7 great solutions for easy ironing

With AquaBlock anti-drip cover

The Easy7 ironing board features 7 great solutions to make ironing easy. With its unique AquaBlock anti-drip cover and its innovative features, Easy7 is designed for quality and speed and is ideal for steam generators.

Improved ironing experience

- No water drips on the floor: AquaBlock cover technology
- Ideal for steam generators: XL sized board and tray
- Comfortable ironing: adjustable height (70-94cm)

Designed for quality and speed

- Solid and stable: 2X leg construction with anti-slip feet
- Iron more in one go: XL board shape (120 x 45cm)
- Hang garments right after ironing: convenient hanging rail
- Designed for safety: child and transport lock

Highlights

AquaBlock cover technology

AquaBlock is a unique board cover technology that is designed to prevent condensed steam from dripping on the floor. It has a multi-layer construction which also provides a firm and smooth surface for you to easily achieve the ideal ironing results.

Adjustable height

The height of the ironing board is easy to adjust to your own height with a lever, located underneath the board surface. The height can be adjusted between 70 and 94cm.

Double leg construction

The ironing board is supported by double leg construction with anti-slip feet caps that provides extra stability.

Convenient hanging rail

No need to look for a place around you to hang your freshly ironed shirts. You can hang garments directly after ironing on the convenient hanging rail.

Child and transport lock

Child and transport lock prevents accidental collapsing of the board while ironing and also keeps the board closed during storage.

XL sized board and tray

This XL sized ironing board comes with a stable and extra-large iron tray which makes it perfect for steam generators. The tray is also heat resistant and can be safely used with steam irons.
