCD, MP3/WMA-CD, CD(RW) and Picture CD - all of them can play on the player. SVCD stands for "Super VideoCD". The quality of a SVCD is much better than a VCD, especially much more sharpen picture than a VCD because of the higher resolution. With DivX® support, you are able to enjoy DivX® encoded videos. The DivX media format is an MPEG4-based video compression technology that enables you to

save large files like movies, trailers and music videos on media like CD-R/RW, and DVD recordable discs.

Dual Logic Tape Deck

Dual Logic Tape Deck with auto replay

3-way spk sys with MAX port

3-way Speaker System with MAX bass port

2x100W RMS/ 3300W PMPO

2x100W RMS with 3300W Peak Music Power Output

MAX Sound

MAX Sound technology produces an instant boost in bass, maximizing volume performance and instantly creating the most impressive listening experience with just the touch of a button. Its sophisticated electronic circuitry calibrates existing sound and volume settings, instantly boosting bass and volume to maximum levels without distortion. The end result is a noticeable amplifying of both sound spectrum and volume and a potent audio boost that will add mileage to any music.

Digital Sound Control

Digital Sound Control offers you a choice of pre-set Jazz, Rock, Pop and Classic controls you can use to optimise the frequency ranges for different musical styles. Each mode uses graphic equalizing technology to automatically adjust the sound balance and enhance the most important sound frequencies in your chosen music style. Ultimately, Digital Sound Control makes it easy for you get the most out of your music by precisely adjusting the sound balance to match the type of music you are playing.

Virtual Ambience Control

Virtual Ambience Control (VAC) creates a virtual sound environment which digitally mimics the acoustic characteristic of special rooms or environments such as concert halls, the cinema, arcades, discos, etc. By realistically recreating the sound ambience of these different settings, VAC will dramatically enhance your enjoyment of your favorite music.

Specifications

Sound

- Output Power: 2x100W RMS / 3300W PMPO
- Sound Enhancement: MAX Sound, Digital Sound Control 4 modes, Virtual Ambience Control, Game Sound, MIX-IT
