Highlights

OptimalTEMP technology

Now you can iron everything from jeans to silk with no temperature setting required. Guaranteed no burn on all ironable fabrics. Revolutionary technology with both the Advanced Smart Control Processor, which precisely controls the soleplate temperature so that you don't need to, and the powerful cyclonic steam chamber, which delivers consistent, powerful steam, making ironing easier and faster.

Energy saving

By using ECO mode and a reduced amount of steam, you can save energy without compromising on the ironing results.

New SteamGlide soleplate

The new SteamGlide soleplate is the best Philips soleplate. Is extremely scratch resistant, glides excellently and is easy to clean.

Refill with tap water any time

Your steam generator iron is designed to use tap water. While ironing, when the water tank runs out of water, you can easily refill it without having to wait or turn off your appliance.

Safety carry lock

Your steam generator iron comes with a safety carry lock. You can lock your iron safely on the base, making it safer and reducing the risk of people touching the hot soleplate. You can also carry the steam generator easily.

Safe rest

The innovative Philips OptimalTEMP technology guarantees no burns on all ironable fabrics. During ironing, there is no need to put your iron back on the base station; just leave the hot iron soleplate directly on the garments or cotton ironing board cover without an additional resting accessory. It will not damage any of your ironable garments, or the board. This makes your ironing easier, with less wrist effort.

Safety auto off

The safety auto off function automatically switches off the appliance if it has not been used for 10 minutes, to save energy.

Steam ready in 2 minutes

Steam is ready to use in 2 minutes and can be refilled at any time during ironing.

Tested and approved:

This iron is tested and approved by independent textile expert institutes, such as DWI, IWTO and Woolmark, for its excellent ironing performance. The Woolmark Apparel Care programme helps consumers to identify quality laundry products that are approved by The Woolmark Company for use on wool products. Philips, with its exclusive OptimalTEMP technology, is so far the only brand to be certified with the Gold standard from Woolmark. You can be confident that Woolmark-approved apparel care products are ideal for any wool garments.
