Highlights

Silent steam technology

Enjoy ironing with family around or while watching TV, without being disturbed by the noise of the steam. Silent steam technology delivers quiet yet very powerful steam. The steam generator is fitted with silencing steam filters to reduce the noise of the steam and a sound-absorbing platform to reduce the noise of the pump in the base.

OptimalTEMP technology

Now you can iron everything from jeans to silk with no temperature setting required. Guaranteed no burn on all ironable fabrics. Revolutionary technology with both the Advanced Smart Control Processor, which precisely controls the soleplate temperature so that you don't need to, and the powerful cyclonic steam chamber, which delivers consistent, powerful steam, making ironing easier and faster.

Easy De-calc

Ultra-long-lasting steam performance: Philips' exclusive Easy De-Calc function provides the ideal way to get rid of limescale and extend

the lifetime of your steam generator iron. Your iron will remind you to de-calc with light and sound. When your appliance is cold, simply open the Easy De-Calc knob and collect the dirty water and limescale in a cup.

Energy saving

By using ECO mode and a reduced amount of steam, you can save energy without compromising on the ironing results.

Refill with tap water any time

Your steam generator iron is designed to use tap water. While ironing, when the water tank runs out of water, you can easily refill it without having to wait or turn off your appliance.

Safety carry lock

Your steam generator iron comes with a safety carry lock. You can lock your iron safely on the base, making it safer and reducing the risk of people touching the hot soleplate. You can also carry the steam generator easily.

Safe rest

The innovative Philips OptimalTEMP technology guarantees no burns on all ironable fabrics. During ironing, there is no need to put your iron back on the base station; just leave the hot iron soleplate directly on the garments or cotton ironing board cover without an additional resting accessory. It will not damage any of your ironable garments, or the board. This makes your ironing easier, with less wrist effort.

Safety auto off

The safety auto off function automatically switches off the appliance if it has not been used for 10 minutes, to save energy.
