

Ironing board

- XL Board Shape

GC220/10

6 great solutions for easy ironing

Efficient ironing board

The ironing board plays an important role in the ironing experience. The Philips ironing board is designed to help you get through the ironing more quickly and easily.

Benefits

Fast ironing

- Iron more in one go: XL board shape and XL iron tray
- Multi-layered board cover for smooth gliding
- Smooth ironing without water drips on the floor

Convenient ironing

- Clothes hanger

- 1 kg lighter*
- Ironing with 60% less noise*

Safe ironing

- Designed for stability: transport lock and feet caps

PHILIPS

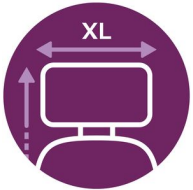

Features

Clothes hanger

No need to look for a place around you to hang your freshly ironed shirts. You can hang garments directly after ironing on the convenient hanging rail.

XL Board and XL Tray

Iron more in one go with the Philips XL board shape (120 x 45 cm). It is also ideal for ironing big items such as bed linen and tablecloths. The stable and extra-large iron tray is perfect for steam generators. It is also heat resistant and can be safely used with steam irons.

Multi-layered board cover

The board cover is made of 100% cotton and is supported by foam and felt layers. This combination provides a comfortable and smooth ironing surface.

AquaBlock anti-drip cover

AquaBlock is a unique technology that prevents condensed steam from dripping onto the floor, making this board cover the ideal ironing surface for steam generator irons.

Transport lock and feet caps

Transport lock prevents accidental collapsing of the board during ironing and also keeps the board closed during storage. The ironing board is supported by a double-leg construction with anti-slip feet caps that provides extra stability.

1 kg Lighter

The ironing board is now 1 kg lighter compared to the previous version for more convenient movement before your ironing session

Ironing with 60% less noise

The ironing experience is more convenient with the ironing board cover that provides quieter ironing with a 60% noise reduction in sound power versus a multilayer board cover
