The best gliding soleplate

For Philips dry irons

Discover the new Philips dry iron with DynaGlide soleplate. The slim tip soleplate, comfortable textured handle and elevated temperature control make the iron easy to use.

Benefits

Easy gliding on all fabrics

- DynaGlide soleplate for easy gliding on all garments

Comfortable ironing

- Slim-tip soleplate reaches easily into tricky areas
- Button groove speeds up ironing along buttons and seams
- Comfortable handle with texturing for easy grip

- Cord winder for easy cord storage

Full control

- Easy temperature control
- Temperature light indicates when the iron is hot enough

PHILIPS

Features

DynaGlide soleplate

DynaGlide coating is one of the best Philips soleplate coatings. It is much more scratch-resistant and it glides better than an aluminium, non-stick or ceramic soleplate.

Slim-tip soleplate

The slim tip of the soleplate allows you to reach easily into the trickiest areas, such as between the buttons, in pleats and in the corners.

Button groove

Button groove speeds up ironing along buttons and seams.

Comfortable handle

The texturing on the handle of the iron ensures a comfortable and ergonomic grip, so that your hand fits well and does not slip during ironing.

Easy storage

The cord can be wrapped around the heel rest so that the appliance is easy to store.

Easy temperature control

An elevated temperature control is easy to operate and precise. You will always have the right temperature for your garment.

Temperature light indicator

Temperature light goes on when the iron is heating up and goes off when the soleplate temperature has reached the set level.

Specifications
